Highlights:

- **Heritage Clearance received for planned drilling at Golf Bore North**
- **Planned drilling expected to double strike length of Golf Bore deposit to 1.5 Km**
- **Completed 2,800 metres of 6,000 metre program**
- **Results of first seven holes expected soon**

The directors of Tyranna Resources Ltd. (ASX:TYX) are pleased to announce that heritage clearance of its 100% owned tenement EL5526 (Golf Bore North) has been received following a site visit on the 24th of August to the Golf Bore North prospect (Figure 3) by the Antakirinja Matu – Yankunytjatjara Aboriginal Corporation (AMYAC).

This clearance allows Tyranna to include planned drilling at Golf Bore North to be included in the current 6,000m reverse circulation drill program. The program is ongoing and to date approximately 2,800 metres have been completed with results of the first seven holes expected soon.

The Golf Bore North prospect, lies within Tyranna's 100% owned tenement EL5526 and together with the drilling currently underway, would double the potential strike length of the target resource at Golf Bore to approximately 1.5 Km's. (Figures 1 and 2).

The Golf Bore and Golf Bore North prospects are approximately 47 km's North East of the Challenger mine site, and represent the first of several targets selected to provide a gold resource inventory, in preparation for early production.
