Smartpay is pleased to announce that it is providing the payments technology for ASB's launch of their mPOS Product into the NZ market.

The new technology allows merchants using ASB Accept mPOS to securely accept both credit cards and pin based EFTPOS / debit cards on the move in or out of their stores using Smartpay's next generation compact mPOS eftpos terminals which integrate seamlessly with a merchant's iPad, iPhone or iPod touch running the ASB Payment Interface (Pi) app.

Smartpay Managing Director Bradley Gerdis says the Company welcomes the opportunity to be involved in delivering a new payment solution to the market. "This is a significant development for Smartpay as it demonstrates our ability to bring market leading payments technology to the market, along with our ability to support the technical and logistical requirements of our bank partners."

Mr Gerdis says this is the first significant implementation of its kind into the New Zealand market. "We expect to see growing demand for our terminals as we support the ASB rollout. This is another example of our new payments products which we are bringing to market".
