

## LWP TECHNOLOGIES TO HOST AUSTRALIAN ROADSHOW

ASX ANNOUNCEMENT

21 January 2016

LWP Technologies Limited (ASX: LWP) (LWP, the Company) is pleased to announce it will host an Australian Roadshow in major Australian cities in February to provide an update on the Company's progress and its commercialisation plans.

LWP is developing and commercialising a disruptive fly-ash based ceramic proppant for use in hydraulic fracturing (fracking) of oil and gas wells globally. Proppants are a major cost component in the fracking process and represent a multi-billion dollar global market annually. The company is seeking to commercialise its proppant as a cost effective, superior alternative to bauxite and clay based proppants, currently widely used in fracking operations.

LWP's Australian Roadshow will be held in Brisbane, Melbourne, Sydney, Adelaide and Perth in the week commencing, Monday 1 February.

**Details of dates and venues are provided below.**

<b>Brisbane</b>	<b>Monday, 1st February</b> Raffles Room, Stamford Plaza, Cnr Edward & Margaret Sts, Brisbane 12.00noon – 2.00pm local time
<b>Melbourne</b>	<b>Tuesday, 2nd<sup>h</sup> February</b> CQ Melbourne, 113 Queen St, Melbourne 12.00noon – 2.00pm local time
<b>Sydney</b>	<b>Wednesday, 3rd February</b> Lady Fairfax Room, Radisson Blu Hotel, 27 O'Connell St, Sydney 12.00noon – 2.00pm local time
<b>Adelaide</b>	<b>Thursday, 4<sup>th</sup> February</b> Hilton Hotel, 233 Victoria Square, Adelaide 12.00noon – 2.00pm local time
<b>Perth</b>	<b>Friday, 5<sup>th</sup> February</b> The George, 216 St Georges Tce, Perth 10.00am – 12.00noon local time

**Canapes and refreshments provided**

To confirm your attendance at LWP's Australian roadshow, please RSVP to Jenny Thompson by Wednesday 27<sup>th</sup> January at [j.thompson@lwptech.com](mailto:j.thompson@lwptech.com) or on 0427 237 094 and **nominate which city you will be attending.**

**About LWP Technologies**

LWP Technologies Limited (LWP) is an Australian oil and gas technology company focused on commercialising next generation, fly-ash based, proppants for use in hydraulic fracturing (fracking) of oil and gas wells globally. LWP is seeking to commercialise its proppants as a cost effective, superior alternative to bauxite and clay based ceramic proppants, typically used in fracking operations currently. The Company commenced proppant production from its pilot scale proppant manufacturing plant in Queensland, Australia, in Q3, 2015. LWP plans to seek joint venture partners and/or licensing agreements to commercialise its proppant product, and deliver significant returns to shareholders.

**About Proppants**

Proppants are a sand-like commodity used to 'prop' open fractures in shale rocks which allows oil and gas to flow. Proppants are often the single largest cost item in the fracking process and represent a multi-billion dollar global market annually. Traditional ceramic proppants are made from clay and/or bauxite.

LWP Technologies ceramic proppants are majority manufactured from fly-ash, a by-product of coal fired power plants. The Company is of the view that its unique proppant product has the potential to lead the industry due to:

- the widespread abundant availability of fly-ash, often near to oil and gas shale resources;
- the ultra-light weight of LWP fly-ash proppants; and
- the ability of LWP proppants to withstand the very high pressures and heat of deep wells.

LWP proppants have been certified by Independent Experts to meet or exceed both the American Petroleum Institute standards and the ISO standard.
