

Lapland Ni-Cu-PGE Project Granted

- All permits now granted (17 permits covering ~300km²)
- Reconnaissance mapping and sampling to commence in August 2015
- Search continues for joint venture partner

Hannans Reward Ltd (ASX:HNR) (Hannans or the Company) is pleased to advise that all permits comprising the Company's major Lapland Ni-Cu-PGE Project, located ~1,000km north of Stockholm, Sweden have now been granted in the name of wholly owned subsidiary Scandinavian Resources AB.

Hannans Managing Director Damian Hicks said, "We believe the Lapland Ni-Cu-PGE Project is located in Sweden's equivalent of the Fraser Range province in Western Australia – you have a coincident regional scale magnetic-gravity feature and multiple intrusives located on the edge of a craton margin. Several permits cover the spine of the regional gravity feature and Hannans' first field program will commence in August 2015.

We will also continue our search for a world class joint venture partner to join us in exploring this significant project."

The Lapland Ni-Cu-PGE Project work plan for the next twelve months includes stakeholder engagement, environmental assessments, mapping, sampling and prospecting, geophysical surveys (in-fill airborne gravity and electromagnetic surveys) and bedrock drilling. These activities will improve our understanding of the social, environmental and geotechnical characteristics of the Lapland Project.

A detailed introduction to the Lapland Project can be viewed at www.hannansreward.com.
