GRANT OF EUROPEAN PATENT APPROVAL

iWebGate Limited ("**iWebGate**" or the "**Company**") is pleased to advise that the European Patent Office has accepted the Company's European Complete Standard Patent Application entitled "System and Method for Multiple Concurrent Virtual Networks" for grant as a patent.

"This European patent approval compliments our patents portfolio in the United States, Australia and China" commented Tim Gooch, Chief Executive Officer of iWebGate.

"A range of VPN technologies cause major security and performance concerns. The awarding of this patent in another global region reinforces our belief iWebGate's technology is a viable alternative to traditional VPN services" stated iWebGate's Chief Technology Officer, Charlie Gargett.

iWebGate will now complete the requirements to obtain the formal Decision to Grant and to validate the Patent in each of the individual member countries.

Yours faithfully
