

Change of Directors' Interests – Expiry of Unlisted Options

Galaxy Resources Limited (ASX: GXY) (“**Galaxy**” or the “**Company**”) refers to its announcement released on 15 June 2020 confirming the expiry of 13,270,000 unlisted options exercisable at \$2.78 with an expiry date of 14 June 2020 (**Options**).

The Company advises that expiry of the Options resulted in a change of interests of certain Company Directors in the securities of the Company. Accordingly, the Company has separately lodged an *Appendix 3Y – Change of Director’s Interest Notice* for each of Messrs Rowley, Tse, Bacchus and Turner to reflect expiry of the Options (**Appendix 3Ys**).

The Company notes that due to an internal administrative oversight after the Options expired, the Appendix 3Ys were not lodged on time. The delayed lodgement of the Appendix 3Ys was not the result of any failure on the part of any Director to notify the Company of the relevant change in their respective interests or from any on-market transactions involving these Directors.

The Company maintains a Continuous Disclosure Policy and Share Trading Policy (available at www.gxy.com) and the Board is aware of the Company’s obligations under ASX Listing Rule 3.19A. The Company is satisfied that:

- (a) it has the necessary reporting and notification policies and processes in place to ensure compliance with its disclosure obligations under ASX Listing Rule 3.19A; and
- (b) its current arrangements are adequate to ensure compliance with ASX Listing Rule 3.19B.

The Company considers that the late lodgement of the Appendix 3Ys is an isolated event.

About Galaxy (ASX: GXY)

Galaxy Resources Limited (“Galaxy”) is an international company with lithium production facilities, hard rock mines and brine assets in Australia, Canada and Argentina. It wholly owns and operates the Mt Cattlin mine in Ravensthorpe Western Australia, which is currently producing spodumene and tantalum concentrate.

Galaxy is advancing plans to develop the Sal de Vida lithium and potash brine project in Argentina situated in the lithium triangle (where Chile, Argentina and Bolivia meet), which is currently the source of more than 40% of global lithium production. Sal de Vida has excellent potential as a low-cost brine-based lithium carbonate production facility.

Galaxy’s diversified project portfolio also consists of the wholly owned James Bay lithium pegmatite project in Quebec, Canada. James Bay will provide additional expansion capacity to capitalize on future lithium demand growth.

Lithium compounds are used in the manufacture of ceramics, glass, and consumer electronics and are an essential cathode material for long life lithium-ion batteries used in hybrid and electric vehicles, as well as mass energy storage systems. Galaxy is bullish about the global lithium demand outlook and is aiming to become a major producer of lithium products.

Caution Regarding Forward Looking Information

This document contains forward looking statements concerning Galaxy. Statements concerning mining reserves and resources may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions.

Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company’s actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes.

Forward looking statements in this document are based on Galaxy’s beliefs, opinions and estimates of Galaxy as of the dates the forward-looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. There can be no assurance that Galaxy’s plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that Galaxy will be able to confirm the presence of additional mineral deposits, that any mineralization will prove to be economic or that a mine will successfully be developed on any of Galaxy’s mineral properties. Circumstances or management’s estimates or opinions could change. The reader is cautioned not to place undue reliance on forward-looking statements. Data and amounts shown in this document relating to capital costs, operating costs, potential or estimated cashflow and project timelines are internally generated best estimates only. All such information and data is currently under review as part of Galaxy’s ongoing operational, development and feasibility studies. Accordingly, Galaxy makes no representation as to the accuracy and/or completeness of the figures or data included in the document.

Not for Release in the United States

This announcement has been prepared for publication in Australia and may not be released in the United States. This announcement does not constitute an offer of securities for sale in any jurisdiction, including the United States and any securities described in this announcement may not be offered or sold in the United States absent registration or an exemption from registration under the United States Securities Act of 1933, as amended. Any public offering of securities to be made in the United States will be made by means of a prospectus that may be obtained from the issuer and that will contain detailed information about the company and management, as well as financial statements.
