ASX ANNOUNCEMENT

Haulage Permit Granted

Guildford Coal Limited (the Company) (ASX: GUF) is pleased to announce that the Mongolian Ministry of Roads and Transport has granted a haulage permit which allows transport of coal from the Baruun Noyon Uul (BNU) Mine to Shivee Khuren. This is adjacent to the Ceke Border crossing into China.

This marks an exciting milestone in the development of the BNU Mine in the South Gobi Region of Mongolia. The mine is now fully commissioned and transport of coal to China can commence.

The approval is the culmination of many months of effort in meeting the stringent requirements of the Mongolian Ministry of Roads and Transport. As a result the Company is confident that the transport can be undertaken in a way that is sensitive to the needs of the local communities in the area and protects the environment.

Granting of the haulage permit allows the next phase of works to proceed. The company will shortly begin the process of exporting a trial shipment of approximately 10,000 tonnes to processing facilities in northern China. The trial shipment is designed to confirm the down-stream logistics and processing performance.

Final arrangements for sale will be made following processing at a facility in Ceke, Inner Mongolia with early interest already shown by companies including:

- Shenhua Wuhai
- Taixi Wuhai
- Jiuquan Iron and Steel Group (JISCO) Gansu
- Qunhua Inner Mongolia
- Jinda Wuhai

Guildford Coal looks forward to being able to capitalise on the mine development work undertaken to date as it establishes the BNU product in the market.

For further information please contact Peter Kane, Group Managing Director, 07 3005 1533.
