1. CHAIRMAN'S LETTER

Dear Shareholder

On behalf of the board of Directors of Southern Crown Resources Limited (the **Company**), I am very excited to present you with this opportunity to increase your holding in the Company before it starts its new direction.

As announced on 29 April 2015, the Company is proposing to change its focus from mineral exploration to a social media platform via the acquisition of 100% of the issued capital of HomePeople Corporation, which owns ROMIO (**Transaction**).

ROMIO is a next generation social media crowd-sourced review and endorsement provider, which has developed a recommendation platform based on improving the model of incumbent review and recommendation providers. ROMIO provides users with credible reviews of services in their neighbourhood from their friends and local experts, free from manipulated reviews, while acting as a lead generation/referral avenue for local businesses and freelancers using a revenue model similar to other successful technology platforms.

The Company is acquiring ROMIO for a deemed valuation of \$10m in a market where its peers maintain substantially higher values and will provide ROMIO with the platform and funding to expand quickly in the US market and eventually into the global market.

The funds raised pursuant to this Offer (and the recently announced Placement) will be used to meet the costs of the Transaction and to allow ROMIO to continue to develop and expand its business.

The Company is seeking to raise \$322,500 pursuant to this Offer, which will see the Company raise a total of \$645,000 (before expenses) in conjunction with the Placement.

On 11 May 2015, the Company released an offer document that included statements notifying Shareholders that ASX had indicated that the Shares issued under the Rights Issue would not be quoted on ASX until the completion (or termination of the Transaction). On 12 May 2015, the Company announced to ASX that it had received notification from ASX that it had reversed that decision, and as such the Shares issued under this Rights Issue will now be quoted on ASX at the completion of the Rights Issue in accordance with the usual ASX timetable for rights issues. You can refer to Section 4.4 for information on the indicative timetable for the Rights Issue.

An investment in the Company is subject to certain risks, non-exhaustive lists of which are highlighted in Section 6. I encourage you to read this Offer Document carefully and in its entirety. If you are in any doubt as to the contents of this Offer Document, as well as the risks of investing in the Company, you should consult your stockbroker, lawyer, accountant or other professional adviser without delay. Further background to the Transaction is contained in Section 4.1.

On behalf of the Board, I am pleased to present this Offer Document to you and invite you to take part in this exciting investment opportunity.

Yours faithfully

Rhod Grivas
Executive Chairman

4. DETAILS OF THE OFFER

4.1 Background

On 29 April 2015, the Company announced to ASX that it had entered into a binding terms sheet to acquire all of the shares in HomePeople Corporation, the owner of ROMIO, an online recommendations platform provider, in a reverse takeover that will see the New York based company list on the ASX (**Transaction**).

As part of the Transaction, the Company announced its intention to undertake an initial fund raising with the funds raised to be used to meet the costs associated with the Transaction. This initial fund raising will consist of:

- (a) this Offer; and
- (b) a placement of 10.75 million Shares at \$0.03 per Share to raise \$322,500 (**Placement**),

to raise an approximate total of \$645,000 (before expenses).

The issue price under the Offer is the same as under the Placement. Participants in the Placement will not be able to participate in the Offer to the extent of their Shares received under the Placement.

Funds raised under the Offer are intended to be used as set out in Section 4.3 below.

Completion of the Transaction is subject to the satisfaction of a number of conditions (set out in the announcement on 29 April 2015), including the completion of due diligence investigations by the Company on ROMIO, which due diligence is not expected to be completed until after the close of the Offer.

In addition, as a part of the Transaction, the Company will be required to re-comply with Chapters 1 and 2 of the ASX Listing Rules.

Shareholders should take note of the risk factors set out in Section 6 below.

4.2 The Offer

The Offer is being made as a non-renounceable entitlement offer of one (1) New Share for every four (4) Shares held by Eligible Shareholders registered at the Record Date at an issue price of \$0.03 per Share. Fractional entitlements will be rounded up to the nearest whole number.

Based on the capital structure of the Company as set out in Section 4.8 of this Offer Document, a maximum of approximately 10.75 million Shares will be issued pursuant to this Offer to raise up to approximately \$322,500.

As at the date of this Offer Document, the Company has 3.5 million Options on issue all of which may be exercised prior to the Record Date in order to participate in the Offer. Please refer to section 4.8 of this Offer Document for information on the exercise price and expiry date of the Options on issue.

All of the Shares offered under this Offer Document will rank equally with the Shares on issue at the date of this Offer Document.

The Directors may at any time decide to withdraw this Offer Document and the offer of Shares made under this Offer Document in which case the Company will

return all Application monies (without interest) within 28 days of giving such notice of withdrawal.

4.3 Use of Funds

Completion of the Offer will result in an increase in cash in hand of up to approximately \$322,500 (before the payment of costs associated with the Offer).

The Company currently intends to apply the funds raised under the Offer predominantly to assist with the coverage of costs associated with the Transaction, including costs associated with conducting due diligence investigations appropriate for the Transaction in both Australia and the United States and to supplement the Company's working capital so that the costs of undertaking the Transaction do not have a negative impact on the Company's working capital. Funds raised from the Offer will also be used to meet the expenses of the Offer, estimated to be approximately \$45,000.

Shareholders should note that, as with any budget, the allocation of funds may change depending on a number of factors, including completion of the Transaction, the outcome of operational and development activities, regulatory developments, market and general economic conditions and environmental factors. In light of this, the Board reserves the right to alter the way the funds are applied.

4.9 Dilution

Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 17% (as compared to their holdings and number of Shares on issue as at the date of this Offer Document).

Examples of how the dilution may impact Shareholders are set out in the table below:

Holder	Holding as at Record date	Approximate % at Record Date	Entitlements under the Offer	Holdings if Offer not taken Up	Approximate % post Offer
Shareholder 1	25,000,000	47%	6,250,000	25,000,000	39%

2. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted are placed under the Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

6. RISK FACTORS

6.1 Introduction

The Shares offered under this Offer Document should be considered speculative because of the nature of the Company's business.

There are numerous risk factors involved with the Company's business. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which securities will trade.

The following is a summary of the more material matters to be considered. However, this summary is not exhaustive and potential investors should examine the contents of this Offer Document in its entirety and consult their professional advisors before deciding whether to apply for the New Shares.

6.2 Key investment risks

Potential investors should be aware that subscribing for Shares in the Company involves a number of risks. Prospective investors should read this Offer Document in its entirety before deciding whether to apply for Shares under this Offer Document.

These risks together with other general risks applicable to all investments in listed securities not specifically referred to, may affect the value of the Shares in the future. Accordingly, an investment in the Company should be considered highly speculative. Investors should consider consulting their professional advisers before deciding whether to apply for Shares pursuant to this Offer Document.

(a) Completion of Transaction

As set out in the announcement on 29 April 2015, the Transaction remains subject to the satisfaction of a series of conditions, including the completion by the Company of due diligence investigations on ROMIO, receipt of various Shareholder approvals and completion of a capital raising to raise up to \$8 million. A full list of the conditions is set out in the announcement.

There is a risk that the Transaction may not be successfully completed. If this was to occur, the Company would continue operating its current exploration assets, and continue as a going concern, but may continue to seek new opportunities if it considers those opportunities more beneficial to Shareholders.

(b) Contractual Risk

In order for the Company to be able to achieve its objectives and complete the Transaction, the Company is reliant on HomePeople Corporation complying with its contractual obligations under the documentation, and in certain circumstances, agreeing to any necessary amendments, negotiating further agreements and related documents. Should HomePeople Corporation fail to comply with or agree to vary the terms of such agreements as the circumstances

dictate, the Transaction may not complete and the Company may not acquire the full shareholding interest in HomePeople Corporation it has agreed to acquire.

Further, if a party defaults in the performance of its contractual obligations it may be necessary for the Company to approach a court to seek a legal remedy. Legal action can be costly, especially with HomePeople Corporation located in the United States of America and there can be no guarantee that a legal remedy will be ultimately granted on the appropriate terms. There can be no guarantee that the Transaction will be completed.

(c) **Technology Risk**

Upon completion of the Transaction, the Company will be reliant upon certain technologies and upon the successful commercialisation of the technologies as currently held by ROMIO. There is a risk that as marketable technologies continue to develop in the communications industry there may be certain product developments that supersede, and render obsolete, the products and services of the Company, this would adversely affect the profitability of the Company and likely the value of the Shares.

(d) **New Market Entrants and Technology Risk**

The emergence of new competitors in the market, or any technological developments providing an alternative to ROMIO's product offerings could impact the market share that the Company is able to acquire and cause downward price pressure on consumer software and services platforms, thus reducing the Company's margins and revenue. Further, existing providers of similar consumer services may also respond aggressively to ROMIO's market growth to retain or regain market share, which could also impact the Company's margins and revenue.

(e) **Failure to Deal with Growth**

The ROMIO business has the potential to grow rapidly. If that occurs and the Company fails to properly manage that growth, then that failure could harm its business. Any failure to meet customer demand properly could adversely affect the business.

(f) **Availability of IT Staff in the Market**

ROMIO is reliant upon employees with specialist IT skills in order to develop and maintain its projects. Any shortage of availability of these skills in the IT employment market could impair the development of the ROMIO products and business and the rate of such development. Such shortage could also cause wage inflation, which may impact on the Company's profitability.

(g) **Dependence on Products**

ROMIO's products require the use of a smart phone or other similar device and as such the business model of ROMIO will be dependent upon the existence and ownership of these devices. There can be no guarantee that these devices will continue to be as widely used as they are currently or that they will not be replaced by alternative devices

upon which ROMIO's technology will not function as intended which could impact on the profitability of the Company.

(h) **Security Breaches and Hacker Attacks**

A malicious attack on ROMIO's systems, processes or people from external or internal sources could put the integrity and privacy of customers' data and business systems used at risk. The impact of loss or leakage of customer or business data could include costs for rebates, potential service disruption, litigation, and brand damage resulting in reduced or failing revenues. ROMIO follows best practice in relation to security policies, procedures, automated and manual protection, encryption systems and staff screening to minimise this risk.

(i) **Customer Service Risk**

ROMIO's business model is based on recurring revenue arising from usage. Poor customer service experiences may result if the Company loses key customer service personnel, fails to provide adequate training and resources for customer service personnel or there is a disruption to monitoring and account management systems utilised by customer service personnel. Poor experiences may result in the loss of customers, adverse publicity, litigation, regulatory enquiries and customers reducing the use of ROMIO products or services. If any of these occur, it may adversely impact the Company's revenues.

(j) **Exploration risks**

Exploration is a high risk activity that requires large amounts of expenditure over extended periods of time. The Company's exploration activities are subject to all the hazards and risks normally encountered in the exploration of minerals, including climatic conditions, hazards of operating vehicles and plant, risks associated with operating in remote areas and other similar considerations. Conclusions drawn during mineral exploration are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geochemical, geophysical, drilling and other data.

Further, the costs of the Company's exploration activities may materially differ from its estimates and assumptions. No assurance can be given that the Company's cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

6.3 General Risks

(a) **Additional requirements for capital**

The funds raised under the Offer are considered sufficient to meet the current proposed objectives of the Company. Additional funding may be required in the event future costs exceed the Company's estimates and to effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities, and to meet any unanticipated liabilities or expenses which the Company may incur.

The Company may seek to raise further funds through equity or debt financing, joint ventures or other means. Failure to obtain sufficient

financing for the Company's activities and future projects may result in delay and indefinite postponement of its research and development programmes. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing might not be favourable to the Company and might involve substantial dilution to Shareholders.

(b) **General economic conditions**

Economic conditions, both domestic and global, may affect the performance of the Company. Factors such as fluctuations in currencies, commodity prices, inflation, interest rates, supply and demand and industrial disruption may have an impact on operating costs and share market prices. The Company's future possible revenues and Share price can be affected by these factors, all of which are beyond the control of the Company or its Directors.

(c) **Foreign exchange rate risk**

ROMIO's revenue will be in United States dollars and the Company's operating expenses will be incurred principally in Australian dollars. Movements in the USD/AUD exchange rate may adversely or beneficially affect the Company's results or operations and cash flows.

(d) **Equity market conditions**

Securities listed on the stock market can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of Shares may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general.

General factors that may affect the market price of Shares include economic conditions in both Australia and internationally (particularly Australian, US and Chinese economic conditions), investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

(e) **Change in government policy and legislation**

Any material adverse changes in relevant government policies or legislation of Australia may affect the viability and profitability of the Company, and consequent returns to investors. The activities of the Company are subject to various federal, state and local laws governing prospecting, development, production, taxes, labour standards and occupational health and safety, and other matters.

6.4 Investment Speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the securities offered

under this Offer Document. Therefore, the securities to be issued pursuant to this Offer Document carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those securities.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for securities pursuant to this Offer Document.
