

CompleteHealth Partner tutorial video completed for distribution

Highlights

- Partner Video Tutorial completed for distribution.
- MyFiziq - NuraLogix integration underway.
- 6 new companies have registered interest.
- 2 minutes total assessment time.

MyFiziq Limited (ASX: MYQ) (MyFiziq) would like to update shareholders with the progress of the new and soon to be released **CompleteHealth** application with Canadian based NuraLogix Corporation.

As outlined to the ASX on the 6th July 2020, MyFiziq has completed and signed off on the new designs for the combined application with Canadian based Nuralogix Corporation. In addition, MyFiziq has completed the explanatory video that will be distributed to third party organisations that have registered interest in entering into a commercial engagement with MyFiziq, along with a number of additional agreed targets.

MyFiziq and Nuralogix are currently working on the commercial arrangements between the parties, which will allow both organization the ability to sell the combined platform to their global audiences.

MyFiziq has had a further 6 organisations register interest, taking the total to 18 organizations now looking to access the platform for both commercial release and assessment of application capabilities. These inquiries continue to be from the Telehealth, Wellness, Pharmacy Chains, Diabetes managements organisations, Insurers, and Re-Insurers.

Vlado Bosanac, Chief Executive Officer of MyFiziq, said:

“The video tutorial produced by our head of design has articulated the offering perfectly. We will be sharing the tutorial with the current 18 registered organisations to progress those discussions, along with a small number of other potential targets agreed to between NuraLogix and MyFiziq.

I continue to keep our shareholders informed on this integration as it has received great interest from investors through their direct inquiries. Additionally, we have generated a lot of commercial interest from companies that have been tracking our progress via our releases.

Below we have supplied a link which can be copied into your browser to view the tutorial video. Alternatively, you can also review the tutorial on the MyFiziq website below.”

About NuraLogix

NuraLogix is a pioneer of Affective Artificial Intelligence (AI) which is the combination of affective computing and artificial intelligence. The company has developed the world's first cloud based Affective AI Engine, DeepAffex™, which utilizes the company's proprietary facial imaging technology, Transdermal Optical Imaging(TOI™), to predict a wide array of human physiological and psychological affects using nothing more than the video camera found on any smartphone. Using this technology, the company developed the world's first smartphone app, Anura™, that can inform you about your general health and wellness in 30 seconds.

The company's objective is to use its technology to improve the lives of people everywhere.

About MyFiziq:

MyFiziq has developed and patented a proprietary dimensioning technology that enables its users to check, track, and assess their dimension using only a smartphone privately and accurately.

Our goal is to assist our partners by empowering their consumers with this capability. This in return gives our partners the ability to assess, assist, and communicate outcomes with their consumers when navigating day to day life. Whether this is a personal journey to better health, understanding the risk associated with their physical condition, tracking the changes they are experiencing through training, dieting, or under medical regimes. or simply wanting to be correctly sized for a garment when shopping online. The MyFiziq technology delivers this seamlessly, privately, and cost-effectively in under one minute.

Our partner benefits from our (SAAS) Software as a service pricing solution, that reduces with scale. Integration is made easy with the MyFiziq modular system, based on multiple (SDK's) software development kits, allowing a partner to select the functions, measurements, and displays to suit their individual needs.

MyFiziq has developed this capability by leveraging the power of Computer Vision, Machine Learning, and patented algorithms, to process these images on secure, enterprise-level infrastructure, delivering an end-to-end experience that is unrivaled in the industry. MyFiziq simplifies the collection of measurements and removes the human error present in traditional methods.
