For immediate release – January 21, 2016

Digimatic to initiate investment in Global Expert Team

HIGHLIGHTS:

- Digimatic to invest US\$1,000,000 in Global Expert Team Pte Ltd ('GET'), subject to satisfactory due diligence.
- Delivers expanded global sales footprint for Digimatic and access to R&D team and labs in SE Asia and experienced system integration team.

Digimatic Group Ltd (**ASX:DMC**) (the "Company" or "DMC"), via Digimatic Ventures (the merger and acquisition arm of the Company), is pleased to advise that it has entered into a binding term sheet to acquire 25% of Global Expert Team Pte Ltd ("GET") for US\$1,000,000.

GET is a Singapore based company with two key business units being Systems Integration and Cyber Intelligence.

Netsis Technology Pte Ltd ("Netsis") is the systems integration arm of GET and has been operating since 2002. Netsis is a group of IT professionals experienced in delivering technologies such as Core Infrastructure, Security, Caching, DNS & Email Systems, Deep Packet Inspection, OSS/BSS, Wired & WiMax Access and Data Center build out. Their customers range from small-medium businesses, multi-national corporations and internet service providers. Products and services offered by Netsis include system integration (including data migration, server and storage migration and technical support), managed services (for businesses looking for cost-effective and efficient operations), cloud services (aimed at organisations that have no computer/IT service support), enterprise solutions (such as wireless solutions, routing, video conferencing and software asset management) and network security.

Expert Team Pte Ltd ("Expert Team") is the Cyber Intelligence arm of GET, has been operating since 2012 in the South East Asian region with rapid growth. Products and services focus on cyber security, such as threat protection solutions, content monitoring and data leakage prevention. Their customers include large enterprise, telecom, public sector and law enforcement.

The proposed investment in GET will provide key synergies to DMC by leveraging on the strong research and development capabilities of GET which has labs in Singapore, Kuala Lumpur and Taiwan as well as the global sales and engineering presence of GET in five continents.

The Company expects that the extensive experience of the sales and engineering team at GET will provide significant value add to the current DMC e-commerce offerings by providing a turn-key e-commerce hardware solution to complement the DMC e-commerce application and integration suite offered by Digimatic Solutions, along with future integrated cyber security offerings. This will allow Digimatic Solutions and GET to extend their reach into new markets with a stronger solution offering to a combined client base.

The investment is subject to completion of due diligence by DMC, which it expects to complete shortly. Core due diligence is complete with no issues identified to date.

Digimatic Executive Director Hui Jie Lim commented *"We will be extremely pleased to take a meaningful stake in Global Expert Team. We expect the synergies of our companies will add significant value for both our customers and our shareholders. We look forward to working with the GET and integrating our respective teams, solutions and product offerings."*
