## Drilling Commences at the Karonie Gold Project, Eastern Goldfields, WA

### Highlights

- Drilling is underway at Alchemy's Karonie Project to identify Karonie style gold mineralisation immediately along strike of the Aldiss Mining Centre.
- 1,000m of RC drilling planned at Parmelia and Taupo Prospects.
- Assay results expected by mid to late July.

Alchemy Resources Limited (ASX: ALY) ("Alchemy") is pleased to announce the commencement of ~1,000m of reverse circulation (RC) drilling within the 100% owned Karonie Gold Project in the Eastern Goldfields, WA (*Figure 1*). Drilling has been designed to test high priority Karonie style gold targets immediately along strike to the north and south of the Silver Lake Resources Ltd (ASX: SLR) Aldiss Mining Centre.

Drilling is underway on five RC holes at the Parmelia Prospect to the south of Silver Lake's Tank South Prospect which has previously returned some spectacular results including 17m @ 24.7g/t Au, 24m @ 9.4g/t Au, 10m @ 10.1g/t Au, and 31m @ 4.4g/t Au <sup>1</sup>. The Parmelia RC holes are targeting the up dip, and down plunge positions relative to previous RC drill intercepts (*Figure 2*) including 26m @ 1.6g/t Au from 83m<sup>2</sup> (Alchemy – 2019) and 20m @ 1.0g/t Au from 32m<sup>3</sup>) (Gold Fields Australasia Pty Ltd – 2002).

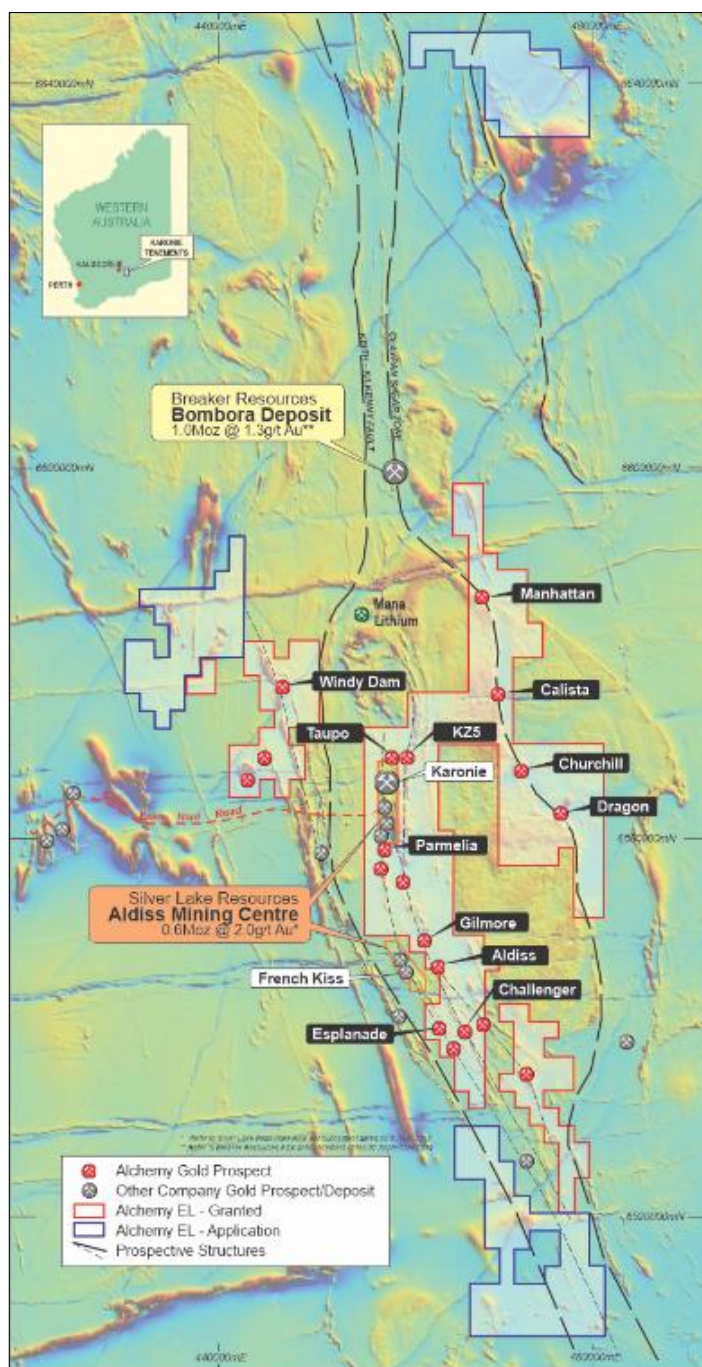

The planned drilling of the Taupo Prospect will include six RC holes targeting the strike extensions of several previous drill intercepts including 26m @ 1.8g/t Au from 36m<sup>3</sup>, 10m @ 1.8g/t Au from 68m<sup>2</sup>, 6m @ 1.7g/t Au from 36m to EOH<sup>2</sup>, and 4m @ 2.8g/t Au from 76m<sup>2</sup> (*Figure 3*).

Both the Taupo and Parmelia prospects are located directly along strike to the north and south of the Karonie Main and Harry's Hill Open Cut mines. The drilling is expected to be completed in ten days with the first assay results expected by mid-July.
