What are the key risks of a further investment in the Company?	<p>The Offer should be considered highly speculative. Before deciding to subscribe under the Offer, you should consider the risk factors set out in this Prospectus and all other relevant material including our public announcements and reports. Some of the specific risks relevant to an investment in the Company are:</p> <ul style="list-style-type: none"> • Technology development and Commercialisation risk - Hazer is an early stage company with IP rights to the Hazer Process Technology. A significant risk is whether the Company can further develop and then commercialise the Technology; through developing large scale in-laboratory development, progressing through demonstration and pilot plants to a commercial plant utilising the Technology. The Hazer Process features production costs associated with increased natural gas consumption compared to other hydrogen production technologies. The Company will seek to more than offset this increase in production costs by the sale of high purity graphite co-produced with hydrogen from the Hazer Process. A failure to achieve commercialisation of the Hazer Process will have a significant adverse impact on the Company's business model, operating results and financial position. • Operational Risk - The demonstration plant, pilot plants and any commercial plant proposed by the Company may be affected by various factors, including operational and technical difficulties in scaling up the Hazer Process; difficulties in commissioning and operating plant and equipment; mechanical failure or plant breakdown; unanticipated reactor issues which may effect through-put; industrial and environmental accidents; industrial disputes; and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment. • Future Funding Needs - The Company has yet to build sufficient scale and commercialise the Technology and therefore has not as yet generated any revenue or profits. The Company will depend on the availability of investor funds if and until the Company generates cash flows from successful commercialisation of the Technology. No assurance can be given that future funding for further development of the Technology will be made available on acceptable terms (if at all). If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its expansion and development programs as the case may be. 	Section 3

Question	Response	Where to find more information
	<ul style="list-style-type: none"> • Intellectual Property risk - The success of the Company's Technology will depend in part on the Company's ability to obtain patents (and therefore proprietary rights) without infringing the proprietary rights of others. Three patent applications have been made in respect of the Technology. The strength of patents involves complex legal and scientific questions and can be uncertain. There can be no assurance that any patents in relation to the Hazer Process will afford the Company commercially significant protection of the Hazer Process or that competitors will not develop competing technologies that circumvents such patents. There is also a risk of unauthorised replication of the Technology and the Company being forced to litigate to enforce or defend any intellectual property rights. • Supply contracts /customer engagement – In order to successfully commercialise the Technology, the Company will need to supply hydrogen gas and/or bulk graphite to customers to generate revenue and this will require customer engagement and the execution of product supply contracts. The Company could also look to licence its Technology. Given the Company is at an early stage, it does not currently have any customers. • Dependence on key personnel - The Company's prospects depend in part on the ability of management to advance the Technology of the Company. Loss of key personnel may have an adverse impact on the Company's performance. 	
How do I accept my Entitlement under the Offer?	<p>All Eligible Shareholders are entitled to subscribe for Entitlement Options under the Offer. If you wish to make an Application in respect of your Entitlement, you must complete the Entitlement and Acceptance Form that accompanies this Prospectus.</p> <p>You may accept all or part of your Entitlement.</p> <p>If you do not wish to take up any of your Entitlement, you do not need to take any action and your Entitlement will lapse.</p>	Section 4.2(a)

Is the Offer underwritten?	The Offer is not underwritten. Any Entitlement not accepted will form the Shortfall.	Section 4.1

2. REASON FOR THE OFFER AND EFFECT ON THE COMPANY

2.1 Background

The Company is making this Offer which consists of a pro-rata non-renounceable entitlement issue to Eligible Shareholders on the basis of 1 Entitlement Option for every 4 Shares held by Eligible Shareholders on the Record Date at an issue price of 1 cent per Entitlement Option ("**Offer**").

The Offer will raise up to \$161,343 before expenses at Full Subscription by the issue of 16,134,251 Entitlement Options.

As at the date of this Prospectus, the Company has 64,537,002 Shares and 32,300,000 Options on issue. Option holders with an address in Australia or New Zealand may exercise their Options before the Record Date and participate in the Offer. In this event, the number of Entitlement Options to be issued under this Prospectus and the funds raised as a result of the Offer may vary.

2.2 Use of funds

The funds raised by the Offer of up to approximately \$161,343 will be used as additional working capital for the Company and also to meet Offer expenses of approximately \$20,000.

2.3 Effect on shareholders' equity and cash reserves

Assuming that all Entitlement Options offered under the Offer are issued, the principal effects of the Offer on the Company will be to:

- (a) increase the total number of Options on issue (see Section 2.4); and
- (b) increase our cash reserves by approximately \$161,343, before taking into account the expenses of the Offer (see Section 2.5).

A pro forma statement of financial position, which that contains further information about the effect of the Offer on the Company, is provided in Section 2.5.

2.4 Effect on capital structure

The effect of the Offer on the Company's capital structure at the date of the Prospectus and assuming Full Subscription is shown in the following table:

4. The Series E Options have the same terms as the Entitlement Options (upon payment of the subscription price for the Entitlement Options). They will form the same series of Options being a total of 26,434,251 Options with an exercise price of 30 cents and an expiry date of 31 December 2018.

2.5 Pro-forma balance sheet

To illustrate the effect of the Offer on the Company, a pro-forma balance sheet has been prepared based on the unaudited balance sheet as at 31 December 2015. The pro forma balance sheet shows the effect of the Offer as if it had been made on 31 December 2015 based on the following assumptions:

- (a) The issue of 16,134,251 Entitlement Options under the Offer at an issue price of 1 cent each to raise \$161,343.
- (b) Expenses of the Offer, being approximately \$20,000.

2.6 Potential effect on control

The Entitlement Options have no participating rights or entitlements until exercised. It is only upon exercise of the Entitlement Options and the issue of Shares that rights such as voting rights arise.

The effect of the Offer on the capital structure is set out in Section 2.4. If all the Entitlement Options are issued under the Offer they will represent approximately 12.96% of the capital of the Company on a fully diluted basis at the date of this Prospectus.

By reason of the above, the Offer should not have any material effect on the control of the Company.

3. RISK FACTORS

3.1 Introduction

An investment in the Entitlement Options the subject of this Prospectus is highly speculative as the Company is an early stage technology commercialisation company without a history of revenue generation. Careful consideration should be given to the risk factors prior to applying for Entitlement Options offered for subscription under this Prospectus. Some of these risks can be mitigated by the use of appropriate safeguards and actions, but some are outside the Company's control and cannot be mitigated. You should also consider consulting with your professional advisers before deciding whether or not to apply for Entitlement Options.

The following is a list of the material risks that may affect the financial position of the Company, the value of an investment in the Company, as well as the Company's operations. The list is set out under "Company and Industry Risks" and "General Investment Risks". The list is not an exhaustive list of risks.

3.2 Company and Industry Risks

Technology development and commercialisation risk

Hazer is an early stage company which has intellectual property rights to the Hazer Process Technology. A significant risk is whether the Company can further develop and then commercialise the Technology; through developing large scale in-laboratory development, progressing through demonstration and pilot plants to a commercial plant utilising the Technology. The Hazer Process features production costs associated with increased natural gas consumption compared to other hydrogen production technologies. The Company will seek to more than offset this increase in production costs by the sale of high purity graphite co-produced with hydrogen from the Hazer Process. A failure to achieve commercialisation of the Hazer Process will have a significant adverse impact on the Company's business model, operating results and financial position.

Operational Risks

The demonstration plant, pilot plants and any commercial plant proposed by the Company may be affected by various factors, including operational and technical difficulties in scaling up the Hazer Process; difficulties in commissioning and operating plant and equipment; mechanical failure or plant breakdown; unanticipated reactor issues which may effect through-put; industrial and environmental accidents; industrial disputes; and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

Future funding needs

The funds raised by the Offer will be used for general working capital and to meet the expenses of the Offer.

The operations of the Company are at an early stage. The Company has yet to build sufficient scale to commercialise the Technology and therefore has not as yet generated any revenue or profits. The Company will depend on the availability of investor funds if and until the Company generates cash flows from successful commercialisation of the technology. No assurance can be given that future funding for further development activities will be made available on acceptance terms (if at all). If the Company is unable to obtain additional

financing as needed, it may be required to reduce the scope of its operations and scale back its expansion and development programs as the case may be.

Intellectual Property risk

The success of the Company's Technology will depend in part on the Company's ability to obtain patents (and therefore proprietary rights) without infringing the proprietary rights of others. Three patent applications have been made in respect of the Technology. The strength of patents involves complex legal and scientific questions and can be uncertain. There can be no assurance that any patents in relation to the Hazer Process will afford the Company commercially significant protection of the Hazer Process or that competitors will not develop competing technologies that circumvents such patents.

There is also a risk of unauthorised replication of the Technology and the Company being forced to litigate to enforce or defend any intellectual property rights.

Supply contracts/customer engagement

In order to successfully commercialise the Technology, the Company will need to supply hydrogen gas and/or bulk graphite to customers to generate revenue and this will require customer engagement and the execution of product supply contracts. The Company could also look to licence its Technology. Given the Company is at an early stage, it does not currently have any customers.

Dependence on key personnel

The Company's success largely depends on the core competencies of the Directors and management and the ability of the Company to retain these key executives. Loss of key personnel may have an adverse impact on the Company's performance.

Management of Growth

There is a risk that management of the Company will not be able to implement the Company's growth strategy. The capacity of the management to properly implement and manage the strategic direction of the Company may affect the Company's financial performance.

Competition

The industry in which the Company will be involved is subject to domestic and global competition. While the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, whose activities or actions may, positively or negatively, affect the operating and financial performance of the Company's business.

Insurance

The Company may maintain insurance within ranges of coverage that it believes to be consistent with industry practice and having regard to the nature of activities being conducted. However, it is not always possible to insure against all risks associated with activities in development of technology. The Company may decide not to take out insurance against certain risks as a result of high premiums or for other reasons. Should liabilities arise on uninsured risks, the Company's business, financial condition and results of operations and the market price of securities may be materially adversely affected.

Legal Proceedings

Legal proceedings may arise from time to time in the course of the business of the Company. As at the date of this Prospectus, there are no material legal proceedings affecting the Company and the Directors are not aware of any legal proceedings pending or threatened against or affecting the Company.

3.3 General Investment Risks

Securities investments and share market conditions

There are risks associated with any securities investment. The prices at which the securities trade may fluctuate in response to a number of factors.

Furthermore, the stock market, and in particular the market for early stage technology commercialisation companies, may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.

Legislative

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies may adversely affect the financial performance of the Company.

Economic risk

Changes in both Australian and world economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings.

5. RIGHTS ATTACHING TO ENTITLEMENT OPTIONS AND UNDERLYING SECURITIES

5.1 Rights attaching to Entitlement Options

The terms of the issue of the Entitlement Options are:

- (a) The Options will be issued for a subscription price of 1 cent each.
- (b) Each Option entitles the holder to one Share (fully paid ordinary share).
- (c) The exercise price of the Options is 30 cents.
- (d) The Options are exercisable at any time prior to 5.00 pm WST on 31 December 2018 (Expiry Date).
- (e) The Options are freely transferable. The Company will apply for quotation of the Options on ASX.
- (f) The Company will provide to each Option holder a notice that is to be completed when exercising the Options (Notice of Exercise). The Options may be exercised wholly or in part by completing the Notice of Exercise and delivering it together with payment to the secretary of the Company to be received any time prior to the Expiry Date. The Company will process all relevant documents received at the end of every calendar month.
- (g) Upon the exercise of an Option and receipt of all relevant documents and payment, the holder will be issued a Share ranking equally with the then issued Shares.
- (h) There will be no participating rights or entitlements inherent in the Options and the holders will not be entitled to participate in new issues of capital which may be offered to Shareholders during the currency of the Options. However, the Company will ensure that the Optionholder will be notified of a proposed issue after the issue is announced. This will give an Optionholder the opportunity to exercise their Options prior to the date for determining entitlements to participate in any such issue.
- (i) If there is a bonus issue (Bonus Issue) to Shareholders, the number of Shares over which an Option is exercisable will be increased by the number of Shares which the holder would have received if the Option had been exercised before the record date for the Bonus Issue (Bonus Shares). The Bonus Shares must be paid up by the Company out of profits or reserves (as the case may be) in the same manner as was applied in the Bonus Issue, and upon issue will rank equally in all respects with the other Shares on issue as at the date of issue of the Bonus Shares.
- (j) In the event of any reconstruction (including consolidation, sub-division, reduction or return) of the issued capital of the Company prior to the Expiry Date, all rights of an Optionholder are to be changed in a manner consistent with the Listing Rules.

5.2 Rights attaching to underlying securities (Shares)

The securities underlying the Entitlement Options are Shares. The rights attaching to ownership of Shares in the Company are:

- (a) set out in the Company's Constitution; and
- (b) in certain circumstances, regulated by the Corporations Act, the Listing Rules and the general law.

A summary of the more significant rights attaching to Shares is set out below. This summary is not exhaustive nor does it constitute a definitive statement of the rights and liabilities of our Shareholders.

Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at a general meeting of members every member has one vote on a show of hands and one vote per Share on a poll. The person who holds a share which is not fully paid shall be entitled to a fraction of a vote equal to that proportion of a vote that the amount paid on the relevant share bears to the total issue price of the share. Voting may be in person or by proxy, attorney or representative.

Dividends

Subject to the rights of holders of shares issued with any special rights (at present there are none), the profits of the Company which the Board may from time to time determine to distribute by way of dividend are divisible to each share of a class on which the Board resolves to pay a dividend in proportion to the amount for the time being paid on a share bears to the total issue price of the share. All Shares currently on issue and the shares to be issued under this Prospectus are fully paid Shares.

Future Issues of Securities

Subject to the Corporations Act and the Listing Rules, the Directors may issue, grant options over, or otherwise dispose of unissued shares in the Company at the times and on the terms that the Directors think proper and a share may be issued with preferential or special rights.

Transfer of Shares

A shareholder may transfer Shares by a market transfer in accordance with any computerised or electronic system established or recognised by ASX for the purpose of facilitating transfers in Shares or by an instrument in writing in a form approved by ASX or the Board.

Meetings and Notices

Each shareholder is entitled to receive notice of, and to attend, general meetings for the Company and to receive all notices, accounts and other documents required to be sent to shareholders under the Constitution, the Corporations Act or the Listing Rules.

Shareholders may requisition meetings in accordance with the Corporations Act.

Election of Directors

There must be a minimum of 3 Directors. At every annual general meeting one third of the Directors (rounded to the nearest whole number) must retire from office. If the Company has less than 3 Directors, one Director must retire from office together with any Director who would have held office for more than 3 years if that Director remains in office until the next general meeting. These retirement rules do not apply to certain appointments including the managing director.

Indemnities

To the extent permitted by law the Company must indemnify each past and present Director and secretary against any liability incurred by that person as an officer of the Company and any legal costs incurred in defending an action in respect of such liability.

Winding Up

If the Company is wound up, the liquidator may, with the sanction of a special resolution of the shareholders:

- divide the assets of the Company among the members in kind;
- for that purpose fix the value of assets and decide how the division is to be carried out as between the members and different class of members; and
- vest assets of the Company in trustees on any trusts for the benefit of the members as the liquidator thinks appropriate.

Alteration to the Constitution

The Constitution can only be amended by a special resolution passed by at least three quarters of shareholders present and voting at the general meeting. At least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

Listing Rules

While the Company is admitted to trading on the Official List, then despite anything in the Constitution, if the Listing Rules prohibit an act being done, the act must not be done. Nothing in the Constitution prevents an act being done that the Listing Rules require to be done. If the Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the Listing Rules require the Constitution to contain a provision and it does not contain such a provision, the Constitution is deemed to contain that provision. If the Listing Rules require the Constitution not to contain a provision and it contains such a provision, the Constitution is deemed not to contain that provision. If a provision of the Constitution is inconsistent with the Listing Rules, the Constitution is deemed not to contain that provision to the extent of the inconsistency.
