## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2013

### 1 Summary of Significant Accounting Policies

#### Reporting Basis and Conventions

The directors have prepared the financial statements on the basis that the company is a non-reporting entity because there are no users dependent on general purpose financial statements. The financial statements are therefore special purpose financial statements that have been prepared in order to meet the requirements of the Corporations Act

The financial statements have been prepared in accordance with the mandatory Australian Accounting Standards applicable to entities reporting under the Corporations Act 2001 and the significant accounting policies disclosed below, which the directors have determined are appropriate to meet the needs of members. Such accounting policies are consistent with the previous period unless stated otherwise.

The financial statements have been prepared on an accruals basis and are based on historical costs unless otherwise stated in the notes. The material accounting policies that have been adopted in the preparation of these statements are as follows:

#### Accounting Policies

##### (a) Income Tax

The income tax expense (revenue) for the year comprises current income tax expense (income) and deferred income tax expense (income).

Current income tax expense charged to the profit or loss is the tax payable on taxable income calculated using applicable income tax rates enacted, or substantially enacted, as at reporting date. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

##### (b) Tax Consolidation

The company is part of a tax-consolidated group under Australian Taxation Law, of which Investment Administration Holdings Limited is the head entity. As a result, the company is subject to income tax through its membership of the tax-consolidated group. Such taxes are measured using the 'stand-alone taxpayer' approach. Current tax liabilities and assets and deferred tax assets arising from unused tax losses immediately assumed by the head entity.

The group notified the Australian Taxation Office that it has formed a tax-consolidated group to apply from 5 November 2007. The tax consolidated group has entered a tax funding arrangement whereby each company in the group contributes to the income tax payable by the group in proportion to their contribution to the group's taxable income.

##### (c) Financial Assets

Financial assets are initially recognised on the cost basis including acquisition charges associated with the financial asset. The carrying amounts of financial assets are reviewed annually by the directors. The recoverable amounts are assessed from the quoted current market value for shares in listed companies or the underlying net assets for other non-listed corporations. The expected net cash flows from investments have not been discounted to their present value in determining the recoverable amounts, unless otherwise stated.
