

Aiming to have counter-drone security products in production in 2016

Highlights

- **Successful counter drone technology demonstrations to US government agencies**
- **Aiming to have first counter drone products in production in 2016**

Department 13 (ASX Code: D13) ("D13") has successfully conducted two recent demonstrations for senior personnel representing US government agencies and defense organizations of the Company's innovative Counter Drone technology.

These demonstrations are an important part of the process of building confidence and establishing relationships with key personnel within these agencies and organizations and we have conducted several follow-up meetings with specific organizations to discuss how our technology and resources can meet their organization's requirements.

The Company has also recently met with tier 1 security systems integrators that are showing interest in inserting our counter drone technology into their security systems infrastructure. We have also begun discussions with a commercial property holder of large open-air shopping properties, that have expressed interest in our counter drone technology capability.

D13 continues to strengthen our engineering, finance and sales teams and has moved into our permanent building and begun operations at our new corporate headquarters at 7021 Columbia Gateway Drive, Suite 175, Columbia, Maryland 21046. Our headquarters is strategically located in the heart of America's defense and intelligence community.

D13 is focused on achieving our goal of having our first commercial counter drone security product in production this year. In anticipation of this, D13 has established sales and distribution partnerships in Australia, United Kingdom and Europe via our well qualified and well connected distribution partners in EPE (Australia) and IMSL (UK and Europe).
