Drilling Completed

Highlights:

- **Drilling completed at Gidgee, WA**

Gateway Mining Ltd ('Gateway' or 'the Company') announced on 26 May 2014 that an RC and diamond drilling program had commenced at Gidgee, WA. This program is now complete and diamond core samples and RC drill sample bags are expected to be delivered to the laboratory by the end of the week. Assaying may take up to several weeks after that.

A down-hole electromagnetic survey is expected to commence in the coming days on the intrusive nickel-copper target at Apex (refer to GML announcement on 19 May 2014).

A further update will be provided to the market when results are available.

About Gateway Mining Limited

Gateway holds approximately 150sqkm of tenements over the Gum Creek Greenstone Belt in the Yilgarn Craton, Gidgee WA (600km NE of Perth). The tenements have significant potential for Ni-Cu-PGE related mineralisation, all the hallmarks of a significant new VMS province, along with existing gold mineralisation throughout the project. The Company is well funded and plans to focus exploration efforts on The Cup area for the immediate future. Gateway also has in place an experienced management and technical team.

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Scott Jarvis, a full time employee & Head Geologist at Gateway Mining, a member of the Australian Institute of Geoscientists. Mr Scott Jarvis has a minimum of 5 years' experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Scott Jarvis consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
