

Rumble Resources Ltd appoints EAS Advisors LLC as its North American Corporate Advisor

Highlights:

- **Rumble appoints EAS Advisors LLC (“EAS”) as North American Corporate Advisor**
- **EAS and its founder, Mr Edward Sugar, have a successful history of backing mining entrepreneurs and will complement the recent appointment of Nathan Tinkler**
- **Planning underway for North American roadshow to meet with key US groups**

Rumble Resources Ltd (ASX: RTR) (“Rumble” or “the Company”) is pleased to announce that it has appointed EAS Advisors LLC (“**EAS**”) as its North American corporate advisor.

Headquartered in New York, EAS Advisors is a boutique global resources advisory firm that was founded by Edward Sugar in 2008. The foundation of EAS’s business is built on knowledge, capital market insight and access to institutional capital. Having participated in over US\$3 billion of transactions to date.

EAS has an impressive track record of success in assisting natural resource companies at key stages and executing major global transactions. Mr Sugar and EAS have played a key role in many natural resources financing deals, well-known for backing early funding deals for mining entrepreneurs.

Commenting on the appointment, Rumble Resources CEO Mr Shane Sikora said he was excited to have appointed EAS as the Company’s North American corporate advisor.

“I am delighted to work with a group as well respected in the resources and investment market as EAS.” Mr Sikora said.

“EAS and Eddie have a long history of backing successful mining entrepreneurs and will work with our recently appointed corporate advisor Nathan Tinkler to significantly lift the exposure of Rumble to the global capital markets.”

Commenting on the appointment of EAS, Mr Sugar said: “I am looking forward to working with Rumble and Nathan Tinkler to provide the Company with the best advice to assist in building a major nickel company on the back of the Company’s ability to carry out and successfully manage their exploration work.”

“The Fraser Range is one of the standout nickel exploration destinations in the world, with the region underexplored and to date only has one world class nickel discovery.

The North American market is well versed on nickel discoveries which have a close affinity to the Canadian nickel belts that host the world class Thompson, Raglan and Voisey’s Bay nickel deposits. I believe there is a great opportunity to find multiple nickel discoveries in the Fraser Range, and hopefully replicate the Canadian experience in Western Australia.”
