# QUARTERLY REPORT

For the quarter ended 31 December 2015

## TABLE OF CONTENTS

1.	HIGHLIGHTS	2
2.	CORPORATE REVIEW	4
3.	MARILLANA IRON ORE PROJECT (100% INTEREST)  3.1 Marillana Development  3.2 Marillana Infrastructure.	4
4.	OPHTHALMIA IRON ORE PROJECT (100% INTEREST)  4.1 Ophthalmia development	
5.	TENEMENTS	6
6.	DAMAJIANSHAN MINE (100% INTEREST)	8
7.	CORPORATE PROFILE.	9
8.	GLOSSARY	10
9.	APPENDIX 5B	11

### 1. HIGHLIGHTS

- Revised mine planning studies at Marillana are demonstrating that reduced stripping ratios, haul distances and waste rehandle can all be achieved, whilst still maximising product yield in the first ten years of mine life.
- The appeal lodged by TPI in the Supreme Court (Court of Appeal) against the original Supreme
  Court finding that Brockman's Access Proposal was valid and complied with the requirements
  of section 8 of the Access Code was heard on 20 August 2015. Brockman is still awaiting
  the decision of the Court of Appeal in this matter.
- A bulk sample of ore from the Sirius deposit at Ophthalmia that was sent to China for a sinter testwork programme in the previous quarter indicates that there is no fatal flaws in the sintering performance of blends where Sirius fines replaces established Pilbara iron ore fines products up to 30%.

### 2. CORPORATE REVIEW

#### Cash position

The consolidated cash position of the Group as at 31 December 2015 was HK\$72 million.

#### Corporate

Mr. Yip Kwok Cheung Danny resigned as an independent non-executive director of the Company on 2 November 2015 due to his other business engagements.

The Company has implemented significant cost saving measures to cope with the challenges brought about the materially lower iron ore price environment.

## 3. MARILLANA IRON ORE PROJECT (100% INTEREST)

#### 3.1 Marillana Development

Brockman has focussed its efforts on optimisation studies for the Marillana Project. The current economic climate has presented cost saving opportunities and the project team is investigating the likely beneficial impact on previous capital and operating cost estimates for the Marillana Project under the existing cost environment, in readiness for when an infrastructure solution is secured.

Revised mine planning studies aimed at reducing haul distances, increasing product yields in the early mine life and minimising rehandling of waste materials, have progressed well during the quarter. These changes are anticipated to have a positive impact on projected mining costsat Marillana.

#### 3.2 Marillana Infrastructure

The development of the Marillana iron ore project remains dependent on securing a viable rail and port infrastructure solution.

#### Rail

In May 2013, Brockman commenced seeking access rights to The Pilbara Infrastructure Pty Ltd's ("TPI's") belowrail infrastructure under the Western Australian Railways (Access) Code 2000 (WA) ("Code"), to allow it to haul up to 20 Mtpa of hematite iron ore product from its Marillana Iron Ore Project ("Marillana Project"), for a term of 20 years ("Access Proposal"). The access sought proposed to exit the TPI mainline at Port Hedland where North West Infrastructure ("NWI") has a capacity allocation of 50 Mtpa at the proposed SP3 and the SP4 berths for iron ore export from South West Creek in the Inner Harbour.

As part of the Access Proposal, Brockman will procure the necessary spur lines and associated infrastructure to connect Marillana with the TPI railway and to connect it to the proposed NWI facilities in Port Hedland, which will include unloading, stockpiling and ship loading facilities in South West Creek, Port Hedland.

Since May 2013, significant delays have occurred due to legal challenges by TPI. On 4 October 2013, TPI commenced legal proceedings in the WA Supreme Court challenging the validity of Brockman's Access Proposal. On 26 September 2014, Edelman J handed down his decision, which supported Brockman's position, finding that the Access Proposal was valid and complied with the requirements of section 8 of the Access Code. TPI's action was wholly dismissed, with TPI ordered to pay Brockman's costs of the action. Subsequently, TPI lodged an appeal in the Supreme Court (Court of Appeal) which was heard on 20 August 2015, by Buss JA, Murphy JA and Beech J. Brockman is still awaiting the decision of the Court of Appeal in this matter.

Brockman continues to investigate alternative infrastructure solutions for the Marillana Project. Material changes in Pilbara cost bases, including the lower oil price environment and State Government support for junior miners in the Pilbara has provided a basis for reviewing previously investigated opportunities.

#### <u>Port</u>

Brockman, as a foundation member of the North West Infrastructure joint venture (NWI), has a potential port solution through the Western Australian State Government conferral of 50Mtpa export capacity to NWI and the related potential port stock yards and berth locations (SP3 and SP4 in South West Creek in the Port Hedland inner harbour) set aside by the Pilbara Ports Authority. The NWI opportunity is reliant on securing a viable rail solution to connect potential users mines with the port.

NWI has made further cost savings during this market cycleawaiting resolution of the rail solution. Brockman remains focussed on protecting its foundation shareholding position in NWI and remains vigilant to the opportunity for other aspirant Pilbara based junior developers and miners to support the future port development.

## 4. OPHTHALMIA IRON ORE PROJECT (100% INTEREST)

#### 4.1 Ophthalmia development

The outcome from the sinter testwork programme that there are no fatal flaws in the sintering performance of blends where Sirius fines replaces either Pilbara Blend of MAC (Mining Area C) fines up to 30%. Most parameters show only gradual changes as substitution increases, except that mix moisture and fuel loads do increase significantly. There is little change in sinter productivity or granulation, RDI is similar or improved marginally, as is softening and melting performance. RI is lower but still well within tolerance.

CISRI issued a summary of the results of granulation tests and the sinter pot tests for review. Further analysis of sinter chemistry and metallurgical characteristics are in progress, with a view to determining the likely price discount for Sirius Fines.

## 5. TENEMENTS

### Tenements disposed of during the Quarter

		Tenement	Tenement			Interest
Project	Location	type	number	Commodity	Status	held
Chichester Range	West Pilbara	E	47/3362	Iron Ore	Withdrawn	0%
Indabiddy Creek	West Pilbara	E	52/3123	Iron Ore	Withdrawn	0%

## 6. DAMAJIANSHAN MINE (100% INTEREST)

During the quarter, concerns about the growth of the Chinese economy continues to weigh on copper prices. We are continuing to review our mining strategy to ensure that this project generates maximum shareholder returns throughout the life of the mine.

There was a net cash refund to customer at RMB0.24 million during the quarter ended 31 December 2015. Such cash refund mainly represented an overprepayment of product sales for the last quarter. (Cash receipts from product sales and related debtor at RMB4.7 million were recorded, September 2015 quarter).

Cash payments for production associated with mining operations during the quarter amounted to approximately RMB1.1 million (RMB4.6 million, September 2015 quarter).

Cash payments for exploration activities and development recorded at RMB3.8 million (RMB1.9 million, September 2015 quarter). Production drilling activities were continued during the quarter.

	Dec' 15 Quarter (Tonnes)	Sept' 15 Quarter (Tonnes)	Variance %
Ore mined and delivered to stockpile	32,073	35,316	(9)
Ore processed	38,504	44,686	(14)
Concentrate produced (metal tonnes)	210	223	(6)
Concentrate sold (metal tonnes)	210	228	(8)

#### Note

Recognition of copper concentrate metal tonnes is based on the most recent available information with a subsequent adjustment made upon final determination.

<sup>+</sup> See chapter 19 for defined terms.

## **Notes**

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- Issued and quoted securities The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows* apply to this report.
- Accounting Standards ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

Appendix 5B Page 16 01/05/2013

<sup>+</sup> See chapter 19 for defined terms.
