QUARTERLY REPORT AND APPENDIX 5B FOR THE QUARTER ENDED 30 SEPTEMBER 2015

OPERATIONS

Garatau Project

The Garatau Project consists of three contiguous properties Garatouw 282KT, Hoepakrantz 291KT and De Kom 252KT in Limpopo Province, South Africa. To date the project has an independently estimated total resource of 43.689 million ounces (Moz) of 3 PGE + Au (20.51 Moz from Hoepakrantz, 21.78 Moz from Garatouw and 1.40 Moz from De Kom). A technical feasibility and commercial viability of extracting these mineral resources has been demonstrated by the delivered definitive feasibility study. A summary of the Garatau Mineral Resource Statement is given in Table 1 below.

The company has a Mining Right over the Garatau Project area, executed in January 2014.

The record of decision on the integrated environmental authorisation and waste management license by the Department of Environmental Affairs is imminent. The record of decision on the water use licence by the Department of Water and Sanitation is also pending.

The company also received a feasibility cost estimate from ESKOM, the national power utility, for delivery of an 80MVA service to the Garatau project for the mine operation. ESKOM is busy with environmental authorisations for the Garatau grid power project. This will pave way for lands and rights, and surveying processes to be completed before a budget quotation is finalised.

* The widths are intended mining widths, and the estimated resources are thus *mineable* resources, and not *in situ* resources.

** Geological loss of between 17% and 20% applied to tonnages for recoverable ounces – loss estimates are based on the few disturbances observed in borehole intersections and on geophysical observations.

Notes

The mineral resources have been prepared and compiled under the guidance of Competent Persons who are registered with the Natural Sciences Institute of South Africa (SACNASP), to comply with the South African Mineral Resources Code (SAMREC) and the Joint Ore Reserves Committee Code (JORC Code). The SAMREC Code and the SACNASP are officially recognised on a reciprocal basis by the Australian Institute of Mining and Metallurgy (AusIMM).

The following Competent Persons with the appropriate qualifications and experience have been involved in the reporting of the mineral resources and have given their consent to the inclusion in this report of the matters based on their information in the form and context in which it appears:

K Lomberg (Garatouw property UG2, De Kom property)

D Subramani (Garatouw farm Merensky Reef)

C Lemmer (Hoepakrantz farm UG2)

D MacGregor (Hoepakrantz farm Merensky Reef)

Kenneth Lomberg is employed as a consultant of Coffey Mining, a consultant to the Company and is a member of the South African Council for Natural Scientific Professions at the time of estimating these resources.

Desmond Subramani is employed by Caracal Creek International Consulting, a consultant to the Company and is a member of the South African Council for Natural Scientific Professions at the time of estimating these resources.

Carina Lemmer is employed as a consultant of Geological and Geostatistical Services, a consultant to the Company and is a member of the South African Council for Natural Scientific Professions at the time of estimating these resources.

Duncan MacGregor is employed by Theo Pegram & Associates (Pty) Ltd as a consultant to the Company and is a member of the South African Council for Natural Scientific Professions and the Australasian Institute of Mining and Metallurgy.

All of the above have sufficient experience with the style of mineralisation and type of deposit under consideration and to the activity which is undertaken to be qualified as a Competent Person as defined in the 2012 edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.

Pilanesberg Project

The project consists of two properties, Ruighoek and Rooderand, both located on the north-western rim of the Pilanesberg National Park, which are advanced stage exploration projects. A renewed converted prospecting right has been issued on this project.

The Rooderand project has been sold to JSE listed Chrometco LTD (JSE: CMO). Under the agreement, Nkwe would receive a total of 45 million shares in Chrometco in two tranches ñ effectively holding a 16% stake in Chrometco. The regulatory Section 102 approval Consent to transfer the rights to Chrometco has now been granted by the Department of Mineral resources.

The Nkwe Chrometco transaction is now completed and Chrometco is finalising the issuing of the remaining 35 million shares to Nkwe.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
