

# ASX Announcement

14 December 2015

## Mulga Rock Project – Public Environmental Review Released

Vimy Resources Limited (Vimy; ASX: VMY) is pleased to advise that it has today released the Public Environmental Review (PER) for its Mulga Rock Project. Copies of this PER can be obtained via the Vimy website: [www.vimyresources.com.au](http://www.vimyresources.com.au). Hard copies can be obtained by written request to Vimy.

Vimy's Environmental Scoping Document (ESD) was approved on 26 February 2015. However following Vimy's successful Scoping Study which was announced to the ASX on 6 May 2015 it was determined that the life of the Project was likely to be longer than had been initially believed when the ESD was prepared and that it would be necessary to amend Vimy's proposal to reflect the longer duration associated with the proposal and the larger clearance area.

Vimy applied for approval under section 43A of the *Environmental Protection Act 1986* (EP Act) to change its proposal in a manner that was unlikely to significantly increase any impact on the environment. Vimy received approval for this s.43A request from the Chairman of the EPA on 4 December 2015.

Vimy also requested a variation to its referred action under section 156A of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act). Vimy received acceptance of this request from the delegate of the Minister in accordance with s.156B of the EPBC Act on 11 December 2015.

Vimy's PER document (Mulga Rock Uranium Project; Assessment No.1979), which had been revised to reflect the approved changes to the proposal under s.43A of the EP Act, was approved on 4 December 2015 for release for a twelve week public review period starting on 14 December 2015 and ending on 7 March 2016. Comments on this proposal should be sent to the EPA; the EPA prefers submissions to be made at <https://consultation@epa.wa.gov.au>

## About Vimy

Vimy Resources Limited (**ASX: VMY**) is a Perth-based resource development company. Vimy's primary focus is the development of the Mulga Rock Project, one of Australia's largest undeveloped uranium resources which is located 240km ENE of Kalgoorlie in the Great Victoria Desert of Western Australia.

The Project will have the capacity to produce 1,360 tonnes per annum of uranium oxide for up to seventeen years. The Project is expected to result in the creation of approximately 490 new jobs in Western Australia and to create payments of around A\$19m per year to the State government in the form of royalty payments and payroll tax. The amount of uranium produced if used in nuclear reactors to displace coal fired electricity would offset more than 50 million tonnes of carbon dioxide equivalent emissions which is around 10% of Australis's total greenhouse gas emissions.
