Quarterly Activities Report

for the period ended 31 December 2015

1 GROOTFONTEIN BASE METAL PROJECT

The Company holds an 80% interest in the highly prospective Grootfontein Base Metal Project (GBP). The Project is located in the Otavi Mountain Land (OML), north east Namibia (Figure 1). The OML is a globally significant base metal province with production coming from several mines, including the now closed Tsumeb, Kombat, Abenab, and Berg Aukas.

The Company's landholding stands at 632km² with a further 331km² under application. There are four recognised base metal trends with extensive strike lengths located within the tenement package, namely the Askevold, Khusib, Pavian and Abenab Trends. These advanced projects have been the main focus of the Company's exploration efforts.

On its tenements and applications, Deeps holds two of the five historically important mines of the Otavi Mountain Land – Abenab and Christiana formerly Abenab West). Both mines have only been tested over short strike lengths, with significant exploration upside available to Deeps.

Activities during the Quarter

Due to the prevailing difficult market conditions and depressed commodity prices, no fieldwork was completed on the GBP during the quarter.

2 WESTERN AUSTRALIAN GOLD PROJECTS

2.1 Twin Hills (M 29/21), Western Australia

The sale of the Twin Hills Project was completed during the quarter and this will allow the Company to focus on its other core assets.
