PERTH, AUSTRALIA

FOR IMMEDIATE RELEASE:

iWEBGATE APPOINTS EAS ADVISORS TO SUPPORT US STRATEGY

iWebGate Limited (ASX: IWG), is pleased to announce the appointment of EAS Advisors, LLC (“EAS”) as US corporate and strategic advisors.

EAS is a New York based investment advisory firm founded in 2008, with a strong track record of success in exposing ASX listed companies to US investors and industry partners.

Commenting on their appointment, EAS founder and principal Edward Sugar said:

“EAS is engaging with iWebGate as we believe that the Company has a technology platform that is extremely well positioned to gain considerable market share in the global IT security sector. As headline security breaches are becoming nearly daily events, we feel the growth prospects for iWebGate within and beyond Australia are tremendous and we believe we can add value to the company in pursuit of these commercial goals.

“We find the value proposition for the technology to be a compelling case for businesses given the attractive cost model and the features iWebGate’s technology offers. Furthermore, given the global relevance of the services the Company provides and its recurring revenue model, we believe it will be a company of interest to many of the investors with which we regularly interact.”

iWebGate CEO Tim Gooch commented:

“We have partnered with EAS to ensure iWebGate will be able to access US investment to accelerate our go to market strategy in Australia and the rest of the world. EAS has a strong track record in raising capital for companies such as iWebGate.

“Our technology addresses global network challenges threatening all Internet users. These problems were foreseen by the US Government, when awarding iWebGate worldwide winner of the Global Security Challenge, and revealed in more recent cyber attacks including the 2013 Target breach. Our unique software also introduces new and innovative ways to interact with cloud providers that will forever change the way many solutions are deployed across enterprise networks.

“We currently have a multi-million dollar opportunity with Telstra. Our technology is now being sold through Telstra’s channel partners to a wide variety of customers in the Australian market.

“The solutions provided by iWebGate are capable of being replicated through strategic channels in other countries. We have several other distribution opportunities where EAS can deliver significant value. Accessing capital out of the US will enable iWebGate to deploy more resources to Telstra and these other key opportunities.”

About EAS

EAS Advisors, LLC is a private, New York-based boutique investment advisory firm providing a unique service to small and mid-cap companies operating in selected industry sectors. The foundation of EAS's business is built on industry knowledge, capital markets insights and access to a deep pool of traditional and alternative sources of capital. In addition to exposure to US investors, EAS provides public and private companies with access to local industry contacts to enhance their growth and expansion. All securities in the United States are offered by EAS through Merriman Capital, Inc, a member of FINRA/SIPC.

About iWebGate

iWebGate, Limited (ASX: IWG) is a technology company providing network solutions to organizations of all sizes. iWebGate's software creates a new network communication environment out front of firewalls, analogous to a secure and collaborative reception area for all networks. To compliment this innovation, we have also created interlinking technology commanding computer devices, applications and users connect through this best practice design.

For the first time, iWebGate's software is enabling large and influential partners to deliver best of breed security and a wide range of mobility solutions as-a-Service to their customers. Our patented and multi-award winning software is currently available through the Telstra Marketplace with plans to rapidly expand offerings in the US and Europe.

iWebGate is well positioned to help many enterprises and government agencies. The worldwide cyber security and mobility market continues to grow rapidly and is expected to increase from US\$75 billion in 2015 to US\$170 billion by 2020.
