Dear Sir

**MEDTECH ACHIEVES INTERNATIONAL CERTIFICATION FOR DATA PROTECTION**

Medtech Global Limited (MDG) is one of the first healthcare IT companies in New Zealand and Australia to be certified for ISO/IEC 27001-13, the internationally recognised standard of best practice in Information Security Management Systems (ISMS).

This independent ISMS certification reflects the integrity of Medtech systems in meeting the required ISO standard in respect of the collection and protection of data. Medtech is also an ISO 9001 certified organisation for Quality Management Systems.

The rapid expansion of patient's involvement in their healthcare management using patient portals like Medtech's ManageMyHealth, in conjunction with its practice management systems, Medtech32 and Evolution, emphasises the growing importance of quality information systems for secure data management.

We consider it vital to ensure our customers have confidence in our systems and feel reassured that we take data protection seriously, especially the protection of patient information. We are delighted to have our commitment to providing the most effective and secure platforms available, officially recognised at this level.

Yours faithfully

Vino Ramayah
Executive Chairman
