*"We are delighted by the strong support for the placement from new and existing investors, including a number of high-quality Australian and international institutions that have joined our register, and I would like to sincerely thank everyone who participated in the raising for their support."*

Anglo Australian Resources NL (ASX: AAR) (**Anglo Australian** or the **Company**) is pleased to advise that it has secured firm commitments to raise \$11 million via a single-tranche share placement (**Placement**) comprising the issue of approximately 64.7 million shares at an issue price of A\$0.17 per share to sophisticated and professional investors.

Canaccord Genuity (Australia) Limited and Petra Capital Pty Ltd acted as Joint Lead Managers to the Placement. The Placement is being undertaken within the Company's existing placement capacity under Listing Rule 7.1.

In addition to the Placement, the Company is also undertaking a non-underwritten Share Purchase Plan (**SPP**) to raise up to \$3 million. The SPP will be open to all eligible shareholders at the same issue price as the Placement.

In conjunction with the Company's existing cash reserves, proceeds of the Placement and SPP will primarily be used to advance exploration and Resource definition drilling and technical and feasibility studies at the Company's 100%-owned Mandilla Gold Project, located approximately 60km south of Kalgoorlie, Western Australia.

Planned activities include:

- Completion of the current 10,600m RC drilling program at Mandilla
- Additional ~60km of RC drilling and ~10km of diamond drilling at Mandilla based on the following:
  - Additional Resource definition drilling at Mandilla East

  - Exploration drilling on the Mandilla East Southeast extension
  - Exploration drilling in the corridor between Mandilla East and Mandilla South
  - Drilling to test the magnetic low to the east of Mandilla South
- Advancement of technical studies for the Mandilla Gold Project, including environmental, geotechnical, metallurgical, mining and infrastructure
- Advancement of feasibility studies for the Mandilla Gold Project
- A 3,000m RC drilling program at the Feysville Gold Project to confirm previous interpretation
