In part consideration for the acquisition of Octiplex, the Company will issue 19,920,327 Shares to the Vendors of Octiplex (**Consideration Shares**). Although the Consideration Shares have a 12 month voluntary escrow period attached to them, the Company is seeking to cleanse their issue in accordance with section 708A(11) of the Corporations Act.

7. RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

The following is a summary of the more significant rights and liabilities attaching to Securities to be issued pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Company's Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

7.1 General Meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with Section 249D of the Corporations Act.

7.2 Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of Shares, at general meetings of Shareholders or classes of Shareholders:

- (a) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (b) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (c) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have a fraction of a vote equivalent to the proportion which the amount paid up bears to the total issue price for the share.

7.3 Dividend Rights

The Directors may from time to time declare and pay or credit a dividend in accordance with the Corporations Act. Subject to any special right as to dividends attaching to a Share, all dividends will be declared and paid according to the proportion which the amount paid on the Share is to the total amount payable in respect of the Shares (but any amount paid during the period in respect of which a dividend is declared only entitles the Shareholder to an apportioned amount of that dividend as from the date of payment). The Directors may from time to time pay or credit to the Shareholders such interim dividends as they may determine. No dividends shall be payable except out of profits. A determination by the Directors as to the profits of the Company shall be conclusive. No dividend shall carry interest as against the Company.

The Directors may from time to time grant to Shareholders or any class of shareholders the right to elect to reinvest cash dividends paid by the Company by subscribing for Shares in the Company on such terms and conditions as the Directors think fit. The Directors may, at their discretion, resolve in respect of any dividend which it is proposed to pay or to declare on any Shares of the

Company, that holders of such Shares may elect to forgo their right to the whole or part of the proposed dividend and to receive instead an issue of Shares credited as fully paid to the extent and on the terms and conditions of the Constitution. The Directors may set aside out of the profits of the Company such amounts as they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

7.4 Winding-Up

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders. The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

7.5 Transfer of Shares

Generally, Shares in the Company are freely transferable, subject to formal requirements that the registration of the transfer does not result in a contravention of or failure to observe the provisions of a law of Australia and the transfer does not breach the Corporations Act and the ASX Listing Rules.

7.6 Future Increase in Capital

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

7.7 Variation of Rights

Under Section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders, vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

7.8 Terms and Conditions of Options

- (a) Each Option entitles the holder to subscribe for one Share upon exercise of the Option.
- (b) The exercise price of each Option is \$0.075 (**Exercise Price**).
- (c) The Options will expire at 5:00pm AWST on 31 August 2017 (**Expiry Date**).

- (d) The Options are exercisable at any time prior to the Expiry Date.
- (e) The Options may be exercised by notice in writing to the Company and payment of the Exercise Price for each Option being exercised.
- (f) Subject to compliance with the Corporations Act (including but not limited to section 707(3) of the Corporations Act), the Options are freely transferable in whole or in part at any time prior to the Expiry Date.
- (g) All Shares issued upon exercise of the Options will rank equally in all respects with all previously issued Shares at the time being on issue.
- (h) The Company will apply to the ASX for quotation of all Shares issued upon exercise of the Options, within the period required by ASX, if the Shares are then quoted on the ASX.
- (i) If there is any reconstruction of the issued share capital of the Company, the rights of the holder of the Options will be varied in accordance with the Listing Rules.
- (j) There are no participation rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to existing Shareholders during the currency of Options. However, the Company will ensure that for the purposes of determining entitlements to any such issue, the record date will be at least four (4) business days after the issue is announced. This will give the holders of Options the opportunity to exercise their Options prior to the date for determining entitlements to participate in any such issue.
- (k) If the Company makes a bonus issue of Shares or other securities to Shareholders (other than an issue in lieu or satisfaction, of dividends or by way of dividend investment):
 - (i) the number of Shares which must be issued on the exercise of an Option will be increased by the number of Shares which the holder would have received if the holder of the Options had exercised the Option before the record date for the bonus issue; and
 - (ii) no change will be made to the Exercise Price.
- (l) If the Company makes an issue of Shares pro rata to Shareholders (other than an issue in lieu of in satisfaction of dividends or by way of dividend reinvestment) the Exercise Price will be reduced according to the following formula:

$$\text{New Exercise Price} = \frac{O - E(P - (S + D))}{N+1}$$

O = the old Exercise Price.

E = the number of underlying Shares into which one Option is exercisable.

P = average market price per Share weighted by reference to volume of the underlying Shares during the five (5) trading days ending on the day before the ex rights date or ex entitlements date.

S = the subscription price of a Share under the pro rata issue.

D = the dividend due but not yet paid on the existing underlying Shares (except those to be issued under the pro rata issue).

N = the number of Shares with rights or entitlements that must be held to receive a right to one new Share.

- (m) Reminder notices will be forwarded to the Optionholders prior to the expiry of the Options for Options not exercised before the Expiry Date.
- (n) The Options will be recorded on the Company's register of securities maintained at the share registry. The register will be open for inspection by an Optionholder free of charge. Shares to be allotted on exercise of Options will be recorded on the Company's share register.
- (o) In the above terms and conditions, unless the context otherwise requires, terms defined in the Corporations Act or the Listing Rules, and not otherwise defined in these terms and conditions are deemed to have the meanings ascribed to them in the Corporations Act or Listing Rules (as applicable).

8. RISK FACTORS

8.1 Introduction

The Securities offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

8.2 Company specific

(a) Limited Operating History

The Company, in respect to the business segment acquired from "Newzulu Limited" (now named "Newzulu Holdings Limited") in August 2014, has a limited operating history and the potential of its business model is continuing to evolve and develop. No assurances can be given that the Company will achieve commercial viability through the successful implementation of its business plans.

In addition, there is the risk that the Company's technical platforms may not function as intended, including with respect to scalability and coping with increasing numbers of users or client numbers. This may lead to the Company's reputation suffering amongst users, contributors and its partners.

(b) Future Capital Needs and Additional Funding

The future capital requirements of the Company will depend on many factors including its business development activities. The Board believes its current cash reserves and the net proceeds of the Placement will be adequate to fund its business development activities, business plan and other Company objectives in the short term. Changes to operational requirements, market conditions and business opportunities may mean further funding is required by the Company, the Group and/ or a business unit at an earlier stage than is currently anticipated.

There can be no assurance that additional funds will be available on acceptable terms, or at all. The Company's failure to obtain sufficient funds if and when needed could:

- (i) delay or suspend the Company's business development activities, business plan and other Company objectives; or
- (ii) have a material adverse effect on the Company's business and its financial condition and performance and the Company's ability to continue as a going concern.

Further funding may be required to meet the Company's objectives and working capital costs in the medium to long term. The Company may be required to undertake additional capital raisings and/or establish additional debt facilities to develop its business development activities and meet its objectives and working capital costs in the medium to long term.

(c) **Reliance on Key Employees**

The Company's ability to effectively execute its growth strategies depends upon the performance and expertise of key employees, including those with valuable technological skills and specialist knowledge of the Company's business model and markets. The departure of certain key employees, including Mr Alexander Hartman and Mr Marc Milgrom, and any delay in their replacement or indeed any failure to adequately replace them, is likely to hinder the Company's ability to achieve its strategic growth objectives and financial performance goals. In addition, in order for the Company to achieve its growth objectives it will likely be required to engage the services of additional key management personnel with appropriate experience and technological skills. There is no guarantee that the Company will be able to attract and retain appropriately qualified personnel in these areas. Any failure to do so is likely to also hinder the Company's ability to achieve its strategic growth objectives.

(d) **Failure to Deal with Growth**

The Directors will continue to seek to grow the Company both organically and through new investment opportunities. There are always risks that the benefits, synergies or efficiencies expected from such investments or growth may take longer than expected to be achieved or may not be achieved at all. Any investments pursued could have a material adverse effect on the Company.

There is a risk that management of the Company will not be able to implement the Company's growth strategy. The capacity of the management team to properly implement and manage the strategic direction of the Company may affect the Company's financial performance.

The Company's business has the potential to grow rapidly. If that occurs and the Company fails to properly manage that growth, then that failure could harm its business. Any failure to meet user and contributor demand properly could adversely affect the business, including demand for Newzulu's products, services, revenue collection, user and contributor satisfaction and public perception.

(e) **Industry Competition**

The Company's future performance may be affected by the level of competition in the crowd-sourced news market in which it operates. Whilst the Company is an early mover in the industry, new or existing competitors may be successful in offering alternative or preferred crowd-sourced news platforms for citizen and freelance journalists and photographers and may enter into strategic partnerships with recognised press associations which enhance their business at the expense of the Company.

The Company's future performance may also be affected by the level of competition in the media and branding markets in which it operates. Whilst the Company has enjoyed success in these industries to date, new or existing competitors may be successful in offering alternatives for media outlets, brands, agencies, enterprises and content producers to the Newzulu platform.

(f) **Attracting Traffic to Websites**

The Company's growth strategy and future revenues depend on, amongst other things, attracting sufficient web traffic to its websites. The level of web traffic to the Company's websites is likely to directly influence the number of Contributors to its platforms, the ability of the Company to enter into further agreements or arrangements with clients and its ability to generate revenue from its platforms and advertising. Various factors can affect web traffic arriving at the Company's websites including, but not limited to:

- (i) marketing – if the Company's marketing and promotional efforts are not effective, a lack of web traffic is likely to result;
- (ii) brand damage – if the Company suffers from reputational damage (refer to other risks in this Section 8), the level of web traffic may be adversely impacted; and
- (iii) search engine traffic – search engines direct significant traffic to the Company's websites. Should any of the major search engines make changes to their algorithms and procedures that direct this traffic, the Company may experience a reduction in web traffic.

A decline in web traffic to the Company's websites could adversely impact the Company's ability to generate new business and revenue streams and result in it failing to achieve its strategic growth objectives.

(g) **User-Generated Content**

The Company's business is based upon the contributions of citizen and freelance journalists and photographers to its platforms. The Company has screening and reporting mechanisms in place for identifying inappropriate or objectionable contributions. If these mechanisms fail to adequately identify any such contributions prior to publication, the Company may, by reason of its publication of the user-generated content, be implicated in objectionable or illegal activity which exposes it to law enforcement investigation or action, or a civil dispute. Any such occurrence may cause the Company to suffer financial loss and may lead to the Company's reputation suffering amongst users, contributors and its partners.

The Company's business also involves the licencing of its user-generated content publishing platform to its clients. The Company has moderation tools for use by client personnel to identify and moderate inappropriate or objectionable content. If these tools fail to adequately handle content upon human approval or denial actions, the Company may, by reason of its software enabling the publication of the user-generated content, be implicated in objectionable or illegal activity which exposes it to law enforcement investigation or action, or a civil dispute. Any such

occurrence may cause the Company to suffer financial loss and may lead to the Company's reputation suffering amongst its clients.

(h) **Reputational Risks**

The Company operates in an online and fast-changing environment. Negative publicity can spread quickly, whether true or false. Disgruntled users posting negative comments about the businesses in public forums may have a disproportionate effect on the Company's reputation and its ability to earn revenues and profits. Additionally, complaints by such users can lead to additional regulatory scrutiny and a consequential increased compliance burden in responding to regulatory enquiries. This could negatively impact upon the Company's profitability

(i) **Reliance on Core Information Technology and Other Systems**

The operation of the Company's platforms is dependent upon the performance, reliability and availability of its information technology and communication systems. This includes its core technologies such as computer servers and back-end processing systems. These systems may be adversely affected by a number of factors including major events such as acts of terrorism or war or a breakdown in utilities such as electricity and fibre optic cabling. Events of that nature may cause one or more of those core technologies to become unavailable. There are also internal and external factors that may adversely affect those systems and technologies such as natural disasters, misuse by employees or contractors or other technical issues. The Company's disaster recovery plans may not adequately address every potential event and its insurance policies may not cover loss or damage that the Company suffers as a result of a system failure.

Any damage to, or failure of, the Company's key systems can result in disruptions in the Company's ability to operate its various crowd-sourced news platforms and other services. Such disruptions have the potential to reduce the Company's ability to generate revenue, impact consumer service levels and damage the Company's brands. This could adversely affect the Company's ability to generate new business and cause it to suffer financial loss.

The media and communications industry is also subject to rapid and significant changes in technology and the impact of these changes on the Company and its businesses cannot be predicted. The costs associated with implementing emerging and future technology changes could be significant.

(j) **Reliance on Third Party IT Service Provision**

The Company utilises equipment, software, hosting and other services provided by third parties to maintain and deliver its Software as a Service platforms. Significant or extended disruption of the Company's platforms caused by supplied equipment, software or service failure may reduce the Company's ability to generate revenue, impact client and consumer service levels and may damage the Company's brands. This could adversely affect the Company's ability to generate new business and cause it to suffer financial loss. Any mitigation of this loss via redress from third party suppliers may not be immediately available, if at all.

(k) **Intellectual Property**

The Company has developed a system architecture, specialised technology and algorithms for its business. In particular, the Company has developed methodologies for validating content ownership and credibility, live video streaming and integration between its different platforms. The Company has also sought and received protection of certain of its intellectual property, namely trademarks which have been registered in Australia, Canada, the United States and Europe.

The laws relating to intellectual property assist to protect the Company's proprietary rights in the intellectual property relevant to the Company's businesses. However, trade mark registration, although an indicator of valid intellectual property ownership, is not indefeasible as any errors in the registration process can lead to registration being challenged or revoked. Accordingly, the Company cannot be certain that the validity, ownership or authorised use of intellectual property relevant to the Company's businesses will not be successfully challenged by third parties. In addition, there can be no guarantee that unauthorised use or copying of the Company's software, data, specialised technology or algorithms will be prevented.

(l) **Privacy and Media Law**

The environment in which the Company operates is subject to complex and evolving Australian and foreign policies, laws and regulations regarding privacy, data protection, defamation, obscene material, content regulation, intellectual property (see further above), competition, distribution of electronic contracts and other communications, protection of minors, consumer protection, taxation, online payment services and advertising and marketing standards.

Foreign data protection, privacy, and other laws and regulations are often more restrictive than those in Australia. In some cases, laws or regulations in one country may be inconsistent with, or contrary to, those of another country. In particular, the European Union (**EU**) and its member states have traditionally taken a broader view as to types of data that are subject to privacy and data protection, and have imposed greater legal obligations on companies in this regard. Data protection has been under review in the EU in recent years, with the European Privacy Directive 95/46/EC expected to be replaced in 2015 by new legislation known as the EU General Data Protection Regulation. The proposed new EU data protection regime extends the scope of the EU data protection law to all foreign companies processing data of EU residents. It provides for harmonisation of data protection regulations throughout the EU, but imposes a strict data protection compliance regime and provides for strict penalties. Privacy laws in France are particularly restrictive and make it an offence to take, record or transmit a recording or picture of a person taken without their consent (which is presumed when a recording or picture is taken openly and publicly).

The media industry in Australia, the EU and other places around the world has the potential to become subject to even higher levels of regulation by government. It is likely applicable laws and regulations will continue to change in an effort to keep up with the rapidly evolving industry. Due to their evolving nature, many of these laws and regulations are subject to uncertain interpretation. It is difficult to predict how existing and new laws and regulations will be applied to the

Company or their respective businesses. It is possible that they may be interpreted and applied in a manner that is inconsistent with current practices or detrimental to the Company.

Existing and new laws and regulations applicable to the media industry can be costly to comply with, delay or impede the development of new products and services, require changes to business practices, result in negative publicity, lead to declines in user growth or engagement, require significant time and attention of management and technical personnel and subject the Company to inquiries or investigations, claims or other remedies, including monetary penalties, or otherwise harm the Company's business.

(m) **Security Breaches**

The Company collects, stores and processes highly sensitive, highly regulated and confidential information. The provision of secure and reliable information storage and processing services is integral to the businesses and operations of the Company in the media and communications industry.

Whilst the Company follows best practice in relation to security policies, procedures, automated and manual protections, encryption systems and staff screening to minimise risks, there is no guarantee that the implementation of such precautions will be sufficient to prevent data security breaches and information being compromised or misused.

A malicious attack on the Company's systems, processes or people from external or internal sources could put the integrity and privacy of contributors' and client data and business systems used to run the Company at risk. The impact of loss or leakage of contributor, client or business data could include potential service disruption, litigation, liability to third parties, penalties imposed by government agencies under applicable laws and brand damage resulting in reduced or falling revenues. These potential losses or liabilities will be different for each jurisdiction in which the Company operates.

There is also currently an increased exposure to organisations that process personal information in the course of their commercial activities, in particular, relating to liability arising from security incidents. Although the Company is relatively small, vulnerabilities in the information security governance will require remediation in the near future.

(n) **Changes in the Nature of the Media Industry**

The Company's businesses may be affected by changes in the nature of the media industry, for example, changes to demand for different media products and services. As the Company's businesses include the publication and circulation of media in different forms, these changes may, depending on their nature and the business model at the relevant time, impact the demand for the Company's services and products and their financial performance.

(o) **Overseas Operations and Expansion**

The Company is presently headquartered in Paris and has established bureaux (i.e. local representative offices) in New York, London, Sydney, Toronto, Montreal, Toronto, Los Angeles and Paris.

Should the Company seek to expand into additional overseas markets, it may require a physical presence in those countries and an associated increase in overheads and development and marketing costs. There is the risk that the costs of doing business in that market, including the costs of establishing a new base in-country, overseas regulatory compliance and the potential duplication of running costs for the business, are such that the Company's available working capital may be adversely impacted.

(p) **Large Shareholders**

The Company has a number of shareholders with relatively large shareholdings. An expectation by the market that one or more of those shareholders may sell all or a substantial portion of its shareholding, or the actual sale of such a shareholding, could have a negative effect on the price of the Shares.

(q) **Potential Acquisitions**

As part of its overall business strategy, the Company may from time to time make acquisitions of or significant investments in companies, products or technologies. Any such future transaction would be accompanied by the risks commonly encountered in making acquisitions of companies, products or technologies.

8.3 General Risks

General economic conditions, movements in commodity prices, interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and future production activities, as well as on its ability to fund those activities.

(a) **Security Investments**

There are risks associated with any securities investment. The prices at which the Company's quoted securities trade on the Official List may fluctuate in response to a number of factors including:

- (i) the recruitment or departure of key personnel;
- (ii) actual or anticipated changes in estimates as to financial results, development timelines or recommendations by securities analysts;
- (iii) variations in the Company's financial results or those of companies that are perceived to be similar to the Company including changes caused by changes in financial accounting standards or practices or taxation rules or practices;
- (iv) announcements regarding litigation or other proceedings that involve the Company;
- (v) war or acts of terrorism or catastrophic disasters that disrupt world trade or adversely affect confidence in financial markets;
- (vi) other general economic, industry and market conditions; and
- (vii) other factors described in this Section 8.

(b) **Share Market Conditions**

The market price of the Company's quoted securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) **Liquidity Risk**

There is no guarantee that there will be an ongoing liquid market for the Shares. Accordingly, there is a risk that, should the market for the Shares become illiquid, Shareholders will be unable to realise their investment in the Company.

(d) **Economic Risk**

Factors such as inflation, currency fluctuations, interest rates and supply and demand of capital have an impact on business costs and stock market prices. The Company's operating costs, possible future revenues and future profitability can be affected by these factors which are beyond the control of the Company.

(e) **Foreign Exchange Risk**

The Company operates internationally and, presently, in five (5) major currencies. Accordingly, fluctuations in prevailing exchange rates affect the Company's profitability and financial position. For example, the Company pays a website hosting provider in US dollars. If the Australian dollar falls relative to the US dollar, those costs increase in Australian dollar terms, potentially reducing the Company's profitability.

Currently, most of the Company's revenues are in Canadian dollars and Euros and most of its costs are in Euros, Canadian dollars and Australian dollars.

However, the mix of currencies in which the Company pays its costs and earns its revenues is changing over time. As that mix changes, there may be a greater impact on profitability in Australian dollar terms.

The Company's financial statements are prepared and presented in Australian dollars, and any appreciation in the Australian dollar against other currencies in which the Company transacts may adversely affect its financial performance and position.

(f) **Insurance**

The Company will, where possible and economically practicable, endeavour to mitigate some business risks by procuring relevant insurance coverage. However, such insurance coverage may not always be available or economically justifiable and the policy provisions and exclusions may render a particular claim by the Company outside the scope of the insurance coverage.

(g) **Third Party Risks**

The operations of the Company will require the involvement of a number of third parties, including suppliers, contractors and customers. Financial failure, default or contractual noncompliance on the part of such third parties may have a material impact on the Company's operations and performance. It is not possible for the Company to predict or protect itself against all such risks.

(h) **Policies and Legislation**

The introduction of new legislation or amendments to existing legislation by governments, and the decisions of courts and tribunals, can impact adversely on the assets, operations and, ultimately, the financial performance of the Company.

Any adverse developments in political and regulatory conditions in the countries in which the Company could conduct business, could materially affect the Company's prospects. Political changes, such as changes in both monetary and fiscal policies, expropriation, methods and rates of taxation and currency exchange controls may impact the performance of the Group as a whole.

As at the date of this Prospectus, the Company is not involved in any legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company.

9.2 Continuous Disclosure Obligations

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company’s securities.

This Prospectus is a “transaction specific prospectus”. In general terms a “transaction specific prospectus” is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 3 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act, states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and

- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:

Copies of all documents lodged with the ASIC in relation to the Company can be inspected at the registered office of the Company during normal office hours.

The Company will not be issuing share certificates. The Company is a participant in CHESS, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHESS will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Shares issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

9.11 Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and management.

The Company cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

The Company have no intention to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this Prospectus, except where required by law.

These forward looking statements are subject to various risk factors that could cause our actual results to differ materially from the results expressed or anticipated in these statements. These risk factors are set out in Section 8 of this Prospectus.

By submitting an Application Form, you authorise the Company to disclose any personal information contained in your Application Form (**Personal Information**) to the Collecting Parties where necessary, for any purpose in connection with the Offers, including processing your acceptance of the Offers and complying with applicable law, the ASX Listing Rules, the ASX Settlement Operating Rules and any requirements imposed by any Public Authority.

If the Offers are successfully completed, your Personal Information may also be used from time to time and disclosed to persons inspecting the register of Shareholders, including bidders for your securities in the context of takeovers, Public Authorities, authorised securities brokers, print service providers, mail houses and the Share Registry.

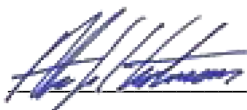

Any disclosure of Personal Information made for the above purposes will be on a confidential basis and in accordance with the Privacy Act 1988 (Cth) and all other legal requirements. If obliged to do so by law or any Public Authority, Personal Information collected from you will be passed on to third parties strictly in accordance with legal requirements. Once your Personal Information is no longer required, it will be destroyed or de-identified. As at the date of this Prospectus, the Company does not anticipate that Personal Information will be disclosed to any overseas recipient.

Access and correction requests, and any other queries regarding this privacy statement, must be made in writing to the Share Registry at the address set out in the Corporate Directory in Section 1 of this Prospectus.
