

The directors of King River Copper Limited ("King River" or "the Company") (ASX: KRC) are pleased to report that the RC drilling rig arrived on site at The Windsor Prospect, and drilling commenced this morning May 3rd.

Recently completed IP surveys at Windsor have identified 5 priority targets for drill testing (please refer to Figure 1).

On completion of that drilling program at Windsor, the rig will then be moved North to test additional IP targets around the Greys, Hayden and Chapman locations.
