

NEVADA IRON LTD

ABN 98 123 423 987

QUARTERLY REPORT FOR THE PERIOD ENDED 31 March 2015

HIGHLIGHTS

30 April 2015

- Water Pollution Control Permit Application deemed administratively complete and under technical review. Receipt of permit delayed to 2nd Quarter 2015.
- Air Pollution Control Permit received April 3, 2015.
- Reclamation Permit received March 4, 2015.
- Application to locate the rail loading facilities on Bureau of Reclamation lands submitted.
- Plan of Development for the power line Right-of-Way submitted in February 2015.
- Signed rail transport agreement with the Union Pacific Railroad, a leading rail transportation company, on Feb 11, 2015.
- Completed an equity raise in March of 2015, raising US\$420,000 at a price of US\$21.5c/share.

Overview

Nevada Iron Ltd (ASX Code: NVI, TSX Code: NVR) is a resource company focused on the development of the Buena Vista Iron Project located in northern Nevada, USA. The project demonstrates the attributes for a successful iron ore development, namely:

- Near surface resource
- Very low waste to ore ratio (<0.5:1)
- Easy metallurgy with a coarse grind producing a high grade (67.5-69% Fe) clean concentrate
- Close to existing nearby transport infrastructure and no requirement to build significant infrastructure, e.g. a rail line
- Access to multiple existing ports
- Manageable capital cost
- Stable and mining friendly jurisdiction
- Favourable climate for construction and operations
- No government royalty imposts
- Permitting almost complete
- Phase 1 project on private land, making permitting less onerous

Buena Vista Iron Project, USA (100%)

Logistics and Infrastructure

Negotiations are complete with the Union Pacific Railroad, a leading rail US carrier, for the transport of concentrate from the Company's Huxley rail siding to a variety of west coast ports. The agreement was signed in February of 2015. Negotiations with selected ports are ongoing to finalise the logistics chain required for operations.

The Company has the ability to deliver a base load tonnage to multiple west coast ports, which prefer non-coal bulk material. This makes the Nevada Iron tonnage especially attractive given the issues associated with exporting coal from west coast ports in the USA.

The recent fall in oil prices has also lead to reduced freight rates. In addition, sea freight costs have fallen rapidly over the past 6 months as bulk cargoes have been reduced, with current freight rates in the order of US\$10-12/wmt lower than those used in the Company's NVI 43101 report of 2013.

By securing its own siding location and locking up the rail access, the Company has become the dominant player in the Buena Vista Iron Ore district. Any other potential iron ore producers in the district would need to build their own siding and rail load out, and agree with rail carriers for access, or have to use the Company's facilities.

Environmental Permitting Activities

The Buena Vista Iron Project is located entirely on private land, therefore, all major permits for the mine site will be issued by the State of Nevada. Mines operating within the State of Nevada are required to obtain several permits including, but not limited to, a Water Pollution Control Permit (WPCP), a Reclamation Permit and an Air Quality Permit. The WPCP and Reclamation Permit are issued by the Nevada Division of Environmental Protection (NDEP) and the Bureau of Mining Regulation and Reclamation (BMRR). The primary purpose of the WPCP is to protect all surface and ground waters. Therefore, initial engineering designs have been completed identifying each process component, where

water and/or chemicals will be used in the process and how the liquids will be contained to prevent release to the environment.

Information required in the WPCP application includes characterisation of the lithology and hydrology at least 100 feet below each process component. All field characterisation work has been completed. The characterisation work included two (2) drill programs around the pits and process components, qualitative and quantitative groundwater analysis, geophysical surveys and geotechnical testing.

Very limited groundwater was encountered during the drilling program. This was born out through a series of pump tests. The groundwater information was used by Geomega Environmental Consultants, Boulder, Colorado, to construct and run established groundwater model programs, which confirmed that the low amounts of groundwater, coupled with the high evaporation rates, will not form pit lakes in either the West Pit or Section 5 Pit. The models also demonstrate that the Dry Stack Tailings Disposal Facility will not impact groundwater.

Samuels Engineering, Denver, Colorado, completed the designs of the crushing and milling circuits. The designs include the site plan, process flow sheets and containment designs and calculations, as required by NDEP-BMRR.

SRK Consultants, Reno, Nevada, designed the dry stack tailings impoundment and the waste rock dumps and prepared the WPCP permit application. The application was submitted on September 8, 2014. The Company received notification in October that the application is administratively complete and the technical review is underway. The Company anticipated receipt of the permit by March of 2015, however, the processing of the application has been delayed by BMRR due to staffing limitations. The permit is now anticipated to be received before the end of 2nd Quarter 2015. No significant issues have been identified to date.

The Reclamation Permit and bonding cost estimate, was received on March 4, 2015. The bond must be posted prior to commencement of construction.

The Air Pollution Control Permit was received on April 3, 2015. The permit allows the processing of 8,000,000 short tons of ore (~7.25 tonnes) and ~2.47 short tons of concentrate (~2.24 tonnes) per year.

The Company submitted an application to locate a rail loading facilities on Bureau of Reclamation lands. The Bureau of Reclamation completed their internal review and cost recovery estimate in December 2015. The initial National Environmental Policy Act meeting was held in February. Cultural surveys have also been completed and the Habitat Evaluations have been approved to allow biological surveys.

As the key permit applications have now been submitted, ongoing costs will reduce until project financing is secured, as the main expenditure for the year to date has been data collection for the permit modeling and permit preparation.

Outlook

As the Company finalises the main permitting effort on the Buena Vista Iron Project, it is also completing the various commercial agreements required for the operation of the project. The management team will continue to focus on these agreements, including the offtake agreements for the sale of the high grade concentrate. As these agreements can take some time to conclude, the Company is working towards having them finalised in order to take advantage of an upturn in iron pre prices and for taking the project forward.

Funding

The Company completed a share placement in early March 2015 and raised US\$420,000 by the issue of 1.95m shares. The funds will be used to maintain the momentum with permitting and key commercial agreements.

Given the downturn in the mining equity markets, the Company continues to reduce costs and is deferring all non-essential expenditure. The fall in iron ore prices has been at least partially offset by falls in project costs.

Forward-looking Statements

This announcement may contain certain information that constitutes forward-looking statements. Forward-looking statements refer to future events and are frequently characterised by words which imply uncertainty such as "plan", "expect", "project", "intend", "believe", "anticipate", "probable", "possible" and other similar words, or statements that certain events or conditions "may" or "will" occur. Forward-looking statements are based on opinions and estimates of management and are subject to a variety of risks, uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. These factors include the inherent risks in the exploration and development of mineral properties, mine site planning and development, the uncertainties involved in interpreting drilling results and other geological data, fluctuating metal prices, permitting and licensing, political unrest and other factors described above and in the Company's Risk Management Policy, which can be found on its web page, nv-iron.com, in "Corporate Governance" under the heading "Company". The Company disclaims any obligation to update or revise any forward-looking statements if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on forward-looking statements.

MINING TENEMENT STATUS

As at 31 March 2015 the Company held the following tenements:
