

ASX Announcement

10 July 2014

New development centre in India

Invigor Group Limited (ASX: IVO) (“Invigor”) has established a new development centre in Chennai, India.

Invigor Digital Solutions India (“IDSI”), comprising a team specialising in product design and functionality, will assist the forecast growth in Invigor’s digital solutions business. The new centre will ensure high quality, efficient and responsive development and delivery of solutions to our customers. The IDSI team is expected to grow to 40 people over the next 12 months and include specialists in the areas of mobile applications and e-commerce development, user experience and cloud computing. IDSI will be led by Preethi Narayanan. Preethi Narayanan was formerly Director – Product Centre of Excellence of iSOFT Group Limited and has extensive experience in working with teams across many countries.

Preethi will work alongside Invigor’s Chief Technology Officer, Dr Brian Cohen, enabling the IDSI team and the Australian development team to deliver digital solutions to Invigor’s customers.

Dr Cohen said: “Invigor’s digital solutions business is growing quickly and with our Indian team we are better able to manage this growth cost effectively while controlling quality. With our team’s experience and understanding of business requirements, particularly in the areas of mobile applications and cloud based solutions, we can now be more proactive and effective in our development approach by working directly with clients”
