ASX Announcement

ASX:MGY

MALAGASY MINERALS LIMITED Activities Report for the December Quarter 2015

HIGHLIGHTS

During the quarter Malagasy Minerals Limited (ASX:MGY) announced:

- That it had executed a Heads of Agreement (HOA) with Greenmount Resources Pty Ltd ("Greenmount") to acquire all of the issued capital of Greenmount (ASX announcement dated 26th October 2015).
- That notice was provided by both MGY and Greenmount of the completion of the formal due diligence process and that formal agreements with the Shareholders of Greenmount have been entered into (ASX announcement dated 4th December 2015).
- A Notice of General meeting to approve the acquisition of Greenmount was distributed to shareholders. The Notice included an Independent Experts Report for shareholders to consider prior to voting. The meeting will be held at 12.00pm WST on Wednesday 3rd February.
- The Company name will change to Capricorn Metals Ltd following the completion of the acquisition of Greenmount, with the ASX ticker code to change to 'CMM'.
- That it had received binding commitments from Corporate and Sophisticated investors to subscribe for 45,454,546 shares at an issue price of 3.3 cents per share to raise \$1.5m. (ASX announcement dated 8th December 2015).

No brokerage or other fees were required for the placement. The pricing of 3.3c represents a premium of 7.7% to the 30 business day VWAP (ASX announcement dated 8th December 2015).

The placement was oversubscribed and includes a significant new shareholder in Regis Resources Ltd (ASX:RRL), who have been allocated 38,484,002 shares, representing 10% of the post-Greenmount Acquisition shares of the Company. The Company looks forward to welcoming Regis and all other new shareholders to the share register, and regards this investment as a strong endorsement of the potential of the Karlawinda project.

The placement is contingent upon the completion of the acquisition of Greenmount Resources Pty Ltd and its Karlawinda Gold Project. Funds raised from the placement will be used in gold exploration at Karlawinda, and for working capital

The placement will be completed within 3 business days of the approval by shareholders of the acquisition of Greenmount Resources to be held on 3 February 2016.

KARLAWINDA PROJECT DETAILS

Summary (See ASX announcement dated 26th October 2016)

- Bibra Deposit JORC 2012 Inferred resource at: 18mt @ 1.1g/t Au for 650,800oz Au (COG 0.5g/t).
- Potential for near term open pit production: approximately \$12 million already spent on resource evaluation and pre-feasibility study activities. (Including: metallurgical test work, conceptual mining designs, hydrology, baseline environmental studies, CIL process plant design and power supply), and initial programs of regional exploration (aircore drilling, geochemical surveys and geophysical

survey). In addition, the project area has been the subject of Heritage Surveys with a number of Heritage Agreements in place.

- Subject to completion of the acquisition of Greenmount Resource Pty Ltd and finalization of the capital raising a program of resource expansion drilling will commence.
- Thick, flat lying gold mineralized structure amenable to low cost open pit mining with mineralization starting close to surface. No previous mining.
- Located close to key infrastructure and mining support services at Newman, W.A. (Figure 1).
- Large scale potential within an unexplored Archaean greenstone belt to significantly add to the resource base in the near term:
 - Bibra Gold Deposit: gold mineralization remains open in down plunge positions and potential exists for strike extensions and stacked mineralized gold lodes. Large areas of defined mineralization are not included in the JORC resource.
 - Francopan Prospect: drilling intersections up to 5km away from the Bibra Deposit include 81m @ 1.2g/t Au (includes 15m @ 3g/t Au) and 37m @ 1.9g/t Au (Table 1).
 - **Regional Exploration:** largely limited to reconnaissance aircore drilling. Number of defined high priority targets for immediate testing. Potential for a large-scale mineralized system.

TRANSACTION STATUS

Under the HOA Malagasy will acquire all of the issued capital of Greenmount by the issue of 171,636,476 fully paid ordinary shares, which will represent 50% of the expanded capital of Malagasy after the issue.

All conditions precedent have been met, other than Malagasy shareholder approval for the issue of shares for the acquisition.

CAPITAL STRUCTURE

The capital structure following completion of the transaction would be as follows (assuming all resolutions at the annual general meeting which relate to the issue of shares are passed.):

	Shares	%	Options
Existing securities	171,636,476	44.15	8,250,000
To be issued for Greenmount acquisition	171,636,476	44.15	-
To be issued for placement	45,454,546	11.70	
	388,727,498	100.00	8,250,000

BOARD AND MANANGEMENT

At completion of the transaction, existing Malagasy directors Dr. Peter Woods and Mr. Graeme Boden will resign and two Greenmount directors Mr. Heath Hellewell and Mr. Peter Thompson will join the board.

Mr. Thomson will become the Managing Director of Malagasy and existing company secretaries Mr. Graeme Boden and Ms. Natasha Forde will be retained.

RESTRUCTURING OF EXISTING MALAGASY ACTIVITIES

As announced in a release to the market earlier today the internal restructuring of Malagasy activities will continue, to provide the capacity to facilitate capital injections to the Company, but the distribution of the graphite exploration assets to pre-transaction Malagasy shareholders will not proceed.

MADAGASCAR GRAPHITE PROJECT

Malagasy has been focused on a large exploration project in southern Madagascar exploring for high-grade, high-quality graphite deposits and mafic-ultramafic intrusive related nickel-copper deposits.

The graphite prospectivity of the region has been established by the discovery of the large, high-quality Molo Graphite Deposit by Energizer Resources Inc. ("Energizer"). Malagasy announced (27th March 2014) that it had finalized the sale of the company's 25% interest in the project in order to crystallise significant value and to increase its focus on the company's highly prospective 100% owned ground. The transaction has delivered a low-risk immediate return to Malagasy in the form of initial cash and share payments, whilst maintaining leveraged exposure through future benchmark cash and share payments.

Malagasy has been working to a strategy to define the potential of the 100% held ground to host additional high-grade graphite deposits that would have the potential to either enhance, or be enhanced by, the development of the Molo Graphite Deposit by Energizer. Malagasy has been targeting a high-grade resource base with a particular focus on identifying near surface, low mining cost deposits that can be assessed quickly and at modest cost, potentially working off the benefits of the Molo development.

Activities during the December quarter were:

- Completion of 1400 metres of trenching and sampling at the Razafy (10 trenches for 800m) and Haja (3 trenches for 600m) graphite targets. The information will provide critical data as to the continuity of the high-grade mineralisation intersected in the drilling.
- Mapping of the trenches.
- Dispatch of 980 composite samples to ACME Laboratory in Canada for Total Carbon analysis.
 Delays in receiving final assays from the laboratory has delayed the reporting of these results and any resource estimation work till early February 2016.
- Tenement rationalization. Lower priority areas have been identified and the statutory process of relinquishment is now in progress.

Previously reported drilling results from Razafy and Haja are:

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 Issued and quoted securities. The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, AASB 1022: Accounting for Extractive Industries and AASB 1026: Statement of Cash Flows apply to this report.
- 5 Accounting Standards. ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

+ See chapter 19 for defined terms.
