1 April 2015

Quarterly Report for the period ended 28 February 2015

Further to the Company's Quarterly Report and Appendix 5B released on 31 January 2015, the following Quarterly Report and Appendix 5B provides an overview of Company activities in the period from 31 December 2014 to 28 February 2015, to align with the Company's new 28 February end of financial year date.

Highlights during the period include:

During the period ended 28 February 2015, the Company continued to follow its three-pronged strategy to realise the value of the Company's assets.

Imaloto Coal Project and Extension (99%)

Advancement activities of its planned flagship Imaloto coal mine and 3 x 15 MW coal fired power plant project in Madagascar included:

- Continued discussions with Jirama and the Ministry of Energy in relation to the proposed Independent Power Producer ("IPP") licence and advancement of the technical aspects of the IPP.

Update on Permit 4578

- Original copy of the full judgement from the Tulear court was received declaring null and void various historical sale agreements, which ultimately resulted in Lemur being granted permit 4578. An appeal was lodged by the plaintiff.

Geoservices Equipment

- The drill rigs are in a position for the Company to consider various options available to realize value from the assets.

Corporate

- Cash on hand at 28 February 2015 totalled \$14.29 million (at ~7.3 cents per share, **the Company continues to trade at a significant discount to its cash holding**).

Lemur Resources Limited (**Lemur** or the **Company**) provides the following update on key activities undertaken by the Company during the period ended 28 February 2015.

Imaloto Coal Project and Extension (99%)

Independent Power Producer license

The Company continued its meetings with the Ministry of Energy (“MoE”) and Jiro Sy Rano Malagasy (“Jirama”) the Madagascar state owned electricity company, in relation to the proposed Imaloto Independent Power Producer (“IPP”) licence. The IPP licence will give Lemur the right to build, own and operate a coal-fired power plant of 3 x 15MW within 10km of its Imaloto Project.

As previously mentioned, drafts of the Power Purchasing Agreement (“PPA”) and Implementation Agreement (“IA” - power production & sale concession agreement) were submitted to Jirama and the MoE respectively for review. Discussions on the PPA have progressed well with technical, legal and commercial personnel at Jirama. No feedback has been received on the IA despite submitting all requested documents with the Ministry of Energy. The Company notes that a new Minister of Energy has been recently appointed and is hopeful that this will lead to engagement on the IA.

During the quarter, the Company hosted in Madagascar a delegation from a Chinese state owned engineering enterprise (“SOE”), who had expressed interest in financing and building the Imaloto IPP. Discussions are on-going with the Chinese SOE.

Lemur continued its engagement with engineering and environmental service providers during the quarter to advance the technical aspects of the IPP. Formal proposals have now been received. It is anticipated that these service providers will be formally engaged upon receipt by the Company of the IPP licence.

Permit 4578

On 19 November 2014, Lemur received the original copy of the full judgement from the Tulear court in relation to the legal claim on its permit 4578 mining licence which declared null and void various historical sale agreements, which ultimately resulted in Lemur being granted permit 4578. The Tulear court cancelled the original judgement withdrawing permit 4578.

Ms Rahajasoamampionona Ramiamanana (the plaintiff) had 30 days to lodge an appeal against the Tulear court’s decision following which the court decision will be final. An appeal was lodged within the requisite timeframe. The Tulear court has confirmed that the matter will be re-convened in April 2015, at which stage the plaintiff will be required to file submissions in support of the appeal.

The Company’s legal advisers, John W Fooks & Co., have re-iterated to the Company that, in their view, the claim is ill-founded. However, there can be no guarantee that the appeal will not be successful.

The Company is still waiting on the ruling by the Antananarivo court. The plaintiff approached the Antananarivo court for a temporary enforcement of the original (now over-turned) judgement in Tulear regarding permit 4578. The Company and its legal advisers remain positive on the outcome of the Antananarivo ruling in its favour.

Zaaiplaats Tin Project Acquisition

Post the end of the quarter, on 17 March 2015 Lemur announced it had executed a binding agreement to acquire 99.1% of Zaaiplaats Mining Proprietary Limited, a company incorporated in South Africa and the registered owner of the Zaaiplaats Project in the Limpopo Province of South Africa (Zaaiplaats Project) for a total consideration of R2,500,000 (approximately A\$276,000). Existing tailings dams on the

Zaaiplaats Project have an intrinsic value and potentially contain recoverable grades of tin. Additionally, there is potential to sell sand and other aggregates from non-tin bearing zones on the Zaaiplaats Project property, with various options currently being considered, providing a low cost entry point into production and a potential source of immediate revenue for the Company.

As previously mentioned, the Company engaged the services of VM Investment Company (“VMI”) to provide technical consulting and services in relation to project evaluation. VMI and the Company will continue to evaluate additional projects for Lemur.

Geoservices Equipment

The Company’s drilling and exploration entity, Pan African Drilling (a wholly owned subsidiary) relocated its geoservices equipment to a secure compound in Kapoeta, in South Sudan. South Sudan has recently instituted its mining regulations and it is expected that activity in the mining section will increase. It is the intention for Pan African Drilling to operate as a stand-alone contract geoservices business servicing the East African region.

During the period, the refurbishment of the equipment continued with parts and staff previously associated with the Company are being deployed to South Sudan. The Company continues to review projects that it can tender for with respect to drilling programs in the East African region and seek to realise value from its existing equipment. The Company also continues to consider an approach for the purchase of the equipment.

Corporate

Cash Position

As at 28 February 2015, Lemur had \$14.29 million cash on hand and no debt. The cash backing per share is ~7.3 cents. A copy of the Company’s Mining Exploration Entity Quarterly Report (Appendix 5B) in accordance with ASX Listing Rule 5.3 is attached.

For further information see www.lemurresources.com

About Lemur Resources Limited

Lemur Resources Limited is focused on the development of the Company's significant coal assets in Madagascar. The Company is planning to develop a thermal coal mine at its 99% owned Imaloto Coal Project, located in the Imaloto Coal Basin in Madagascar, which currently has a resource of 135.7 million GTIS of which 90.7% is measured and indicated (91.6mt measured and 31.5mt indicated). Lemur's Board and management have significant experience in developing mining projects in Africa. The Company listed on the ASX in August 2011.

Competent Persons Statement

The information in this Report that relates to Mineral Resources was released to ASX on 29 July 2014 (*Coal Mineral Resource Updated to JORC 2012*) and is based on information compiled by Mr Johan Erasmus. Mr Erasmus is a Qualified Geologist (Bachelor of Science - Geology and Chemistry, Bachelor of Science (Hons.) – Geology – University of Port Elizabeth – 1989, 1990) and is also a Professional Natural Scientist (Pr.Sci. Nat.), registered with the South African Council for Natural Scientific Professions, a 'Recognised Overseas Professional Organisation' ('ROPO') included in a list promulgated by the ASX from time to time. Mr Erasmus is a consultant to the Company and the owner of Sumsare Consulting CC. Mr Erasmus has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. The Company confirms that the form and context in which the information is presented has not been materially modified and it is not aware of any new information or data that material affects the information as announced on 29 July 2014. All material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

Forward Looking Statements

This announcement contains certain forward looking statements. The words "expect", "forecast", "should", "projected", "could", "may", "predict", "plan" and other similar expressions are intended to identify forward looking statements. Indications of, and guidance on, future earnings, cash flow costs and financial position and performance are also forward looking statements. Forward looking statements, opinions and estimates included in this announcement are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions.

Forward looking statements are provided as a general guide only and should not be relied on as a guarantee of future performance. Forward looking statements may be affected by a range of variables that could cause actual results or trends to differ materially. These variations, if materially adverse, may affect the timing or the feasibility of the development of the Imaloto Coal Project.

The Company believes it has a reasonable basis for making the forward-looking statements in this announcement, including with respect to any production targets, based on the information contained in this announcement and in particular:

- The LoM ROM production target of 21 million tonnes is based on the exploitation of the Measured and Indicated portions only of the JORC compliant resource. The Measured and Indicated portions represent 91% of the resource equating to a total of 123 million tonnes;
- JORC 2012 compliant Resources Statement released on 29 July 2014;
- Independent scoping studies which addressed the critical areas including the determination of mining inventory, mine design and scheduling, assay test work, and industry specific operating and capital cost data; and
- Independently prepared financial model and the key assumption contained therein relating to the commodity price and exchange rate forecasts.

Mining Tenements

Mining tenements held at the end of the quarter			
Permit number	Project name	Country held	Beneficial interest
3196	Imaloto	Madagascar	99%
4578	Imaloto	Madagascar	99%
12653	Imaloto	Madagascar	99%
27163	Imaloto	Madagascar	99%
26904	Imaloto	Madagascar	99%
31892	Ianapera	Madagascar	99%
31808	Sakaraha	Madagascar	99%
<p>No mining tenements were acquired or disposed of during the quarter.</p> <p>No exploration, mining production or development activities took place in respect of the Company's mining tenements during the quarter.</p> <p>The Company holds no beneficial percentage interests through farm-in or farm-out agreements at the end of the quarter, nor did the Company acquire or dispose of any beneficial percentage interests in farm-in or farm-out agreements during the quarter.</p>

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
