About Abilene Oil and Gas Limited

Abilene Oil and Gas Limited is a Mid West USA focused production, development and exploration company. The company assets are located in Kansas. The company strategy is focused on building up oil production assets, increasing drilling locations and adding exploration acreage in the region. The company strategy is based on a combination of targeting high return projects and innovative funding while maintaining low overhead and corporate costs.

Abilene Oil And Gas Limited ('Abilene' or 'the Company') is pleased to announce that the first well in the CKU project, Claflin 1- 35, has been successful. The well has been drilled to a TD of 3383 feet. The primary target was intersected high to prognosis. The target interval was drill stem tested and recovered oil on test. The forward plan is to complete the well with production casing.

The production capability of the well will not be known or confirmed until the well is put on production. The timing of this activity is not confirmed, but is likely to be in the first quarter of 2015. Further updates on the well will be provided as information is received from the operator.
