

Linus to present at Virtual Conference

Melbourne, Australia – 10 September, 2020: Linus Technologies Limited (ASX: LNU) – the only cloud-based solution that transforms static video into [hyper-personalized video](#) experiences with its world-first [Video Virtualization Engine™](#) (VVE) – is pleased to provide an opportunity for Shareholders and Investors to view a virtual presentation by the Linus team, to be held at 4:30pm (AEST) on Tuesday 15 September 2020.

Following a number of commercial wins and client deployments the Linus team would like to provide investors with information around the company's strategy and commercial progress.

The team will be joined by Heidi Cuthbert, CEO of Grafa who will provide a preview of the solution currently in development.

Event: Linus Technologies - Market Update
Presenting: Chris Richardson, CEO and Gerard Bongiorno, Executive Chairman plus key members of the Linus Operating Team
Heidi Cuthbert, CEO, Grafa
When: Tuesday, 15 September 2020, 4:30 PM Canberra, Melbourne, Sydney
Where: Zoom Webinar, details provided upon registration

[Please register in advance by clicking on this link](#)

After registering, you will receive a confirmation email containing information about joining the webinar.

The Company will release an updated presentation prior to the event, and Investors are invited to submit questions in advance to ir@linus.com.

There will also be an opportunity to feed questions through to the Panel throughout the presentation. A recording of the session will also be made available for those unable to attend.

This announcement has been authorised for release to ASX by the Linus Board of Directors.

**About Linus Technologies Limited:**

Linus is a global software-as-a-service company headquartered in Australia, with operations in London, New York and Europe. Linus has invented and patented the Video Virtualization Engine™ (VVE), which indexes, analyzes and tags each frame in a conventional video file and transforms it into a fully searchable Virtualized Video.

Linus' technology exposes the data that makes up the video file, making cumbersome video as flexible as all other forms of data. Accessing the data within the video file is the missing link for video cloud service providers, creating unparalleled value across the internet video industry. Linus' VVE powered hyper-personalization and search solution enables anyone to instantly search the data within video, from across an infinite number of sources, and automatically assemble the results in a single stream on-the-fly. No human hands required.
