Canberra Smart Parking Project

Smart Parking Ltd (ASX: SPZ) (**Company**) advises that it has won the tender and entered into a contract with the Australian Capital Territory government (the **Territory**) for a fully paid 12 month car parking sensor trial in Canberra.

The trial involves the installation of 460 sensors and associated technology in both on street and off-street parking environments. On-street sensors will be installed to serve a range of parking requirements, including free but time limited, pay and display and disabled permit parking bays.

As with the Company's installation in Westminster, London, the Territory will be utilising real-time information from the bay sensing technology to provide motorists with a smartphone application to show availability of parking spaces in Canberra.

The Company looks forward to working closely with the Territory to improve efficiencies and the motorist's experience in Canberra.

Yours faithfully
