QUARTERLY ACTIVITIES REPORT ENDING 31 DECEMBER 2015

Exploration

During the quarter, Ishine International Resources (ASX: ISH, "Ishine" or the "Company") conducted a desktop study of all the data of its tenements. The Company and its JV partners discussed and planned the exploration activities for 2016. SA tenements EL4830 and EL4831 have been extended for another year. Exploration work is scheduled to commence early 2016.

Surrender of Tenement EL4833

Due to limited ultramafic stratigraphy and limited hosted rock, our JV partner has decided not to further invest in SA tenement EL4833.

Corporate

The Company's 5,000,000 Options exercisable at \$0.20 have lapsed unexercised on 31 December 2015.

The Board continues to review potential new project acquisition opportunities to enhance shareholder value.
