

***EXPLORING FOR NEW
GOLD AND NICKEL
DEPOSITS IN THE YILGARN
OF WESTERN AUSTRALIA***

DISCLAIMER

Preparation

This Presentation has been prepared to provide prospective investors in Blaze International, ("The Company" or "Blaze International"), with general information to assist them in deciding whether they wish to undertake their own investigation and/ or consider a possible investment in the Company or the Company's projects.

This Presentation has not been independently verified for reliability, completeness or accuracy. No representation is made that such information and materials are reliable, complete or accurate. This Presentation is not a prospectus and does not constitute an offer or invitation or recommendation to any person and has been prepared solely for use by persons who are deemed to be "sophisticated investors" as described in the Corporations Act.

Projections and Assumptions

The projections and assumptions in this Presentation are indicative only and are not and should not be relied upon as representations as to future matters. The projections are based on assumptions that may or may not prove to be correct. The recipient must make their own independent assessment and investigation of those projections and assumptions. Investors will be required to undertake at their cost, any additional works needed for an investment decision.

Disclaimer

The Company and its respective shareholders, directors, partners, employees, officers, agents, consultants or advisors disclaim (to the maximum extent permitted by law) all duties and liabilities, including liability for negligence, for any loss or damage which is suffered or incurred by any person acting on any information provided or omitted to be provided by any of them in connection with an investment in The Company or any statements, opinions or matters (expressed or implied) arising out of, or contained in, or derived from, such information

No Offer, Invitation, Recommendation /Advice

The information set out in this Presentation does not constitute an offer or invitation to subscribe for securities in The Company or investment in the assets of the Company, or a recommendation by The Company to any person in respect of any matter.

Competent Persons Statement

The information in this report that relates to Exploration Results and Exploration potential is based on information compiled by Simon Coxhell (Exploration Results), a Director of Blaze International Mr Coxhell is a member of the Australasian Institute of Mining and Metallurgy and have sufficient experience of relevance to the styles of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves." Mr Coxhell consents to the inclusion in this report of the matters based on their information in the form and context in which it appears.

Blaze International is not aware of any new information or data that materially affects the information included in the relevant market announcements listed.

CORPORATE SNAPSHOT

Board of Directors

Chairman – David Wheeler

Technical Director – Simon Coxhell

Technical Advisor – Roland Gotthard

Corporate Director – Mathew Walker

Company Secretary – Loren King

CORPORATE SNAPSHOT

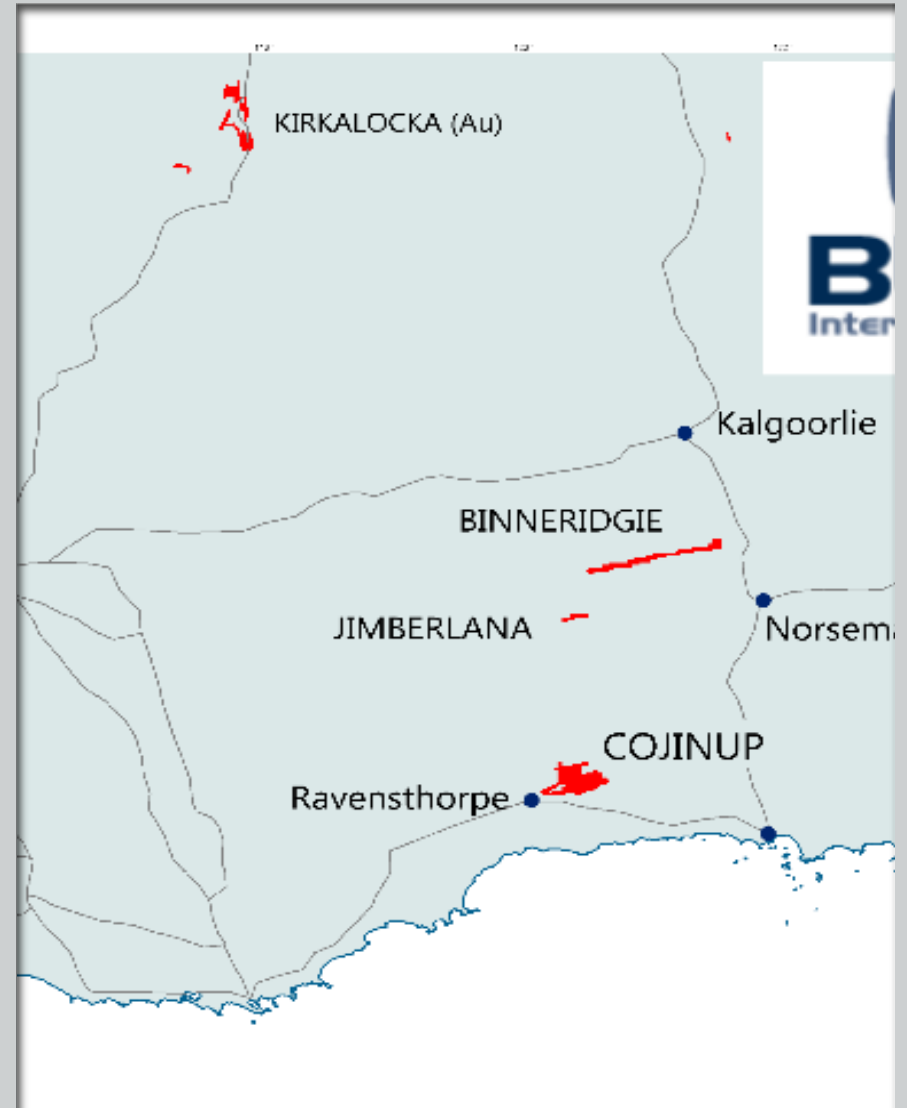

Shares on Issue	262,500,000.
Options on Issue	237,500,000
Market Capitalisation (\$0.035)	\$9.2M.
Top 20 Holders	49%
Cash	\$2,300,000.

Substantial Shareholders

- Great Southern Flour Mills Pty Ltd
20,000,000 7.62%
- Sunset Capital Management Pty
Ltd 19,623,816 7.48%
- Kitara Investments Pty Ltd
18,000,000 6.86%

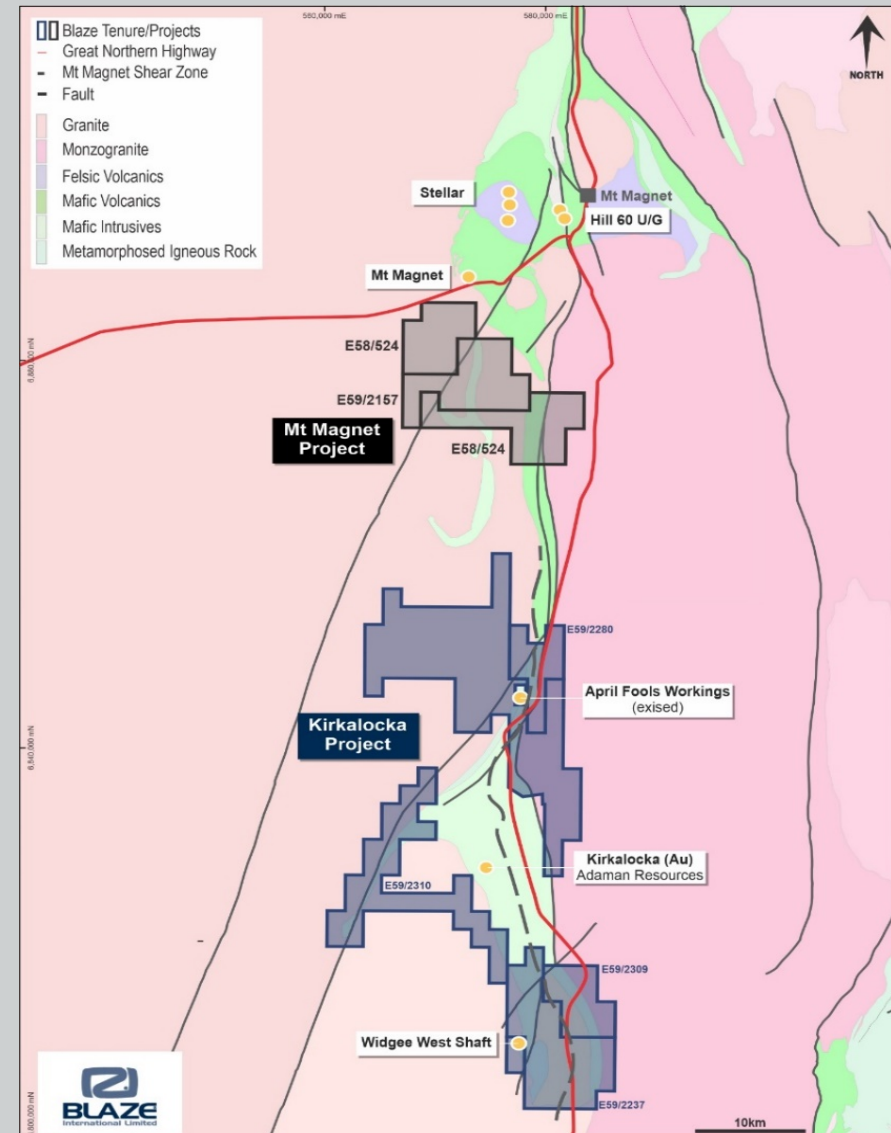

INVESTMENT HIGHLIGHTS

- ☑ Active explorer in the Yilgarn of Western Australia
- ☑ Targeting gold in the Mt Magnet and Kirkalocka District of the Murchison District, south of the multi million ounce Mt Magnet Mining Centre
- ☑ Targeting gold in the Leonora District of the north eastern Goldfields
- ☑ Targeting nickel sulphide accumulations in prospective ultramafic intrusive bodies located in Proterozoic aged dyke like features at Binneridgie, Jimberlana and Cojinup.

MT MAGNET SOUTH KIRKALOCKA

-  Ground holding of 5 Els (100% owned) covering 461 square kilometres, surrounding the Curara Well Deposit (+500 K ounces of gold)
-  Recently optioned 3 Els located north of Blaze existing tenure and south of Mt Magnet, covering 147 square kilometres
-  Review of tenure relative to magnetics and regolith has identified a number of targets considered prospective for gold mineralisation
-  Recent auger geochemistry on optioned tenure highlighted a significant gold anomaly extending over 4 kilometres of strike

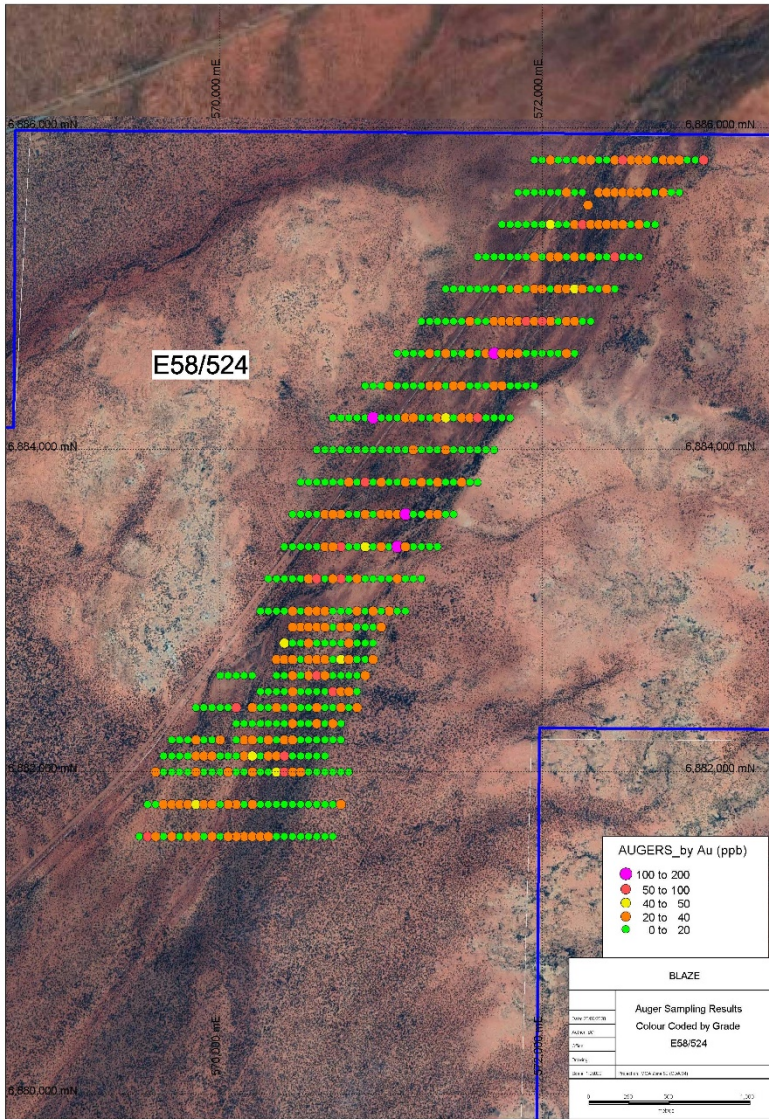

MT MAGNET SOUTH KIRKALOCKA

- Original Coverage of soil samples Mt Magnet South Project
- Blaze completed a detailed auger sampling program over the higher grade soil anomalies to provide greater definition and clarity of the anomalies
- POWs lodged final approvals anticipated within 4 week
- Drilling to commence in the current quarter
- Initially wide spaced traverses of aircore over the peaks of the auger sampling gold anomalies

MT MAGNET SOUTH KIRKALOCKA

NICKEL PROJECTS

-  The Company's prospect generative model has employed a Mineral Systems approach
-  Blaze and its project generative partner (RG) have collected ~90 samples of Proterozoic dykes
-  Identified PGE enrichments and anomalous nickel, copper and magmatic sulphide segregations within both the Widgiemooltha Suite and Marnda Moorn Suite of dykes.

NICKEL PROJECTS

 The Binneridge Dyke Project consists of three granted exploration licenses, E63/2004, E15/1750 and E15/1751, which cover approximately 100 kilometres of strike of the Binneridge Dyke.

 Initial work has involved reconnaissance rock chip sampling, mapping and soil sample traverses across the intrusions of the Binneridge Dyke.

NICKEL PROJECTS

- 
 The Jimberlana Project E63/2009 covers 18 kilometres of strike of the nickel prospective Jimberlana Norite intrusion, a mafic-ultramafic intrusion of the Widgiemooltha Dyke Suite.
- 
 Initial reconnaissance sampling by the Company involved taking three traverses of soil samples across the prospective intrusive rocks with the aim of detecting broad enrichments of platinum group elements (PGE's) in the soils.
- 
 Results of this sampling have shown that significant PGE's exist across >5km of strike of the intrusion in areas of laterite, with the anomaly concealed under alluvial cover in the west.

CONCLUSION & SUMMARY

- ☑ Prospective and large ground holding in the Yilgarn of Western Australia
- ☑ Targeting new gold and nickel discoveries in underexplored and geologically complex areas.
- ☑ Active work programs has highlighted a number of prospective areas
- ☑ Drilling of the Mt Magnet Optioned tenure planned for December quarter.
- ☑ Airborne magnetic surveys to highlight prospective lithologies within the nickel projects
- ☑ Continued prudent financial management and pragmatic exploration and Greenfields targeting work.
