June 2020

31 July 2020

SUMMARY

Woodlawn Zinc-Copper-Lead Project

 The Woodlawn Mine site remains in Care & Maintenance (C&M) following the suspension of operations on 24 March 2020, with activities focused on preserving mining and processing infrastructure for future re-start, along with environmental management of the site.

Exploration Projects

- Near mine exploration at Woodlawn has been suspended during C&M.
- Sky Metals Ltd (ASX:SKY) continued its expenditure commitments under the Cullarin & Kangiara Farm-In and JV
 Agreement with Heron. During the quarter, Sky drilled 10 diamond drill holes (DDH) for 3,331m at the Hume
 prospect within Heron's Cullarin Project, located 30 km north of Woodlawn, encountering a number of significant Au
 intersections.
- Alchemy Resources Ltd (ASX:ALY) continued its expenditure commitments under the Overflow, Girilambone and Eurow Farm-In and JV Agreement with Heron. During the quarter, this generated two potentially significant Cu-Au porphyry exploration targets at the Melrose and Yellow Mountain Mine prospects within Heron's Yellow Mountain Project (EL 8356), located within the central Lachlan Fold Belt of NSW.

Corporate

- Cash: Heron held A\$13.8 million in cash (including bonds of A\$3.7 million) at 30 June 2020.
- Secured debt facilities: Under Heron's secured financing Agreements with Orion Mine Finance (OMF) and Nomad Royalty Company (NRC), the suspension of operations is an event of default. Heron has sought, and been granted, waivers for this event of default from OMF and NRC until 31 July 2020.
- Strategy: Heron's financiers, including significant shareholders OMF, Greenstone Resources (Australia) Holdings LP and funds managed by Castlelake, and NRC, holder of the Woodlawn Silver Stream facility, have been in discussions with the Company regarding a pathway forward for Heron and the Woodlawn Mine, with the objective of securing the necessary funding that will satisfy existing financing facilities and provide a pathway for the re-start of operations at Woodlawn.

Heron Resources Ltd ("Heron" or the "Company") is pleased to provide its report for the June 2020 quarter.

WOODLAWN ZINC-COPPER PROJECT

Heron holds a direct 100% ownership of the mineral rights at the Woodlawn Mine site situated 40km south of Goulburn and 250km south-west of Sydney, in southern NSW, Australia. Heron's aim is to create a profitable, long-life, low-cost mining operation, producing base metal concentrates.

Over the past five years Heron has re-developed the Woodlawn Zinc-Copper Project through planning, construction, commissioning and ramp up to commercial production. Construction was completed in the June 2019 quarter and the first lead and zinc concentrates were produced and shipped in September and October 2019. The first concentrate sales revenue was received in October 2019.

Woodlawn Project – Operations Report

On 24 March 2020, operations were suspended at Woodlawn due to travel and other restrictions imposed by Australian Federal and State Governments in response to the COVID-19 pandemic, and also to safeguard the financial position of the Company. The majority of employees and all contractors were demobilised following the announcement and the site has remained in C&M during the June quarter. All mine and process plant infrastructure assets are being maintained by remaining personnel to a level that will support a rapid re-start of operations. Regulatory compliance is being maintained along with stringent security, health, safety and environmental protection protocols. Operational activities under C&M during the quarter were:

- **Safety:** No significant injuries or incidents occurred. Site procedures aligned with the Minerals Council of Australia COVID-19 protocols were maintained across the site.
- Tailings Reclaim: No tailings were reclaimed. Water levels on the legacy and new tailings storage facilities are being managed in accordance with good geotechnical practice.
- **Underground Mine:** There was no underground mine development or production during the quarter. Routine inspections, dewatering and ventilation to the base of the current mine development are being maintained.
- **Process Plant:** There was no production from the process plant. All plant facilities, including the process plant, tailings reclaim, water treatment and paste fill, are being routinely inspected and maintained by a small team of Heron employees in accordance with a C&M program designed to maintain the facilities in a state of readiness for a re-start of operations.
- Concentrate Production/Sales: A total of 3,573 dry metric tonnes (dmt) of Zn concentrate, 3,572 dmt of Pb concentrate and 1,048 dmt of Cu concentrate were shipped as the Woodlawn site ramped down and transitioned into C&M.

Woodlawn Exploration

• Woodlawn North Targets: Heron's current exploration focus is discovery and delineation of additional mineralised Volcanogenic Massive Sulfide (VMS) lenses directly north of the Woodlawn orebody. Prospects targeted are within the NW-oriented "Woodlawn Corridor" of prospective stratigraphy and within a NW to NE trending 2.5 km arc from the mine (Figure 1). At the Murphy's prospect, a down-hole electromagnetic (DHEM) survey completed on DDH CHDD0002 returned an interpreted exploration target. Two DHEM plates were modelled to fit the data and one of the plates coincided with a conductivity and chargeability anomaly returned from the Induced Polarisation (IP) survey completed in 2019. Neither of the modelled EM plates have been intersected by previous drilling. To better constrain the geometry and

Quarterly Report

June 2020

positions of the EM plates, a second DHEM survey is required using a different transmitter and receiver configuration (Figure 2).

- A DHEM survey completed at the Montrose prospect, located 6.5km NW of Woodlawn also returned a complex array of highly conductive EM anomalies, suggestive of exploration potential. Further work is needed to constrain these anomalies and establish potential drill targets.
- Woodlawn Regional Prospects: Heron continues to hold a strategic 1,372 sq-km tenement package covering the
 prospective Silurian volcanic rocks, similar to those which hosts the Woodlawn VMS base metal deposit. Heron's
 exploration focus is on historically known mineralisation zones with prospective geology, with the objective of locating
 comparable grade and metallurgy to that characterising Woodlawn, and within potential trucking distance of the
 Woodlawn mine and processing facility.

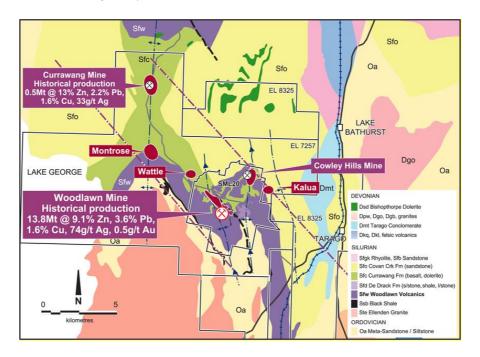

Figure 1: Woodlawn near-mine exploration prospects within NW striking Woodlawn Corridor.

Quarterly Report

June 2020

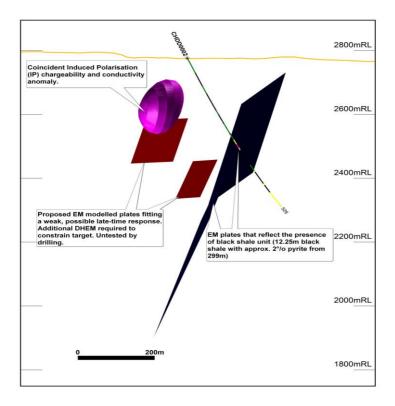

Figure 2: DDH CHDD0002 at Murphy's target showing two unconstrained modelled EM plates not tested by drilling. View looking east, WMG.

Exploration Joint Ventures

Heron retains interests in tenement holdings within the Lachlan Fold Belt of NSW and the Eastern Goldfields of Western Australia. These tenures are held through farm-in and joint venture interests, which include a number of other free-carried residual or royalty interests with minimal cost to Heron.

Sky Metals Farm-In and Joint Venture Agreement

As announced on the 9 October 2019, a farm-in agreement was signed with Sky Metals Ltd (ASX:SKY) relating to three tenements at Cullarin (EL 7954) and Kangiara (EL 8400, EL 8573), initially targeting McPhillamy's style gold mineralisation (Figure 3). Key terms of the agreement are \$400 k minimum expenditure in first year; a further \$1.6 M over next two-years to earn 80%, with a Heron free-carry to DFS or \$10 M of expenditure; 10 M Sky options at a strike price of 15c.

Sky announced (ASX:SKY 1 April 2020) it had reached expenditure of \$400 k and was moving to earn an 80% interest in the tenements. In accordance with the agreement, Heron's 10 M options vested and can be exercised by the Company at any time. Sky also announced assay results from its maiden drilling program at the Hume prospect (aka Wet Lagoon) within the Cullarin tenement. Exceptional results were returned and verified gold intercepts announced in a review of legacy drilling (ASX:SKY 10 February 2020).

During the quarter Sky completed a further 10 DDHs at the Hume prospect for 3,331 m. Significant results from the follow up drilling includes:

20 m grading 0.95 g/t Au from 37 m; including 7.3 m grading 2.08 g/t Au from 49.3 m (HUD003)

Quarterly Report

June 2020

- 69 m grading 2.2 g/t Au from 49 m; including 33 m grading 3.58 g/t Au from 51 m and 14 m grading 6.76 g/t Au from 68 m (HUD007)
- 25.2 m grading 0.94 g/t Au from 58 m; including 6.7 m grading 2.46 g/t Au from 75.7 m (HUD008)

A high-grade base metal mineralised intersection of VMS mineralisation was intersected by DDH HUD005, located 250 m north of HUD002. This intercepted:

• 6 m grading 6.61% Zn, 5.83% Pb, 1.28% Cu from 273 m (HUD005)

A significant program of geochemical soil sampling north of the Hume prospect has also been completed with follow up drilling proposed for the September quarter 2020. See http://www.skymetals.com.au for further details.

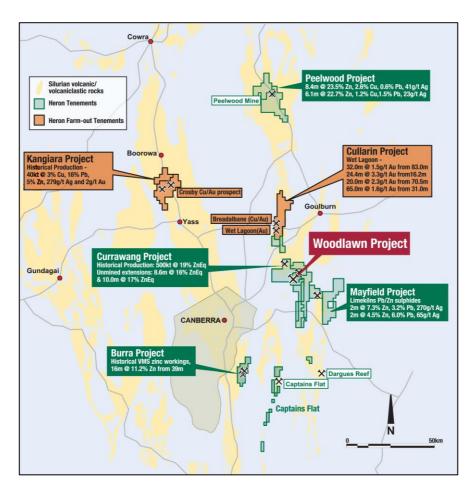

Figure 3: Heron NSW projects, including Kangiara and Cullarin farmed out to Sky Metals Ltd.

Alchemy Farm-In and Joint Venture (Overflow, Girilambone, Eurow and Yellow Mountain)

Heron entered into a Farm-In Agreement with Alchemy Resources Limited (ASX:ALY) in May 2016. The Farm-In Agreement includes eight Exploration Licences for 674 sq-km in the central Lachlan Fold Belt in NSW (refer Figure 4). Alchemy has earnt a 51% interest in the tenements after spending \$1 M and has moved to earn 80% by spending an additional \$1 M by 30 May 2021.

Alchemy announced (ASX:ALY 9 June 2020) it had identified two significant Cu-Au porphyry exploration targets at the Melrose and Yellow Mountain mine prospects within EL 8356. The Melrose target is located within a major hydrothermal alteration system with geochemical signatures similar to large Cu-Au porphyry deposits (e.g., Newcrest's Cadia). At Yellow Mountain, Alchemy has identified a strong IP anomaly using legacy data that to-date has not been drill tested. Alchemy intends to conduct IP surveys over the targets to better prioritise drill targets. However, access to the area will be dependent on travel restrictions associated with the COVID-19 pandemic. See http://alchemyresources.com.au/ for further details.

Compliance Statements (JORC 2012)

The technical information in this report relating to the exploration results is based on information compiled or reviewed by Ms. Alexandra Bonner, who is a Member of the Australian Institute of Mining and Metallurgy. Ms. Bonner is a full time employee of Heron Resources Limited and has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results. Ms. Bonner has reviewed this report and approves the scientific and technical disclosure related to exploration results within.

Issued Share Capital

As at the date of this report, Heron Resources Limited had 428,664,605 ordinary shares, 730,000 Employee options and 250,000 Performance Rights.

The options have an expiry date of 4 December 2020 and have an exercise price of A\$0.72.

The Performance rights are \$nil exercise price options and expire on 1 July 2021.

Heron trades on the ASX as HRR.

Notes

- The Quarterly Report is to provide a basis for informing the market how the entity's activities have been financed for the past Quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2. The "Nature of Interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3. **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4. The definitions in, and provisions of, AASB 1022: Accounting for Extractive Industries and AASB 1026: Statement of Cash Flows apply to this report.
- 5. **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
