## Director Funding

Enerji Ltd (ASX:ERJ) ('Enerji' or the 'Company') advises that two non-executive directors, Mr Rod Philips and Mr John Dekker, have each provided loan funding of \$50,000 to the Company to provide for sufficient flexibility to finalise certain fund raising initiatives currently being considered.

The loans are interest free with no set date for repayment.

### **Enerji Limited (ASX: ERJ) – [www.enerji.com.au](http://www.enerji.com.au)**

Enerji Ltd is a thermal energy company that takes 'waste' heat from power generation and industrial processes and turns it into zero emission electricity. This reduces electricity consumption from the grid or the consumption of fuel for power generation. The outcome is a reduction in operating costs and carbon emissions.

Enerji has made considerable investment in its unique Accretive Thermal Energy Node (ATEN) technology, a modular toolkit for collecting and converting thermal energy from a variety of sources. This allows the company to utilise 'low-grade' as well as 'high-grade' waste heat, and combine multiple heat sources with an overall accretive output.

Enerji has developed ATEN systems for use in various applications.
