

**ASX ANNOUNCEMENT / MEDIA RELEASE****ASX:ABU**

1 April 2016

***Mining Completed at Old Pirate Gold Mine***

ABM Resources NL ("ABM" or the "Company") advises that mining has now been completed on schedule at the Old Pirate Gold Mine.

The December 2015 mine plan for Old Pirate (ASX 24 December 2015) forecast gold production of 12,000 ounces for the period from 1 December 2015 to mine closure and provisional results indicate that this target has been marginally exceeded.

Processing at the Coyote plant is expected to be completed within the first half of April 2016, after which all gold bearing material will be recovered from circuit and the plant placed on care and maintenance. Final gold recovery and reconciliation will be completed in May 2016 with the off-site stripping of loaded carbon.

Signed

Mr Brett Lambert  
Managing Director
