Chairman's Report and the Period in Review

On behalf of my fellow Directors, I present the 2015 Annual Report for the Company.

Significant results from the year are:

- Westoz Investment Company Limited has recorded a pre-tax loss of \$30,618,200 (2014: profit of \$28,363,432) and net loss after tax of \$19,998,524 (2014: profit of \$21,251,697).
- Directors have declared a final dividend of 4.5 cents per share fully franked (2014: 4.5 cents). An interim dividend of 4.5 cent per share fully franked was paid in February 2015 (2014: 4.5 cents).
- Total assets of the company are \$143,507,889 at 30 June 2015 (2014: \$176,446,214).
- After allowance for the total dividend of 9.0 cents per share for the financial year, net tangible assets per share (NTA) fell from \$1.295 at 30 June 2014 to \$1.050 per share at 30 June 2015. This figure is calculated by dividing the total net assets as set out in the Statement of Financial Position by the number of ordinary shares on issue as at the reporting date and is after allowance for dividends and all costs and tax on unrealised gains/losses in our investment portfolio.

For more detailed information on the investment performance of the company, I refer you to the Managers' Report on page 4.

The 2015 financial year was a difficult one for our company and the markets we are exposed to. Whilst we have been able to report a stabilization in our returns over the last 6 months, the previously reported poor performance of our portfolio in the December 2014 half resulted in an overall loss for the financial year. I remain confident that we can return to our desired levels of returns after this disappointing period.

Our activities over the year reflected a response to a significant shift in commodity prices, with a feature being the build-up in cash levels as we exited investments that no longer met our investment criteria. Having refocussed our portfolio, we are now in a position that allows us to move forward from a more stable base. Our challenge over the coming period will be to deploy our cash, which represented around a third of our assets at balance date, to achieve our objectives.

Our overriding investment strategy remains to hold a concentrated portfolio of small to mid cap ASX listed securities to generate consistent positive returns for shareholders. This allows us to consider a broad range of opportunities. It is expected that a majority of these will have a connection to Western Australia, but we continue to monitor a broader range of opportunities with some that meet our criteria being represented in our holdings.

Macro factors that influence the outlook for local opportunities will ebb and flow over time. These changes influence underlying value and market price, thereby continuing to create attractive entry and exit opportunities for us. In challenging periods in our core area of focus, we are able to consider other investments that will meet our objectives.

As shareholders would be aware, we have a policy of paying a consistent stream of dividends to shareholders. In the last year, I am pleased we have been able to continue these payments despite the lack of current period profits. We have now paid out over \$86 million in dividends since inception of the company in 2005. Future dividend levels will be set after considering the level of realised net profits after tax, retained earnings and availability of franking credits.

I encourage shareholders and other interested parties to participate in our shareholder communication program. If you have not already done so, you can register for our regular email updates at our website: www.westoz.com.au. We hope to provide useful information on our activities throughout the year and welcome feedback to enhance this.

I look forward to reporting on results as we move forward.

Yours sincerely

Jay Hughes
Non Executive Chairman

About Westoz

- Westoz Investment Company Limited is a listed investment company that focuses on producing a positive return on funds invested.
- It was formed on 11 March 2005 and raised its initial capital for investment in May 2005. As at 30 June 2015, it had \$133,175,808 of assets in its investment portfolio.
- The company has appointed Westoz Funds Management Pty Ltd as manager to oversee the investment of its portfolio of assets. The manager is a wholly owned subsidiary of Euroz Limited (ASX: EZL) a diversified wealth management company listed on the ASX.
- The investment mandate is to identify undervalued companies listed on the Australian Securities Exchange and to invest to produce a positive return. Because of the geographic location of the manager, it is anticipated that the majority of situations identified will have a connection to Western Australia and will have a market capitalisation of less than \$1 billion.
- The manager is paid a base fee of 1% per annum of funds managed. In addition, where performance exceeds 10% over a twelve month period to the end of June, a performance fee is paid to the manager.

Investment Manager's Report

Portfolio Return

The assets of the company are managed to generate a positive return regardless of the return from the broader Australian share market.

To assist in an assessment of performance, the rate of return before fees and taxes is calculated. The figure is calculated by dividing the gain (or loss) in value of the portfolio, net of external flows, by the average portfolio value over the period of measurement. Portfolio value is determined by reference to current market value of underlying investments. Monthly periods are used and then geometrically linked to arrive at an annual return. This figure is not audited.

The overall performance of the portfolio before fees and taxes on this basis over the 2015 financial year was -17.0% (2014: 21.2%). Since inception in 2005, the portfolio has generated an average geometric annual return of 12.3%.

It is the objective of the manager to produce positive investment returns over the medium to long term, thereby boosting the net asset backing per share (NTA) and allowing for the payment of dividends.

The figures presented for information regarding NTA are on a per share basis and after allowance for all realized and unrealized costs, dividends and provision is made for tax debits and credits on unrealised gains.

Over the twelve months, this number fell from \$1.295 at 30 June 2014 to \$1.050 at 30 June 2015.

At 30 June 2015, a provision for payment of 4.5 cents per share by way of dividend was made. This dividend is expected to be paid in August 2015. At 30 June 2014 provision for a 4.5 cent per share dividend was made.

Asset Allocation

Cash levels rose over the twelve month period, peaking at 48% of assets in the March quarter. A reduction in resources exposure has been the main source of the higher cash levels.

At years end, investments were held in 31 separate companies.

Outlook

As we leave the 2015 financial year, we have again encountered a volatile resources market influenced by significant movements in underlying commodity prices. These factors have influenced a wide range of the opportunities that we monitor, impacting both market price and our assessment of value.

Whilst we expect markets to remain volatile in the coming period, this in itself creates opportunities for us. With a significant cash position at balance date, we believe we are well placed to take advantage of opportunities as they arise to generate the desired level of return on our portfolio.

Directors' Report

3. Principal Activity and Nature of Operations

During the period, the principal activity of the economic entity was as an investment company.

4. Operating Results

For the period ended 30 June 2015, the company made an operating loss after tax of \$19,998,524 (2014: profit of \$21,251,697).

5. Dividends

An interim dividend of \$5,846,271 (4.5 cents per share) was paid on 24 February 2015 (2014 \$5,766,461 (4.5 cents per share)).

The Board of Directors has provided for the payment of a further dividend of \$5,816,307 (4.5 cents per share) (2014: \$5,766,461 (4.5 cents per share)) in the 30 June 2015 financial statements.

6. Review of Operations

The financial results of the company are driven by the gain or loss on its investment portfolio, which consists primarily of securities listed on the Australian Stock Exchange and short term cash deposits. Whilst the investment objective for the portfolio is to generate positive returns over the medium to long term, short term fluctuations in the broader equity market will influence results.

Apart from movements in the broader equity market, the key driver of income for the Company is the manager's ability to select appropriate investments. The majority of expenses are directly linked to the value of the portfolio managed and the level of return achieved.

For further information on the Company's operations, a Chairman's Report and Investment Managers Summary is included on pages 2 to 5 of this Annual Financial Report. This, together with the sections headed "Significant Changes in State of Affairs" and "Events Subsequent to Balance Date", provide a review of operations of the Company during the period and subsequent to reporting date.

7. Significant Changes in State of Affairs

There have been no other significant changes in the state of affairs of the company.

8. Significant Events after the Balance Date

The Company has announced a planned issue of approximately 12,925,127 Bonus Options to shareholders. These options are exercisable at \$1.05 at any time on or before 31 August 2016.

As at 14 August 2015, the All Ordinaries Accumulation index has fallen approximately 1.0% since 30 June 2015.

There has not been any other matter or circumstance that has arisen since the balance date that has affected or may significantly affect the operations of the company, the results of those operations or the state of affairs of the company in subsequent periods.

9. Likely Developments and Future Results

Future results will be driven by the outcome of the Company's investment strategy, which will in turn be influenced by the overall direction of equity markets. These returns are uncertain and will vary from year to year. The key risk to market returns will be influenced by a range of factors that cannot be predicted with any certainty and include the outlook for growth, inflation, commodity prices, interest rates, general economic conditions, natural disasters and government regulation. Market risk is managed by periodically moving into and out of equity positions.

The Chairman's Report, Directors Report and the Review of Operations contains further information on recent and likely future developments and results.

10. Directors' Interests

At the date of this report the interests of the Directors in the shares and options of the Company are:

11. Share Options

As at the date of this report the Company has 12,119,213 options on issue. The options were issued pursuant to the Bonus Issue prospectus issued on 8 July 2014 to all shareholders. The offer made a bonus issue of one option for every 10 shares held by shareholders at the record date. These options are exercisable into 12,119,213 new ordinary shares in the Company that rank equally with other ordinary shares by the payment of \$1.30 per option at any time up until expiry date of 31 August 2015.

Holders of Options will be permitted to participate in new issues of securities only following the prior exercise of the Option. An Option does not confer the right to a change in Exercise Price or a change in the number of Shares over which the Option can be exercised. In the event of any reconstruction (including consolidation, subdivision, reduction or returns) of the issued capital of the Company, the number of Options or Exercise Price or both shall be reconstructed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction.

12. Indemnification and Insurance of Directors and Officers

Westoz Investment Company Limited has made a deed of indemnity for all the Directors of the Company against all losses or liabilities incurred by each Director in their capacities as Directors of the Company. The company agreed to indemnify and keep indemnified the Director against all liabilities by the Director as a Director of the Company to the extent permitted under the Corporations Act 2001.

During the financial year, the Company paid an insurance premium in respect of a contract insuring each of the Officers of the Company. The amount of the premium is, under the terms of the insurance contract, confidential. The liabilities insured include costs and expenses that may be incurred in defending civil or criminal proceedings that may be brought against the officers in their capacity as Officers of the Company.

13. Remuneration Report (Audited)

The Board of Directors is responsible for determining and reviewing compensation arrangements for the executive team. The Board will assess the appropriateness of the nature and amount of emoluments of such officers on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high quality Board and executive team.

The company had no employees during the year ended 30 June 2015 or 30 June 2014. Details of Key Management Personnel are as follows:

	2014	55,000	-	55,000

The elements of emoluments have been determined on the basis of the cost to the Company. Emoluments of Directors are not related to the performance of the Company.

The Directors of Westoz Investment Company Limited during the period or part thereof were Mr Philip Rees, Mr Jay Hughes, Mr Dermot Woods, Mr Stephen Tucker and Mr Terry Budge.

Westoz Funds Management Pty Ltd, a company of which Messrs Rees, Woods, Tucker and Hughes are Directors provides Key Management Personnel ("KMP") services to Westoz Investment Company Limited as it has the authority for the management of the investment portfolio of Westoz Investment Company Limited. Westoz Funds Management Pty Ltd received management fees from the company for the management of its assets. A total (inclusive of performance fees where applicable) of \$1,545,874 (2014: \$5,669,633) was charged in the period for these services. No performance fee was accrued in respect of the 2015 financial year (2014: \$3,817,100). There is \$121,000 outstanding as at 30 June 2015 (2014: \$164,450).

These fees were charged in accordance with a management agreement. Management fee is calculated at 1% per annum of funds managed. A performance fee is payable where performance exceeds 10% over a twelve month period to end of June and is calculated at 20% of the performance exceeding the threshold. The performance fee is based on the above performance condition to be able to link the performance of the company to the services provided by the fund manager.

No amount is paid by Westoz Investment Company Limited directly to the Directors of Westoz Funds Management Pty Ltd.

Euroz Securities Limited, a company of which Mr Hughes is a Director received brokerage fees for transactions undertaken by the company in respect of its investments. An amount of \$652,493 was paid in the period (2014: \$744,954) as brokerage to Euroz Securities Limited. There is \$5,743 outstanding as at 30 June 2015 (2014: nil).

The above transactions were entered into on normal commercial terms.

Directors' Report

13. Remuneration Report (Audited) (cont'd)

The short term incentive provided by the performance fee is payable once a nominated level of profitability is achieved in a financial year. The level of profitability is ultimately determined by the investment return on funds invested and is reflected in the earnings per share figure. The following table shows the link between company performance and shareholder wealth over the last 5 years:

FINANCIAL YEAR ENDING JUNE 30	EPS (CENTS)	SHARE PRICE AT BALANCE DATE (CENTS)
2011	14.8	105.5
2012	-5.5	94.0
2013	6.2	106.5
2014	16.6	132.0
2015	-15.5	92.5

There are no long term incentives payable.

(End of Remuneration Report)

14. Corporate Governance

In recognising the need for the highest standards of corporate behaviour and accountability, the Directors of Westoz Investment Company Limited support and have adopted a corporate governance plan. 15. Indemnification of Auditors

To the extent permitted by law, the Company has agreed to indemnify its auditors, Ernst & Young, as part of the terms of its audit engagement agreement against claims by third parties arising from the audit (for an unspecified amount). No payment has been made to indemnify Ernst & Young during or since the financial year.

16. Auditor Independence and Non Audit Services

The auditor's independence declaration under section 307C of the Corporations Act 2001 is included on page 13 and forms part of the Westoz Investment Company Limited's report for the year ended 30 June 2015.

Non-audit Services:

Ernst & Young received or are due to receive the following amounts for the provision of non-audit services:

	\$
Tax Compliance	15,000

The Directors are satisfied the provision of non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001. The nature and scope of each type of non-audit service provided means that auditor independence was not compromised.

Signed for and on behalf of the Directors in accordance with a resolution of the Board.

(b) Statement of Compliance (cont'd)

Applicable Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet effective have not been adopted for the annual reporting period ended 30 June 2015. These are included in the table below.

REFERENCE	TITLE	SUMMARY	APPLICATION DATE OF STANDARD	APPLICATION DATE FOR COMPANY
AASB 9	<i>Financial Instruments</i>	<p>AASB 9 (December 2014) is a new Principal standard which replaces AASB 139. This new Principal version supersedes AASB 9 issued in December 2009 (as amended) and AASB 9 (issued in December 2010) and includes a model for classification and measurement, a single, forward-looking 'expected loss' impairment model and a substantially-reformed approach to hedge accounting.</p> <p>AASB 9 is effective for annual periods beginning on or after 1 January 2018. However, the Standard is available for early application. The own credit changes can be early applied in isolation without otherwise changing the accounting for financial instruments.</p> <p>The final version of AASB 9 introduces a new expected-loss impairment model that will require more timely recognition of expected credit losses. Specifically, the new Standard requires entities to account for expected credit losses from when financial instruments are first recognised and to recognise full lifetime expected losses on a more timely basis.</p> <p>Amendments to AASB 9 (December 2009 & 2010 editions and AASB 2013-9) issued in December 2013 included the new hedge accounting requirements, including changes to hedge effectiveness testing, treatment of hedging costs, risk components that can be hedged and disclosures.</p> <p>AASB 9 includes requirements for a simpler approach for classification and measurement of financial assets compared with the requirements of AASB 139.</p> <p>The main changes are described below.</p> <ol style="list-style-type: none"> Financial assets that are debt instruments will be classified based on (1) the objective of the entity's business model for managing the financial assets; (2) the characteristics of the contractual cash flows. Allows an irrevocable election on initial recognition to present gains and losses on investments in equity instruments that are not held for trading in other comprehensive income. Dividends in respect of these investments that are a return on investment can be recognised in profit or loss and there is no impairment or recycling on disposal of the instrument. Financial assets can be designated and measured at fair value through profit or loss at initial recognition if doing so eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities, or recognising the gains and losses on them, on different bases. 	1 January 2018	The company is in the process of determining the impact of the amendments

(c) Financial assets

(I) INITIAL RECOGNITION AND MEASUREMENT

Financial assets within the scope of AASB 139 are classified as financial assets at fair value through profit or loss or as loans and receivables as appropriate. The Company determines the classification of its financial assets at initial recognition.

All financial assets are recognised initially at fair value plus transaction costs, except in the case of financial assets recorded at fair value through profit or loss.

(II) SUBSEQUENT MEASUREMENT

The subsequent measurement of financial assets depends on their classification as described below:

FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS.

Financial assets at fair value through profit or loss include financial assets designated upon initial recognition at fair value through profit or loss.

Financial assets designated upon initial recognition at fair value through profit and loss are designated at their initial recognition date only if the criteria under AASB 139 are satisfied.

All financial assets designated as fair value through profit or loss are equity investments that are managed through making purchase and sales decisions based on their fair value in accordance with the Company's investment strategies. The financial information about these financial assets is provided internally on that basis to the Investment Manager and the Board of Directors.

For investments that are actively traded in organised financial markets, fair value is determined by reference to the Stock Exchange quoted market bid prices at the close of business on the statement of financial position date, without any deduction for transaction costs.

When the fair value of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

The judgments include considerations of liquidity and model inputs such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. The models are calibrated regularly and tested for validity using prices from any observable current market transactions in the same instrument (without modification or repackaging) or based on any available observable market data.

Notes to the Financial Statements

2. Summary of Significant Accounting Policies (cont'd)

(c) Financial assets (cont'd)

(II) SUBSEQUENT MEASUREMENT (CONT'D)

Gains and losses on investments at fair value through profit and loss are recognised in the profit or loss.

Purchases and sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place are recognised on the trade date i.e. the date that the Company commits to purchase the asset.

Changes in the fair value of investments – net gains or losses on investments designated as at fair value through profit or loss are calculated as the difference between the fair value at sale or the fair value at reporting date and the fair value at the previous valuation point. This includes both realised and unrealised gains and losses but does not include dividend or interest income.

(III) DE-RECOGNITION OF FINANCIAL ASSETS

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired;
- The Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party lender under a “pass-through” arrangement; or
- The Company has transferred its rights to receive cash flows from the asset and either has transferred substantially all the risks and rewards of the asset, or has transferred control of the asset.

(d) Cash and cash equivalents

Cash and cash equivalents in the Statement of Financial Position comprise cash at bank and short term deposits, including bank bills with a maturity of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

For the purposes of the Cash Flow Statement, cash and cash equivalents consists of cash and cash equivalents as defined above.

(e) Income Tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the current period's taxable income. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Deferred income tax is recognised on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognised for all temporary differences except where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax assets and unused tax losses can be utilised except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Unrecognised deferred tax assets are re-assessed at each balance date and are recognised to the extent that it has become probable that future taxable profit will allow all or part of the deferred income tax to be utilised.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or liability is settled, based on tax rate (and tax laws) that have been enacted or substantively enacted at the balance date.

Income taxes relating to items recognised directly in other comprehensive income are recognised in other comprehensive income and not in profit or loss.

Notes to the Financial Statements

2. Summary of Significant Accounting Policies (cont'd)

(f) Other Taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- where the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority, are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to the taxation authority.

(g) Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes. The following specific recognition criteria must also be met before revenue is recognised:

Interest - revenue is recognised as interest accrues using the effective interest rate method which is the rate that exactly discounts estimated future cash flows through the expected life of the financial investment to the net carrying value of the financial asset.

Dividend- revenue is recognised when the Company's right to receive the payment is established. This is taken to be the date the share is quoted ex-dividend.

(h) Trade and Other Payables

Liabilities for trade creditors and other amounts are carried at amortised cost which is the fair value of the consideration to be paid on goods and services received, whether or not billed to the entity. They represent liabilities for goods and services provided to the company prior to the end of the financial year that are unpaid and arise when the company is obliged to make future payments in respect of the purchase of these goods and services.

Payables include outstanding settlements on the purchase of investments and dividends payable. The carrying period is dictated by market conditions and generally less than 30 days.

Payables to related parties are carried at the principal amount. Interest, when charged by the lender, is recognised as an expense on an accrual basis.

(i) Contributed Equity

Ordinary share capital is recognised at the fair value of the consideration received by the company and is classified as equity.

Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction of the share proceeds received.

(j) Earnings Per Share

Basic earnings per share (EPS) is calculated as net profit attributed to ordinary equity holders divided by the weighted average number of ordinary shares outstanding during the period adjusted for any bonus element. Diluted earnings per share is calculated as net profit attributable to ordinary equity holders, adjusted for:

- costs of servicing equity (other than dividends);
- the after tax effect of dividends and interest associated with dilutive potential ordinary shares that have been recognised; and
- other non-discretionary changes in revenues or expenses during the period that would result from the dilution of potential ordinary shares;
- divided by the weighted average number of ordinary shares and dilutive potential ordinary shares, adjusted for any bonus element.

(k) Trade and other receivables

Receivables are recognised at fair value and subsequently measured at amortised cost using the effective interest rate method, less any allowance for uncollectible debts. The collectability of receivables is reviewed on an ongoing basis. An allowance for doubtful debts is raised when there is objective evidence that the Company will not be able to collect its debts. Bad debts are written off when identified. Amounts are normally received within 30 days of being recorded as receivable.

2. Summary of Significant Accounting Policies (cont'd)

(l) Dividends

Provision is made for the amount of any dividend declared by the Directors on or before the end of the financial year, but not distributed at balance date.

(m) Performance Fees

Performance fees are calculated in accordance with contractual arrangements and are payable in the year in which the returns are generated.

(n) Due to and from brokers

Amounts due to brokers are payables for securities purchased (in a regular way transaction) that have been contracted for but not yet delivered on the reporting date. Refer to the accounting policy for 'trade and other payables' for recognition and measurement of these amounts.

Amounts due from brokers include margin accounts and receivables for securities sold (in a regular way transaction) that have been contracted for but not yet delivered on the reporting date. Refer to accounting policy for 'trade and other receivables' for recognition and measurement of these amounts.

(o) Significant Accounting Judgements, Estimates and Assumptions

TAXES

Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Deferred tax assets relate to unrealised losses on investments in financial assets and recognised tax losses.

Future taxable profits depend on the success of the Company's investment strategy which in turn will be influenced by the overall direction of equity markets. The markets are influenced by a number of factors such as outlook for growth, inflation, commodity prices, interest rates, general economic conditions, natural disasters & government regulation. Management has estimated future taxable profits based on an analysis that historic returns (per annum, since inception) on the investment portfolio of Westoz Investment Company Limited. Market estimates of long term Australian equity market returns are anticipated to be higher than the return that will be required to be generated by Westoz Investment Company Limited in order to utilise the deferred tax asset. Changes in assumptions & estimates may affect the ability to recognise deferred tax assets.

There are no other significant accounting judgments, estimates and assumptions during the financial year.

3. Segment Information

For management purposes, the Company is organised into one operating segment, which invests in

equity securities on the Australian Stock Exchange. All of the Company's activities are interrelated,

and each activity is dependent on the others. Accordingly, all significant operating decisions are based

upon analysis of the Company as one segment. The financial results from this segment are equivalent to the financial statements of the Company as a whole.

The company operated in one geographical area being Australia.

Net realised (loss) / gain on disposal of investments – listed equities	(9,586,103)	9,663,498
Net unrealised (loss) / gain on investments – listed equities	(25,304,532)	18,323,648
	(34,890,635)	27,987,146

The total number of contract notes that were issued for transactions during the financial year was 828 (2014: 632). The total brokerage paid on these contract notes was \$701,210 (2014: \$806,666).

5. Fair Value of Financial Instruments

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The following table shows financial instruments recorded at fair value, analysed between those whose fair value is based on quoted market prices, those involving valuation techniques where model inputs are observable in the market and those where the valuation technique involves the use of non-market observable inputs.

30 JUNE 2015				
	VALUED AT QUOTED MARKET PRICE (LEVEL 1)	VALUATION TECHNIQUE MARKET OBSERVABLE INPUTS (LEVEL 2)	VALUATION TECHNIQUE NON - MARKET OBSERVABLE INPUTS (LEVEL 3)	TOTAL

	141,049,505	-	-	141,049,505

The level in which instruments are classified in the hierarchy is based on the lowest level input that is significant to the fair value measurement in its entirety. Assessment of the significance of an input requires judgement after considering factors specific to the instrument.

The fair value of listed equity is based on quoted market prices at the reporting date (bid price for long positions), without any deduction for transaction costs.

(c) Terms and conditions of contributed equity

The Company does not have authorised capital nor par value in respect of its issued capital.

Ordinary fully paid shares have the right to receive dividends as declared and, in the event of winding up the Company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on shares held.

Ordinary fully paid shares entitle their holder to one vote, either in person or by proxy, at a meeting of the Company.

(d) Options

At balance date there were 12,119,213 options outstanding. The options were issued pursuant to the Bonus Issue prospectus issued on 8 July 2014 to all shareholders. The offer made a bonus issue of one Option for every 10 Shares held by shareholders at the record date. These options are exercisable into 12,119,213 new ordinary shares in the Company that rank equally with other ordinary shares by the payment of \$1.30 per option at any time up until expiry date of 31 August 2015.

Holders of Options will be permitted to participate in new issues of securities only following the prior exercise of the Option. An Option does not confer the right to a change in Exercise Price or a change in the number of Shares over which the Option can be exercised. In the event of any reconstruction (including consolidation, subdivision, reduction or returns) of the issued capital of the Company, the number of Options or Exercise Price or both shall be reconstructed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction.

(e) Capital Management

For the purpose of the Company's capital management, capital includes issued equity share capital, accumulated losses and profit reserve.

The primary objective of the Company's capital management is to produce positive return on funds, regardless of the general direction of the listed share market and that is consistent with acceptable risk parameters in order to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

As far as possible, the Company intends to pay out a consistent stream of dividends to investors, having regard to availability of franking credits and the balance in the profit reserve.

The company was ungeared at year end and not subject to any externally imposed capital requirement.

Remuneration of Directors and Executives

The Board of Directors is responsible for determining and reviewing compensation arrangements for the executive team. The Board will assess the appropriateness of the nature and amount of emoluments of such officers on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high quality Board and executive team.

Mr Budge and Mr Tucker are the only paid Directors of the Company in the financial year. The total remuneration payable for the financial period is \$109,788 (2014: \$55,000) of which \$105,035 was a short term benefit (2014: \$55,000) and \$4,753 was post-employment benefit (2014:nil).

Notes to the Financial Statements

15. Related Party Disclosure (Cont'd)

(b) Transactions with Directors or Director Related Entities

The Directors of Westoz Investment Company Limited during the period were Mr Philip Rees, Mr Jay Hughes, Mr Dermot Woods, Mr Stephen Tucker and Mr Terry Budge.

Westoz Funds Management Pty Ltd, a company of which Messrs Rees, Woods, Tucker and Hughes were Directors provides Key Management Personnel ("KMP") services to Westoz Investment Company Limited as it has the authority for the management of the investment portfolio of Westoz Investment Company Limited. Westoz Funds Management Pty Ltd received management fees from the company for the management of its assets. A total (inclusive of performance fees where applicable) of \$1,545,874 (2014: \$5,669,663) was charged in the period for these services. No performance fee was accrued in respect of the period (2014: \$3,817,100). There is \$121,000 outstanding as at 30 June 2015 (2014: \$164,500).

These fees were charged in accordance with a management agreement. Management fee is calculated at 1% per annum of funds managed. A performance fee is payable where performance exceeds 10% over a twelve month period to end of June and is calculated at 20% of the performance exceeding the threshold.

No amount is paid by Westoz Investment Company Limited directly to the Directors of Westoz Funds Management Pty Ltd.

Euroz Securities Limited, a company of which Mr Hughes was a Director received fees for brokerage on transactions undertaken by the company in respect of its investments. An amount of \$652,493 was paid in the period (2014: \$744,954) as brokerage to Euroz Securities Limited. There is \$5,743 outstanding as at 30 June 2015 (2014: \$3,787). Euroz Securities also provides nominee and custodial services for the company. No fees were paid in relation to these services in the period (2014: nil).

The above transactions were entered into on normal commercial terms.

(c) Ultimate Parent

Westoz Investment Company Limited is the ultimate Australian parent company.

(d) Other Related Party Transactions

There are no other related party transactions other than those discussed above.

16. Earnings Per Share

Basic earnings per share amounts are calculated by dividing net profit for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net profit attributable to ordinary equity holders of the parent (after adjusting for interest and dividends in relation to dilutive potential ordinary shares) by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

The following reflects the income and share data used in the basic and diluted earnings per share computations:

	15	14
	\$	\$
Net profit/(loss) attributable to ordinary equity holders of the company used in calculating basic earnings per share and diluted earnings per share	(19,998,524)	21,251,697

At balance date, no financing facilities had been negotiated and none were available.

Notes to the Financial Statements

20. Financial Risk Management Objectives and Policies

Risks arising from holding financial instruments are inherent in the Company's activities, and are managed through a process of ongoing identification, measurement and monitoring. The Company is exposed to credit risk, liquidity risk and market risk.

The Company's principal financial instruments comprise listed equities, cash, short term deposits and outstanding sale and purchase settlements. The Company has other financial instruments such as trade creditors and distributions payable which arise directly from its operations. The Company may also transact in other financial instruments, including derivatives, to achieve its target rate of return on assets. No derivatives are held at 30 June 2015.

The Investment Manager is responsible for identifying and controlling the risks that arise from these financial instruments. The Company has an established investment policy in place. Information about the total fair value of financial instruments exposed to risk, as well as compliance with established investment policy, is monitored by the Investment Manager.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. This risk is controlled by the Company investing in financial instruments, which in normal market conditions can be easily liquidated. In addition, the Company maintains sufficient cash and cash equivalents to meet normal operating requirements.

Maturity analysis for financial liabilities

Financial liabilities of the Company comprise trade, other payables and distribution payable, which contractually mature within 30 days.

Credit Risk

Credit risk represents the risk that the counterparty to the financial instrument will fail to discharge an obligation and cause the Company to incur a financial loss. The company's maximum credit exposure is the carrying amounts in the statement of financial position. The Company holds financial instruments with credit worthy third parties.

At 30 June 2015, the Company held significant equities, cash balance and other current receivables in relation to outstanding sales settlements. Cash deposits were held with an institution covered under the Banking Act 1959 with a rating from Standard & Poors of AA- (long term) and A-1+ (short term). Listed equities were held under a nominee arrangement with Euroz Securities Limited which operates and maintains required prudential matters under an Australian Financial Services Licence. The Company has no past due or impaired debtors as at 30 June 2015.

Market Risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates and equity prices. The Company has delegated the management of these risks to Westoz Funds Management Pty Ltd (AFSL No 285607) who has expertise in the management of such risk.

The following risk control features are in place:

- No one stock will represent more than 20% of the total portfolio value at the time of acquisition;
- The portfolio consists of between 10 and 25 securities, although more or less may be held depending on the number of securities identified that are expected to meet the performance expectations;
- Where suitable stocks cannot be identified, the portfolio may invest in cash. Whilst unlikely over the medium term, the portfolio may consist from time to time of significant cash deposits;
- Any short positions will not represent more than 20% of the total portfolio value; and
- Leverage may be employed in the Portfolio, but total exposure will not exceed 120% of the portfolio value.

Any breach of these risk control measures will be reported to the Company by the Manager and the Company will determine the appropriate action to remedy the breach.

Interest Rate Risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair value of financial instruments.

The Company's exposure to market risk for changes to interest rate risk relates primarily to its earnings on cash and short term deposits. The total cash balance at 30 June 2015 was \$45,675,051 (2014: \$34,615,016). The Company manages interest rate risk by ensuring that cash balances are always deposited in interest-bearing accounts that provide competitive interest rates.

As at 30 June 2015, cash deposits of \$45,675,051 (2014: \$34,615,016) were held at call. No interest was recorded as a receivable (2014: \$nil).

Notes to the Financial Statements

20. Financial Risk Management Objectives and Policies (Cont'd)

Interest Rate Risk (cont'd)

The following table demonstrates the sensitivity of the Company's Statement of Comprehensive Income to a reasonably possible change in interest rates, with all other variables constant. The change in basis points is derived from a review of historical movements and management's judgement on future trends. The analysis is performed on the same basis for 2014.

		2015		2015	
CHANGE IN BASIS POINTS		EFFECT ON PRE TAX PROFIT (\$)		EFFECT ON EQUITY INCLUDING RETAINED EARNINGS (\$)	
INCREASE	DECREASE	INCREASE	DECREASE	DECREASE	INCREASE

		2014		2014	
CHANGE IN BASIS POINTS		EFFECT ON PRE TAX PROFIT (\$)		EFFECT ON EQUITY INCLUDING RETAINED EARNINGS (\$)	
INCREASE	DECREASE	INCREASE	DECREASE	INCREASE	DECREASE
50	50	173,000	(173,000)	121,100	(121,100)

Equity Price Risk

Equity price risk is the risk that the fair value of equities decreases as a result of changes in market prices, whether those changes are caused by factors specific to the individual stock or factors affecting all instruments in the market. Equity price risk arises from the Company's investment portfolio.

The effect on the statement of comprehensive income due to a reasonably possible change in market factors, as represented by the equity indices, with all other factors held constant and assuming the Company's equity portfolio moves in direct concert with the equity indices, is indicated in the table below. The change in index level is derived from a review of historical movements. The analysis is performed on the same basis for 2014.

INDEX	CHANGE IN INDEX	2015	2015
		EFFECT ON PRE TAX PROFIT (\$)	EFFECT ON EQUITY INCLUDING RETAINED EARNINGS (\$)
ASX Small Ordinaries Index	Increase 10%/ (Decrease 10%)	8,920,000/(8,920,000)	6,244,000/(6,244,000)

INDEX	CHANGE IN INDEX	2014	2014
		EFFECT ON PRE TAX PROFIT (\$)	EFFECT ON EQUITY INCLUDING RETAINED EARNINGS (\$)

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal controls as the directors determine are necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 2, the directors also state, in accordance with Accounting Standard AASB 101 Presentation of Financial Statements, that the financial statements comply with International Financial Reporting Standards.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. Those standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance about whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the entity's preparation of the financial report that gives a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit we have complied with the independence requirements of the *Corporations Act 2001*. We have given to the directors of the company a written Auditor's Independence Declaration, a copy of which is included in the directors' report.
