Disclaimer

This presentation has been prepared by Pointerra Pty Ltd. ("Pointerra" or the "Company") based on information available to it as at the date of this presentation. The information in this presentation is provided in summary form and does not contain all information necessary to make an investment decision.

This presentation does not constitute an offer, invitation, solicitation or recommendation with respect to the purchase or sale of any security in Pointerra, nor does it constitute financial product advice or take into account any individual's investment objectives, taxation situation, financial situation or needs. An investor must not act on the basis of any matter contained in this presentation but must make its own assessment of Pointerra and conduct its own investigations. Before making an investment decision, investors should consider the appropriateness of the information having regard to their own objectives, financial situation and needs, and seek legal, taxation and financial advice appropriate to their jurisdiction and circumstances. Pointerra is not licensed to provide financial product advice in respect of its securities or any other financial products. Cooling off rights do not apply to the acquisition of Pointerra securities.

Although reasonable care has been taken to ensure that the facts stated in this presentation are accurate and that the opinions expressed are fair and reasonable, no representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of Pointerra, its officers, directors, employees and agents, nor any other person, accepts any responsibility and liability for the content of this presentation including, without limitation, any liability arising from fault or negligence, for any loss arising from the use of or reliance on any of the information contained in this presentation or otherwise arising in connection with it.

The information presented in this presentation is subject to change without notice and Pointerra does not have any responsibility or obligation to inform you of any matter arising or coming to their notice, after the date of this presentation, which may affect any matter referred to in this presentation. The distribution of this presentation may be restricted by law and you should observe any such restrictions.

Forward looking statements

This presentation contains certain forward looking statements that are based on the Company's management's beliefs, assumptions and expectations and on information currently available to management. Such forward looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results or performance of Pointerra to be materially different from the results or performance expressed or implied by such forward looking statements. Such forward looking statements are based on numerous assumptions regarding the Company's present and future business strategies and the political and economic environment in which Pointerra will operate in the future, which are subject to change without notice. Past performance is not necessarily a guide to future performance and no representation or warranty is made as to the likelihood of achievement or reasonableness of any forward looking statements or other forecast. To the full extent permitted by law, Pointerra and its directors, officers, employees, advisers, agents and intermediaries disclaim any obligation or undertaking to release any updates or revisions to information to reflect any change in any of the information contained in this presentation (including, but not limited to, any assumptions or expectations set out in the presentation).

The vision

Map The World in 3D

- Pointerra is building a powerful on-line Data as a Service (DaaS) solution for massive 3D point clouds
- The Pointerra solution utilises a patented algorithm that indexes massive amounts of point cloud data into a unified dataset. The processed data can then be dynamically searched, accessed and viewed by anyone, anywhere.
- This will allow organisations to effectively manage planning, design, construction, implementation and maintenance of their assets utilising the Pointerra engine for managing massive data.

The opportunity

Data Deluge

- 3D point cloud data volumes are growing exponentially
- Greater resolution, coverage and frequency
- New sources of data collection (UAV mounted Lidar, mobile scanning, handheld scanners.)
- Rising user demand for access to increasingly unmanageable data sets

Market Drivers

- Increasing need to leverage huge amounts of 3D data
- Requirements for dynamic discovery and access to dispersed information
- Need for faster access
- Rapidly expanding utilisation outside of the traditional 3D data markets

The challenge

Design for the real world

- Most buildings, plant & equipment, civil and process infrastructure in the real world require ongoing geospatial surveys of what currently exists
- 3D surveys, photogrammetry and models are being produced at an accelerating rate creating massive point cloud data sets
- An increasingly accurate 3D model of the real world is required for everything from design and construction, through maintenance of utilities to driver-less cars
- However the capture, management and use of spatial data is fragmented
 - Data captured independently by multiple project stakeholders
 - Inefficiency and duplication occurs
 - Data ownership is fragmented, isolated and rarely shared
 - Due to absence of validation, data is frequently redundant and out of date – needs to be recaptured repeatedly
- With project datasets often exceeding 1tb in size, data utilisation and distribution is increasingly difficult to manage

The solution

Pointerra now brings all of the pieces together

- All 3D data collected can be stored in one place
- Massive 3D point cloud datasets managed online by **Pointerra's** powerful processing engine (provisional patent application in place)
- Industries become better resourced and better connected
- Massive accumulated data is able to be accessed instantly and handled effectively

See the world in high resolution

Raw 3D **point cloud data** processed by the **Pointerra Engine**

Access instantly,
view dynamically,
and manipulate
powerfully

West Coast Highway, Scarborough, Western Australia

The technology

- Unique compression, indexing, and visualisation algorithms for massive 3D spatial datasets
- Storage and visualisation of the entire world to millimetre resolution
- Initial focus is on massive point cloud data,
- Data processing algorithm approach is general and can be applied to other datasets and industries
- **Pointerra** will process, store, and render all data remotely on **Pointerra's** cloud-based servers
- Users access **Pointerra's** cloud-based service via an Internet connected session

Experienced team

Dr Rob Newman Non-Executive Chairman

Serial high tech entrepreneur with deep experience in the geospatial industry

Ian Olson Managing Director

Executive experience in diversified geospatial services company and Chartered Accountant with extensive corporate advisory skills

Shane Douglas Chief Technology Officer

Inventor and industry veteran with deep domain experience in the geospatial industry

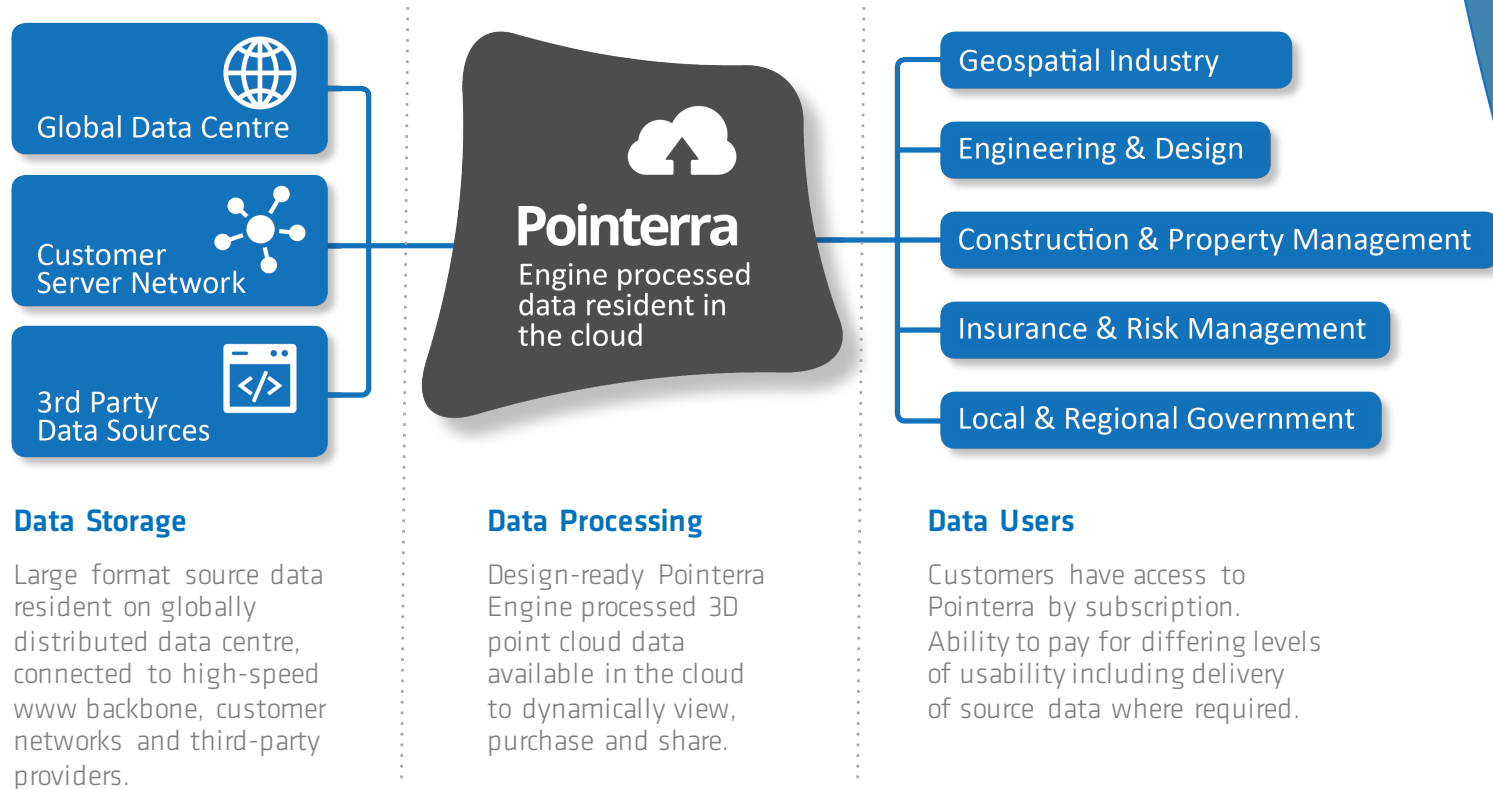

Mike Freeth Development Lead

Software developer and designer with a diverse skill set with a particular skill and interest in web technologies

Mark Morrison VP Engineering

Industry veteran with commercial and technical expertise in geospatial and mining software

Business model

Revenue model

- **Pointerra** is selling a Data as a Service (DaaS) solution
- Both subscription (annuity) and usage (volume) based
- Third party licensed and **Pointerra** captured data will be available to customers on a subscription model
 - Subscriptions being usage (volume) based
- Data owners control access to their data
 - Owners can choose to restrict access to its data, or
 - Make their data available for licence fee
 - **Pointerra** will take a margin on the licence charged

Pointerra engine development stages

Phase 1

- Establish development team and core development processes
- Finalise core engine software ready for commercialisation
- Optimise the engine to run on cloud-based infrastructure

Phase 2

- Scale data ingestion code to work with anticipated data volumes
- Deploy initial browser-based **Pointerra** user interface

Phase 3

- Add more end-user tools to develop the **Pointerra** DaaS platform
- Investigate automated data processing and analytics opportunities

Phase 4

- Expand **Pointerra** to include other spatial data types (e.g. surfaces)

Initial market entry

- **Pointerra** will deliver enterprise and publicly available data for Australia, US and Europe
 - Available for free for small data usage
 - Otherwise by subscription
- **Pointerra** will process and manage existing and newly created proprietary data for organisations – fee for service basis

The global market

Global geospatial industry valued at \$270 billion USD

Encompassing all digital mapping and location-based services, the geospatial industry is growing meaning many of the cited estimates will now have been significantly overtaken.

\$150-\$270 billion

Global revenues of geospatial industry per year

\$90 billion

Geospatial industry pays out in wages

\$73 billion

Industry value in the US

\$1.4 trillion

Geospatial industry saves for business each year

\$0.5-2.8 billion

Savings from reduced pricing of infrequently bought services and goods

3.5 billion litres

Petrol saved per year globally

\$8-\$22 billion

Global cost savings on agricultural irrigation

1.1 billion hours

Travel time saved per year globally

The global market

The global geospatial industry is experiencing strong growth

Industry reports suggest that the global geospatial industry is going to see strong returns in the years to come. Here's what to expect.

| Market | CAGR | By when |
|-----------------------------|--------|---------|
| Global GIS market | 9.60% | 2016 |
| GNSS installed base | 22% | 2016 |
| LiDAR market | 16.64% | 2018 |
| GIS market in BFSI | 4.95% | 2016 |
| GIS market in the utilities | 10.37% | 2016 |
| Precision farming market | 13.39% | 2018 |

Significant growth creates opportunity for **Pointerra**
