## **Drilling completed at Six Mile Hill**

Kingston Resources Limited (ASX: KSN) is pleased to provide an update regarding the collaborative Mineral Systems Drilling Program with the Geological Survey of South Australia and the Deep Exploration Technologies Cooperative Research Centre at Kingston's 100% owned Six Mile Hill Project.

The program is now complete with four holes drilled for a total of 2787.8m.

The third hole (15DDSM003) intersected rhyolites and basalts of the Gawler Range Volcanics (GRV) from surface till 262.6m. The modelled gravity anomaly was explained by the presence of dense basalts. Chlorite, hematite and carbonate rich alteration was logged throughout the hole, but only trace sulphides were observed.

The fourth hole (15DDSM004) was completed at a depth of 843.9m. The hole intersected rhyolites and basalts of the GRV. Minor visible sulphides (pyrite + chalcopyrite) were identified associated with a zone of carbonate + quartz + fluorite veining within an altered rhyolite in the interpreted lower portion of the GRV. At 437m the hole intersected a dense and magnetic dolerite and stayed in it until the end of hole.

Kingston has selected intervals from 15DDSM003 and 15DDSM004 for geochemical analysis with results due in several weeks.

Table 1: Drill hole details

HOLE ID	EASTING	NORTHING	RL	ORIENTATION	AZIMUTH	DEPTH
15DDSM003	723335	6406002	85	-90	0	262.6m
15DDSM004	717656	6408763	105	-90	0	843.9m

**GDA 94 Zone 53** 

## **Competent Persons Statement**

The information in this report that relates to Exploration Results is based on information compiled by Mr Barry Bourne, a Director of the Company. Mr Bourne is a fellow of the Australian Institute of Geoscientists; a member of the Australian Society of Exploration Geophysicists and has sufficient experience of relevance to the styles of mineralisation and the types of deposits under consideration, and activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results. Mr Bourne consents to the inclusion in the report of matters based on information in the form and context in which it appears.
