### 3.3 Potential effect on Share Structure

- (a) As at the date of this Cleansing Notice the issued capital of the Company comprises of 148,965,486 issued Shares.
- (b) The capital structure of the Company will be affected by the conversion of the Tranche 1 Notes issued to Obsidian which will result in additional Shares being issued and the liability position of the Company decreasing accordingly.
- (c) The number of Shares issued on conversion of Tranche 1 Notes will be calculated by dividing the amount elected to be converted (after converting from US\$ to AU\$) by the conversion price of AU\$0.075 (**Conversion Price**) (or, where the Company issues securities to third parties during the term of the Tranche 1 Notes with an issue price (or a conversion/exercise price in the case of convertible securities) at a lower price than the Conversion Price, such lower price).
- (d) The maximum number of Shares that may be issued if Obsidian converts all of the Tranche 1 Notes is approximately 303,530, based on the Conversion Price and the US\$:AU\$ exchange rate at the date of funding.
- (e) Under the arrangements agreed in relation to securing the Tranche 1 Notes, the Company will also issue 2,000,000 Collateral Shares to Obsidian as security for the Company's obligations under the Agreement, as well as 307,061 Shares in satisfaction of the Commitment Fee.
- (f) The Tranche 1 Notes can be converted at any time prior to the relevant maturity date at the request of Obsidian.
