QUARTERLY REPORT FOR PERIOD ENDING – 31 December 2015

OVERVIEW

Work completed by Summit Resources Limited (“Summit” or the “Company”) in the quarter centred on continuing radiometric ore sorting studies on samples from the Company’s main deposits and planning for follow on metallurgical studies as well as ongoing environmental monitoring.

The total JORC (2004) Mineral Resources under Summit’s management in the Mount Isa region includes 104.6Mlb U₃O₈ Measured and Indicated Mineral Resources and 37.5Mlb U₃O₈ Inferred Mineral Resources. Of this, 57.8Mlb U₃O₈ Measured and Indicated Mineral Resources, as well as 26.5Mlb U₃O₈ Inferred Mineral Resources, are attributable to Summit. 53.7% of the Mineral Resources are located at Valhalla; the rest are distributed over the Bikini, Skal, Odin, Andersons, Mirrioola, Watta and Warwai deposits. Details are as follows: - individual Mineral Resource figures, conforming to the JORC guidelines, are quoted on 100% of project basis.

(Figures in the table above may not add due to rounding)

There are currently no plans to update the Company’s mineral resources in the near future. During the quarter the Company continued to operate on minimum operational expenditure, at a level intended to maintain the tenements in good standing, as a consequence of the continuing weakness in the uranium spot price.

The information in the table above in relation to the Mount Isa area mineral resources was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with JORC Code 2012 on the basis that the information that the estimates are derived from has not materially changed since it was last reported.

The Company’s base metal projects are currently being explored by Aeon Metals Limited (**Aeon**) and its subsidiary Aeon Walford Creek Limited (**Aeon Walford**) under joint venture and mineral rights agreements.

REVIEW OF OPERATIONS

ISA URANIUM JOINT VENTURE (QLD)

Interest: Summit Resources (Aust) Pty Ltd - 50%; Paladin Energy Ltd (Paladin) – 50%

Operator: Summit Resources (Aust) Pty Ltd

The Isa Uranium Joint Venture includes the Valhalla, Odin and Skäl deposits.

Bulk drill core samples from the main deposits are now undergoing radiometric sorting and metallurgical test work studies at ANSTO in Sydney. The initial phase of radiometric sorting is in progress and samples are being generated from this study for follow-on metallurgical work. In addition an academic project on the regional mineralisation processes is currently underway and it is hoped that this will be completed in the first half of CY2016.

MOUNT ISA NORTH URANIUM PROJECT (100% Summit Resources (Aust) Pty Ltd)

Summit owns 100% of the Mount Isa North Uranium Project which consists of 934km² of granted tenements that are prospective for uranium, copper and base metals. The tenements are adjacent to the city of Mount Isa. The project includes the Bikini, Mirrioola, Watta, Warwai and Andersons uranium deposits as well as numerous other uranium prospects.

In conjunction with the radiometric sorting and metallurgical test work previously commenced for the Isa Uranium Joint Venture, samples are now being processed by ANSTO for the deposits within the Mount Isa North Uranium Project areas in order to assess these deposits suitability to processing via previously identified flow sheets.

BASE METALS EXPLORATION (Aeon Walford- 80%; Summit Resources (Aust) Pty Ltd - 20%)

Summary

Aeon Walford (formerly named Aston Metals (Queensland) Limited) was acquired by Aeon in June 2014.

Isa North - EPM 17511, 17513, 17514, 17519 and 16921

Aeon are analysing the results from a 3 hole (534m) RC programme at the Hero prospect during the previous quarter in order to determine whether follow-up drilling is warranted. Whilst the 3 holes did not intersect any high grade copper previously identified in the northern end of the prospect, wide intercepts of low grade mineralisation indicated that hydrothermal fluids altered and mineralised the target stratigraphy over a significant strike length.

Isa West and Isa South – (all joint venture tenements)

Aeon undertook desktop reviews of the Isa West and Isa South tenements during the quarter in order to determine whether any tenement relinquishments may be warranted. It is expected that the outcomes from this work will be utilised in the near future.
