ALEXIUM RECEIVES PURCHASE ORDER FROM NEW CLIENT

Perth, WA and Greer, South Carolina: Alexium International Group Limited (Alexium) (ASX:AJX, AX:AJX, OTC QX:AXXIY) is pleased to announce it has received a considerable purchase order from a new customer in the home furnishings market.

Over the past few months, Alexium has worked with a new customer to perform multiple short production-scale trials at the customer's facility using Alexium's Alexiflam chemistry, a process that has resulted in exceptional performance results.

Alexium has received a purchase order to run a substantial amount of yardage to confirm those results on a larger scale prior to a full commercial launch of the product. Upon the expected confirmation of those results, Alexium expects this to be a valuable relationship for both parties, generating between \$3M and \$10M annually in revenues to Alexium.

Nicholas Clark, CEO of Alexium, said "we are continuing to generate strong interest in the commercial sector markets and this opportunity with a major US company in the home furnishings arena will help cement Alexium's reputation for environmentally friendly, performance based, durable and cost effective Fire Retardant solutions"

On completion of Contract negotiations and firm pricing, Alexium will provide a further update on this opportunity to the market.

About Alexium

Alexium International Group Limited (ASX: AJX, AX:AJX OTC QX: AXXIY) holds proprietary patent applications for a process developed initially by the U.S. Department of Defense, which allows for the surface modification and attachment of nano-particles or multiple chemical functional groups to surfaces or substrates to provide functions such as fire retardancy, water proofing, oil proofing, and anti-microbial treatments. Applications under development include but are not limited to textiles, paints, and packaging, glass and building materials. Alexium's fire retardant chemical treatment are currently marketed for different fabric markets under the Ascalon™, Nycolon™, Nuvalon™, and Polytron™, Omnitron™ and Bactron™ trademarks.
