

## DRILLING UNDERWAY AT MARYMIA GOLD PROJECT

- **Driller contractors on site at Marymia**
- **Drilling campaign underway**

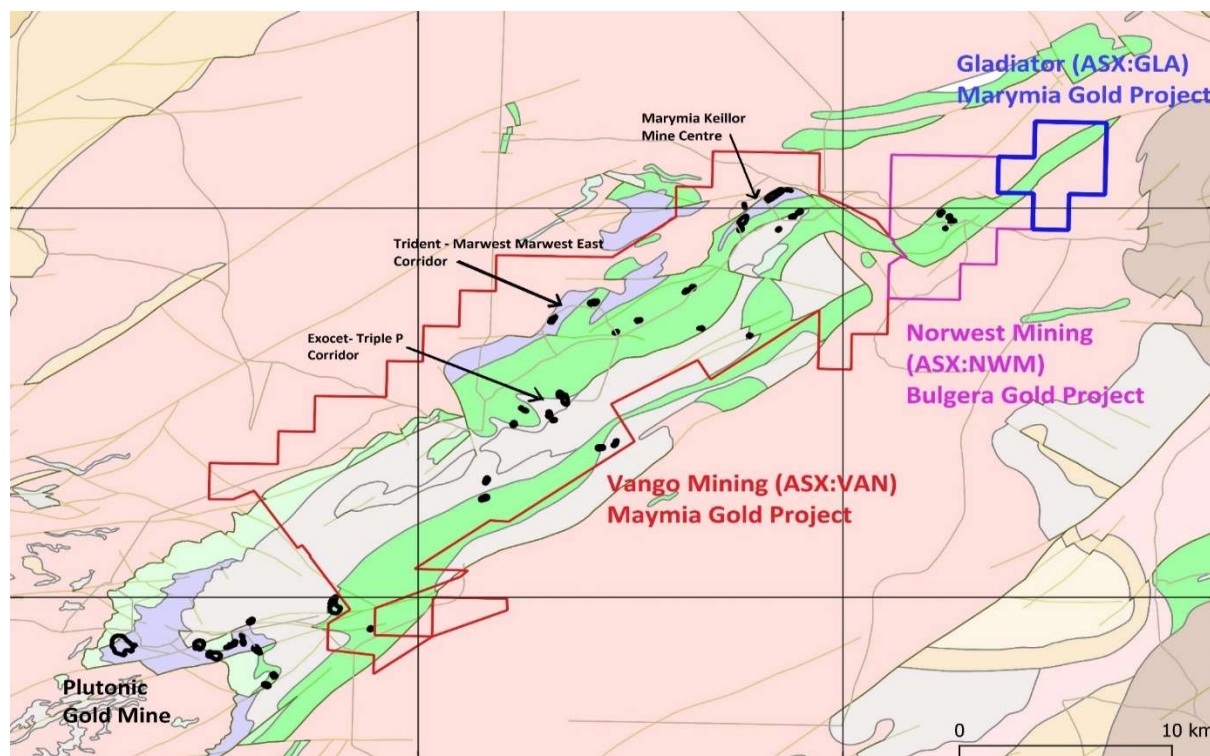

Gladiator Resources Ltd (Company) is pleased to advise that drilling contractors Harmec have arrived on site at Marymia to commence the company's maiden drill campaign on the project.

As previously announced, the Company's exploration program at its Marymia gold project had been delayed due to COVID-19 and more recently by the availability of the Drill Contractor, but is now progressing and drillers have arrived on site. Harmec Pty. Ltd. a local drilling contractor is contracted to undertake 1800 meters of Aircore/ drilling as part of the Company's approved Aircore (AC) drill programme to test untested strike extensions of historic wide spaced RAB intersections, greenstones to the NE tenement corner and south of anomalous MHRB008 to assess the southern greenstone margin. The drilling campaign will be overseen by Perth based consultant geologists APEX Geoscience.

The Marymia Gold Project in Western Australia comprises granted exploration license E52/3104 located at the north east end of the ~50km long Plutonic Greenstone Belt which hosts the world class Plutonic and Marymia gold mine centres some ~45km and ~10km to the south west respectively.

Subject to successful AC drilling and renewal of the tenement the Company would expect to complete future RC drilling as part of its planned exploration program at Marymia.
