MANAGING DIRECTOR'S LETTER

20 October 2014

Dear Shareholders

The King Solomon Mines Limited Board of Directors is pleased to offer all its eligible Shareholders the opportunity to participate in a three-for-two renounceable Rights Issue of New Shares at an issue price of \$0.002 per Share. The issue is fully underwritten by Taylor Collison Limited. Details of the underwriting are set out in Sections 1.3 and 5.1 of this Offer Document.

The issue is fully underwritten by Taylor Collison Limited. Two of the Company's Directors, Simon O'Loughlin and Simon Taylor, will act as sub-underwriters for up to 15 million New Shares each. They will not receive a sub-underwriting fee. Details of underwriting fees are set out in Sections 1.3 and 8 of this Offer Document.

All Eligible Shareholders registered at 7:00pm (Sydney time) on 24 October 2014 will be entitled to participate in the Rights Issue on the basis of three New Shares for every two Shares held at an issue price of \$0.002 per Share. The Rights Issue is fully underwritten. The amount raised by King Solomon Mines Limited under the Rights Issue will therefore be \$919,188 before costs.

The Closing Date for acceptance of the Rights Issue is 5:00pm (Sydney time) on 12 November 2014.

Background

Over the past year the Company has sought buyers for its principal project Sonid North in Inner Mongolia, China. A sale has yet to be concluded.

The Company has also reviewed a number of potential new projects for acquisition. The Company is continuing with this approach.

Funding

The three-for-two renounceable fully underwritten Rights Issue at \$0.002 per share will raise \$919,188 before costs. The funds will be used to provide capital for the Company to undertake exploration work on its projects in Inner Mongolia, China and on other projects it may acquire, and to search for new business opportunities in the resource project area.

The Board has decided that the best way to fund the working capital needs of the Company is via a combination of a private placement and a Rights Issue. The private placement was announced on 25 September 2014 at a price of \$0.003 per Share with a total raised of \$68,335. This Rights Issue is the next funding step.

The Board thanks all Shareholders for their continuing interest and ongoing support.

Yours sincerely

TRANSACTION OVERVIEW

The new shares to be subscribed for under the Rights Issue are to be offered at \$0.002 per share. Taylor Collison Limited has been appointed as lead manager and Underwriter for the Rights Issue.

OVERVIEW – INNER MONGOLIA, CHINA PROJECTS

King Solomon Mines owns a 100% interest in two exploration licences, which contain its two exploration projects in Inner Mongolia, China. The Company has explored these projects over the past few years and concluded that they do not have the potential for discovery of a minerals resource of sufficient size to justify further work by King Solomon Mines. The Company has sought buyers for its principal project Sonid North in Inner Mongolia, China over the past year. A sale has yet to be concluded.

During the year, the Company sold two of its projects. The Company has also reviewed a number of potential new projects for acquisition and has concluded that having a reasonable level of cash would assist this process. The funds raised through this Rights Issue should place the Company in a strong position in its negotiations to acquire a new project(s).

The Company holds the rights to these exploration projects through a 90% equity interest in Inner Mongolia Plate Mining Limited (Plate), a Sino-foreign incorporated joint venture, which holds the two exploration licences referred to above. The remaining 10% interest in Plate is held by Inner Mongolia Ao Meng Xin Economic and Trade Co., Ltd (AMX), which is jointly owned by Fu La, who is a past Director of the Company, and his wife Na Dong. The rights of the Company and AMX, as shareholders of Plate, are governed by an equity joint venture contract. AMX holds its 10% interest in Plate on trust for the Company.

POTENTIAL PROJECTS

King Solomon Mines has considered a number of opportunities to acquire new projects and has concluded that having a reasonable level of cash would assist this process. The funds raised through this Rights Issue should place the Company in a strong position in its negotiations to acquire a new project(s). The additions of Simon O'Loughlin and Simon Taylor to the Board will also assist this process through the skills and experience they bring to the Company.

Experienced Board

The Company has a strong Board, including the recent addition of two new Directors. Backgrounds for these two new Directors are set out below.

Mr Simon Taylor BSc, M A I G

Non-Executive Director

Simon Taylor is a geologist with over 25 years' experience in exploration, project assessment and development in the resources sector. Whilst having experience in Australia, a majority of his projects have also been in countries such as Brazil, Turkey, Uganda, Tanzania, Mali, China, the United Kingdom and North America.

Simon is currently a non-executive director of Chesser Resources Limited and Oklo Resources Limited.

Mr Simon O'Loughlin BA (Acc)

Non-Executive Director

Simon O'Loughlin is the founding member of O'Loughlins Lawyers, an Adelaide-based, medium-sized specialist commercial law firm. He also holds accounting qualifications. Simon has extensive experience and involvement with companies in the resources sector. He has also been involved in the listing and back-door listing of numerous companies on ASX and the National Stock Exchange.

Simon is a non-executive director of Lawson Gold Ltd, WCP Resources Limited, Crest Minerals Limited, Chesser Resources Limited and Petrathern Limited.

Other Directors

The experience of long-serving Directors Christopher Castle and Stephen McPhail was presented in the Annual Report released to ASX on 30 June 2014.

Purpose of the Offer

This Rights Issue is to provide funding for the continuation of exploration of the Chinese assets, as well as carrying out an active search and some funding for new projects and for working capital. The Company intends to expend the funds raised in the Offer as set out in Section 2.1.

1. Details of the Offer

1.1 The Offer

Under this Offer Document, the Company is offering, by way of a pro-rata, renounceable Rights Issue, 459,594,209 New Shares (subject to the rounding up of Entitlements) in the Company to Eligible Shareholders on the basis of three New Shares for every two existing Shares held on the Record Date at an issue price of \$0.002 per New Share, to raise \$919,188 before costs.

There are currently 1,600,000 Options on issue, each with an exercise price of \$0.12. Each Option entitles the holder, upon payment of the applicable exercise price, to subscribe for one Share. Only if the Options have been exercised and the Shares have been issued before the Record Date will these Shares participate in the Rights Issue. The number of New Shares issued may, therefore, increase if some or all of these Options are exercised prior to the Record Date. If all of the Options that can be exercised are exercised, the number of Shares on issue prior to the New Shares being issued will increase by 1,600,000.

The Offer is made on a renounceable basis. This means that your Entitlement under this Offer Document is transferable and you may renounce (sell) any Entitlement that you do not wish to accept. Any portion of your Entitlement that you decide not to accept by the Closing Date will lapse and the New Shares the subject of that Entitlement will form part of the Shortfall and will be available to the Underwriter, as detailed in Section 1.3.

1.2 Closing Date

The Closing Date for the Rights Issue is 5:00pm (Sydney time) on 12 November 2014. No Applications for New Shares pursuant to the Rights Issue received after this time will be accepted. The Directors reserve the right to extend the Closing Date where permitted by the ASX Listing Rules.

1.3 Underwriting and Shortfall

The Offer is fully underwritten by Taylor Collison Limited. Details of the Underwriting Agreement are set out in Section 5.1. The price of shares issued through the Underwriter will not be less than \$0.002.

Pursuant to Listing Rule 7.2 (exception 2), any allocation of the Shortfall to the Underwriter or any sub-underwriter (if appointed) in accordance with the Underwriting Agreement, will not count towards the Company's 15% threshold under Listing Rule 7.1, provided the Underwriter receives the New Shares within 15 business days after the close of the Offer.

Pursuant to Listing Rule 7.2 (exception 3), any allocation of the Shortfall to persons other than the Underwriter or any sub-underwriter (if appointed) in accordance with the Underwriting Agreement, will not count towards the Company's 15% threshold under Listing Rule 7.1, provided that the Company makes the issue within three months after the close of the Offer and the issue price is not less than the price at which the Shares were offered under the Offer. The Directors in conjunction with the Underwriter reserve the right to issue the Shortfall at their discretion.

Underwriting of Shortfall, Sub-Underwriting by Messrs O'Loughlin and Taylor

Messrs O'Loughlin and Taylor, Directors of King Solomon Mines, have agreed to act as sub-underwriters to the issue. They have advised the Company that they have agreed to act as sub-underwriters for any Shortfall to the issue up to a maximum of 15,000,000 shares each (A\$30,000 each). Neither of them are currently shareholders. If they receive no shares as sub-underwriters their holdings will remain at 0% and if they receive the maximum i.e. 15,000,000 of the Shortfall shares each, as sub-underwriters, their holdings will increase to 1.96% each. They will not receive a sub-underwriting fee.

1.5 Price

The New Shares offered pursuant to the Rights Issue will be issued at a price of \$0.002 per New Share.

1.6 Eligibility and Entitlement

All registered King Solomon Mines Shareholders as at the Record Date whose registered addresses are within Australia or New Zealand will be eligible to participate in the Rights Issue (**Eligible Shareholders**).

The Company has decided that the Rights Issue will not be extended to shareholders with registered addresses outside Australia or New Zealand as the Company has formed the view that it would be unreasonable to extend the Offer in such a way having regard to:

- (a) the number of shareholders in each place outside Australia and New Zealand, both specifically and as a proportion of the total issued Shares of the Company;

- (b) the number and value of New Shares to be offered to shareholders outside Australia and New Zealand; and
- (c) the costs of complying with the laws and legal requirements, and requirements of regulatory authorities, in overseas jurisdictions.

The number of New Shares to which an Eligible Shareholder is entitled under the Offer is shown on the personalised Entitlement and Acceptance Form accompanying each hard copy of this Offer Document sent to Eligible Shareholders.

An explanation of the actions required by Eligible Shareholders under the Rights Issue is set out in Section 3 of this Offer Document.

1.7 Restrictions on the Distribution of the Offer Document

No Offer will be made to Shareholders with a registered address outside Australia or New Zealand (Ineligible Shareholders).

This Offer Document and accompanying Entitlement and Acceptance Form do not, nor are they intended to, constitute an offer in any place in which, or to any person to whom, it would not be lawful to make such an Offer.

The Offer is being made in New Zealand pursuant to the Securities Act 1978 (New Zealand) and the Securities Regulations 2009.

Pursuant to Listing Rule 7.7, the Company has appointed Taylor Collison Limited (AFSL 247083) (Nominee) to arrange for the sale of the Entitlements that would have been given to Ineligible Shareholders and to account to them for the net proceeds of the sale (if any).

The Nominee will direct the proceeds of sale (if any) to the Company or other party upon its instruction to facilitate pro-rata payments to Ineligible Shareholders. The Nominee will have the absolute and sole discretion to determine the timing and price at which the Entitlements may be sold, and the manner in which any sale is made.

Any interest earned on the proceeds of the sale of these Entitlements will firstly be applied against the expenses of such sale, including brokerage, and any balance will accrue to the relevant Ineligible Shareholder as described below.

The net proceeds of the sale of these Entitlements (if any) will then be forwarded by the Company as soon as practicable to the Ineligible Shareholders, in proportion to their share of such Entitlements (after deducting brokerage commission and other expenses). If any such net proceeds of sale are less than the reasonable costs that would be incurred by the Company for distributing those proceeds, the proceeds may be retained by the Company.

Notwithstanding that the Nominee must sell the Entitlements, Ineligible Shareholders may nevertheless receive no net proceeds if the costs of the sale are greater than the sale proceeds.

Shareholders resident in Australia or New Zealand holding Shares on behalf of persons who are resident overseas are responsible for ensuring that taking up an Entitlement under the Offer does not breach regulations in the relevant overseas jurisdiction. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

1.8 Record Date

The Record Date to participate in the Rights Issue is 7:00pm (Sydney time) on 24 October 2014.

1.9 Ranking

New Shares issued pursuant to the Rights Issue will rank equally with existing fully paid ordinary Shares on issue.

1.10 Minimum Subscription

There is no minimum subscription under the Offer.

1.11 Allotment of New Shares

New Shares issued pursuant to duly completed Entitlement and Acceptance Forms will be allotted no later than five Business Days after the Closing Date. However, no New Shares will be issued until the proceeds of the Rights Issue have been received and permission has been granted by ASX for quotation of the New Shares on ASX.

Application Monies will be held in trust for the Applicants until allotment of the New Shares. Any interest earned on the Application Monies will be for the benefit of King Solomon Mines and will be retained by King Solomon Mines whether or not allotment takes place.

A completed and lodged Entitlement and Acceptance Form (together with a cheque or evidence of payment for the Application Monies by electronic means to King Solomon Mines' satisfaction) constitutes a binding and irrevocable Application for the number of New Shares specified in the Entitlement and Acceptance Form. The Entitlement and Acceptance Form does not need to be signed to be a binding Application.

1.12 Quotation of New Shares

Application for quotation by ASX of the New Shares, the subject of this Offer Document, has been made in accordance with the ASX Listing Rules.

1.13 Rounding

In determining Entitlements to New Shares pursuant to the Rights Issue, fractional Entitlements will be rounded up.

1.14 Taxation Implications

Shareholders should be aware that there may be taxation implications in relation to Entitlements under the Rights Issue. These taxation implications will vary between different Shareholders. Shareholders should consult their professional tax adviser. Shareholders should seek, and rely on, their own taxation advice regarding an investment in the Company. Neither the Company, nor any of its officers, employees, agents or advisers, accept any liability or responsibility with respect to the taxation consequences connected with the Rights Issue.

1.15 CHESS

The Company participates in the security transfer system known as CHESS. CHESS is operated by ASTC, a wholly-owned subsidiary of ASX, in accordance with the ASX Listing Rules and the ASTC Settlement Rules.

Under CHESS, Eligible Shareholders will not receive a share certificate but will receive a statement of holding of New Shares. If you are broker-sponsored, and you take up all or part of your Entitlement, ASTC will send you a CHESS statement. The CHESS statement will set out the number of New Shares issued to you under this Offer Document, and provide details of your holder identification number and the participant identification number of the sponsor. If you are registered on the issuer-sponsored sub-register, and you take up all or part of your Entitlement, your statement will be despatched by the Share Registry, and will contain the number of New Shares issued to you under this Offer Document and a security holder reference number. A CHESS statement or issuer-sponsored statement will routinely be sent to holders of Shares at the end of any calendar month during which the balance of their holding of Shares changes. Holders of Shares may request a statement at any other time. However, a charge may be made for additional statements.

2. Use of Proceeds and Effect of the Rights Issue on the Company's Capital

2.1 Use of Proceeds of the Rights Issue

ACTIVITY	BUDGETED AMOUNT
Exploration on the Company's current projects and on any new projects acquired	\$419,000
New project investigation activities	\$60,000
Issue costs including underwriting fees	\$86,000
Corporate costs	\$149,000
Working capital	\$205,188
Total	\$919,188

2.2 Effect of Rights Issue on the Company

The principal effect of the Rights Issue, assuming all New Shares offered under the Offer Document are issued, will be to:

- increase the Company's cash reserves, initially by \$919,188 (before deducting the costs of the Rights Issue) immediately after completion of the Rights Issue;
- provide the Company with additional capital for the purposes referred to in Section 2.1 of this Offer Document; and

- (c) increase the number of Shares on issue from 306,396,139 Shares as at the date of this Offer Document to 765,990,348 Shares (see Section 2.3 of this Offer Document),

assuming none of the Options currently on issue are exercised prior to the Record Date.

Eligible Shareholders who take up their Entitlement will not have their holdings diluted by the Rights Issue.

Any New Shares that are not taken up as part of the Offer will be available to be part of a placement of the Shortfall. The holding of any Shareholder who does not exercise all of their rights under the Entitlement will be diluted.

2.3 Capital Structure

Number of Shares to be issued under this Offer Document (subject to rounding)	459,594,209

Eligible Shareholders who take up their full Entitlements will not have their shareholdings diluted as a result of the Rights Issue. Eligible Shareholders who do not participate in full or at all will have their holdings diluted and the holdings of Excluded Shareholders will be diluted.

Any New Shares that are not taken up by an Eligible Shareholder will be available to be part of a placement of the Shortfall by the Underwriter.

\$0.12	29 July 2016	1,600,000

Only if the Options have been exercised and the Shares issued before the Record Date will these Shares participate in the Rights Issue. The number of New Shares issued may, therefore, increase if some or all of these Options are exercised prior to the Record Date. If all of the Options that can be exercised are exercised, the number of Shares on issue prior to the New Shares being issued will increase by 1,600,000.

4. Risks

In accepting their Entitlements under the Rights Issue, Shareholders will be subscribing for New Shares in the Company. There are risks involved in making this investment. This Section of the Offer Document identifies the major areas of risk associated with an investment in King Solomon Mines, but should not be taken as an exhaustive list of the risk factors to which the Company and its Shareholders are exposed. Shareholders are strongly encouraged to rely on their own knowledge of the Company, refer to announcements made by King Solomon Mines to ASX, and consult their professional advisers, to ensure they understand the operations of the Company and appreciate the risks involved with investing in the Company, before deciding whether to apply for New Shares.

Announcements made by the Company to ASX are available from the ASX website www.asx.com.au or from the Company's website <http://www.kingsolomonmines.com>.

The risks described in this Section may impact upon the Company's future performance, so the Company and its Directors have endeavoured (and will continue to do so) to take steps to safeguard the Company from, and to mitigate the Company's exposure to, these risks.

4.1 Specific Risks

(a) Value of Assets in Inner Mongolia, China

The Directors have reviewed the carrying value of the tenements based on the Directors' best estimate of the likely sales price of each tenement. There is no active market in China for these tenements. As a result of assessments, the Directors have reduced the carrying amount of the exploration and evaluation assets to \$391,000.

The Company's subsidiary, Plate, may not be successful in selling any of the exploration licences or may sell these assets at below the best estimate of likely sales price. Plate sold its office in Hohhot, Inner Mongolia in December 2013. It has received progress payments from the purchaser. These payments have been applied to the satisfaction of outstanding amounts owed to trade creditors. The purchaser of the office building may not make the final payment due under the sale agreement by the due date in June 2015. In this case, Plate would seek to sell the office to another

party to recoup what is owed. It may not be successful in doing this as the property market in Hohhot is currently weak and a sale may not be possible.

(b) Ongoing Funding

As a result of the Rights Issue, the Company expects to raise approximately \$919,188 before costs. As noted, these funds shall be deployed for general working capital purposes, mainly in connection with exploration work on the Company's Inner Mongolia, China tenements, its new project assessment and initial work on assets acquired, detailed due diligence work on potential project acquisitions and for working capital to fund its corporate costs.

In addition to these funds, the Company may need to raise debt and / or equity from time-to-time in relation to the funding of its business activities. The availability of such capital is influenced by a number of factors including, but not limited to, economic, legal and political conditions, and investors' and financiers' investment and credit policies. The inability of the Company to raise capital on favourable terms, or not at all, may have a material adverse effect on the Company's tenements and business. No assurance can be given that future funding will be made available on acceptable terms (if at all).

There are also a number of other specific risks associated with King Solomon Mines, which may adversely affect the Company's financial position, prospects and price of its listed securities.

(c) Country Risk

One of the purposes of this issue is to fund exploration in Inner Mongolia, China. Actions by foreign Governments and authorities are outside the control of the Company, and the rights to remedies that may be available in Australia are not necessarily available in China.

The projects in China are subject to a number of risks associated with operating in that country with its different political and legal system.

There is always a risk that the current, or a future, government may adopt substantially different policies or legislation that adversely affect mining and exploration activities. This may impact upon the Company's ability to obtain or maintain the necessary permits, authorisations or agreements to implement the projects under conditions or within time frames that make such plans and operations economic, and as a result, the Company's results of operations and its financial condition may be adversely affected.

The Company's operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on production, price controls, export controls, foreign currency remittance, income taxes, expropriation of property, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use and safety issues.

Failure to comply strictly with applicable laws, regulations and local practices could result in loss, reduction or expropriation of entitlements, or the imposition of additional local or foreign parties as joint venture partners with carried or other interests.

The occurrence of these various factors and uncertainties cannot be accurately predicted and could have an adverse effect on the operations or profitability of the Company.

(d) Exchange Rate and Metal Price Risks

The value of the Company's projects in Inner Mongolia will be primarily dependent on the price of gold and other metals, which are volatile and may fluctuate as a result of numerous factors that are beyond the control of the Company. Also, because the Company is operating using a range of currencies (A\$, NZ\$, US\$ and Yuan), the

variability in these currencies as between themselves and as between other currencies may have an adverse impact on the Company's profitability, and hence the share price.

(e) Environmental Risk

The Company is committed to making as little an impact on the natural environment as possible. However, mining operations have inherent risks and liabilities associated with the pollution of the environment and the disposal of waste products. Laws and regulations relating to the protection and remediation of the environment are generally becoming more restrictive, such that the cost of environmental mitigation may outweigh the benefit of continued activity. Further risk aspects of the Company's projects may include its compliance obligations as a result of changes in laws and regulations, assumptions that the Company makes to estimate liabilities, or if unanticipated conditions arise at its operations. If these occur, expenses and provisions may increase that could adversely affect the Company's results and financial condition.

(f) Potential Acquisitions

As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions of companies, products, technologies or resource projects.

4.2 General Risks

(a) Investment Risk

The New Shares to be issued pursuant to this Rights Issue should be considered speculative. They carry no guarantee as to payment of dividends, return of capital or market value. The prices at which the New Shares trade on ASX may be above or below the issue price paid for the New Shares. While the Directors commend the Rights Issue, Shareholders must make their own assessment of the likely risks and determine whether accepting their Entitlement is appropriate to their own circumstances.

(b) Share Market Risk

The Company has applied to ASX for quotation of the New Shares. Share market conditions may affect the listed securities regardless of the operating performance of the Company. Many factors will affect the market price of the securities including local and international stock markets, movements in interest rates, commodity prices and currency fluctuations, general economic outlook and investor sentimentality generally. The market price of the New Shares may fall as well as rise.

(c) Availability of Capital Risk

The ability of the Company to access debt and/or raise equity as, when and if required will be influenced by many factors and capital may not be available on commercially acceptable terms or may not be available at all.

(d) Economic Factors and Government Risk

The future viability of the Company is also dependent on a number of factors affecting performance of all industries, including, but not limited to, the following:

- general economic conditions in Australia, New Zealand and China, and its major trading partners;
- changes in government policies, taxation and other laws;
- the strength of the equity markets in Australia and New Zealand, and throughout the world, and in particular investor sentiment towards the commodities (resources) sector;

- movement in, or outlook on, interest rates and inflation rates;
- currency exchange rate fluctuations;
- changes in demand for, and sales pricing over, the short, medium and long terms for commodities proposed to be produced and sold by the Company (particularly gold and copper); and
- natural disasters, social upheaval or war in Australia, New Zealand, China or other countries.

(e) Exploration, Evaluation and Development Risks

Exploration, mine project development and mining inherently contain elements of significant risk. The future success of the Company, like all exploration and mining companies, will be heavily dependent upon a number of factors, many of which are beyond the control of the Company. Such risk factors include:

- maintenance of tenure, access to the Company's tenements, and the granting of any mining tenements and approvals required for the conduct of mining activities;
- reliance on key personnel, including the Directors, and ongoing access to competent management and technical personnel;
- the discovery, confirmation and exploitation of economically-recoverable ore reserves on the Company's tenements, or any other tenements that may be acquired in the future, which cannot be assured. Exploration on the Company's existing tenements may be unsuccessful, resulting in a reduction of the value of those tenements, diminution in the cash reserves of the Company, and possible relinquishment of the exploration and mining tenements;
- the calculation and interpretation of resource estimates, which are by their nature expressions of judgement based on knowledge, experience and industry practice. Estimates, which were valid when originally calculated, may alter significantly through additional fieldwork or when new information or techniques become available. This may result in alterations to development and mining plans, which may in turn adversely affect the Company's operations;
- financial failure or default by a participant in any joint venture or other contractual relationship to which the Company is, or may become, a party;
- mechanical failure, or breakdown of mining or drilling plant and equipment or mine structure resulting in significant delays;
- adverse weather conditions, accidents or industrial disputes over a prolonged period adversely affecting mining activities and the earning of revenues;
- industrial disputation in Australia, New Zealand, China and other countries; and
- adverse changes in government policies or legislation affecting mining and exploration activities.

There is no assurance that exploration of the mineral interests currently held by the Company, or in any other exploration interest the Company may subsequently acquire, will result in the discovery of an economically viable resource.

Even if a mineral resource is identified, exploitation of the resource may be hampered by various factors, including the unpredictable nature of mineral deposits, inappropriate drilling techniques, incorrect grade estimates, location and access restrictions, adverse ground conditions or poor equipment availability. Any of these factors may result in the exploration programme being drastically downgraded, preventing the Company from achieving its intended rate of production of metal.

(f) Title Risks, Landowner Title and Sovereignty Risks

Interests in tenements are governed by the respective state and national legislation, and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term, and carries with it annual expenditure and reporting requirements, as well as other conditions requiring compliance. Consequently, the Company could lose title to, or its interest in, the tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments as and when they arise.

In Inner Mongolia, China, or other locations where the Company may operate, certain rights are vested with the local landowners. There is always risk that the Company and the landowners cannot agree, and progress is hindered or even curtailed as a result. Should this occur, the Company's ability to conduct exploration and/or mining activities may be affected, which may have a material adverse effect on the Company's financial performance.

Further, exploration tenements do not confer authority to develop the project. In order for the Company to undertake development and production, it will need to obtain mining tenements under the relevant mining legislation. There is no guarantee that mining tenements or any approvals required for mining activities will be granted and, even if granted, they may be subject to any terms and conditions that the regulator considers appropriate. There is a further risk that tenements or leases will not be granted in a timely manner or that they will be granted with unexpected adverse conditions that will affect the profitability of the project.

(g) Calculation of Estimates

The calculation and interpretation of resource estimates are by their nature expressions of judgment based on knowledge, experience and industry practice. Estimates of the size and grade of an ore body depend on extrapolating a limited amount of geographical data. Estimates that were valid when originally calculated may alter significantly through additional fieldwork or when new information or techniques become available. This may result in alterations to development and mining plans, which may in turn adversely affect the Company's operations.

(h) Personnel

The Company's success depends on the continued services of its key personnel. Due to the key role they have taken in developing King Solomon Mines' exploration, business and financial plans, the Company could be adversely affected if any of them ceased to actively participate in the management of King Solomon Mines. If existing key personnel leave the Company, there may be a limited number of persons with the requisite skills and experience to serve in King Solomon Mines' senior management positions, which may hinder the Company's ability to successfully manage its growth plans.

(i) Production / Capital Costs

Fluctuations in exploration, production and capital costs may impact upon the Company's business, results of operations and financial condition. These costs may vary as a result of unforeseen events beyond the control of the Company, including international and local economic and political events.

(j) Equipment and Labour

Increases in worldwide and regional mining activities may increase costs or otherwise limit the Company's ability to purchase or hire equipment, supplies and services, and to recruit skilled personnel. There are additional risks of mechanical failure or breakdown of mining or drilling equipment resulting in significant delays. These factors may delay King Solomon Mines' planned exploration, development and production activities, which may adversely affect the Company's business, result of operations and financial condition.

(k) Local Community Relations

The Company's ability to advance its tenements in Inner Mongolia, China or in other jurisdictions will depend in significant part on its ability to maintain good relations with the local communities of these areas. A tenement holder is liable to compensate landowners for its entry onto and occupation of the land, and for loss and damage caused by exploration, mining or related activities. There is always the risk that negotiation with local communities regarding the benefits they will derive from the projects, compensation, royalties, employment and local business may not be successful, which may lead to progress with the projects being disrupted or curtailed as a result. Should this occur, King Solomon Mines' ability to conduct exploration and / or mining activities may be affected, which may have a material adverse effect on the Company's financial performance.

(l) Insurance Risks

The Company intends to insure its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance against all risks associated with mining exploration and production is not always available and where available the costs can be prohibitive.

(m) Competition Risk

The industry in which the Company is involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

(n) Investments may not be wholly owned

Resource investments (minerals and oil and gas) are often structured through joint ventures. There is a risk that development/production activity could be disrupted in situations where there is a disagreement on development/production programs or other issues between the Company and the other parties in such joint ventures. Should such disagreements occur, this may have a deleterious impact on the Company's operations and performance generally.

4.3 Speculative Nature of Investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Shares offered under this Rights Issue. Therefore, the New Shares to be issued pursuant to this Rights Issue carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares.

Potential investors should consider that investment in the Company is speculative and should consult their professional advisors before deciding whether to apply for New Shares in the Company. Shareholders should consult their stockbroker, solicitor, accountant or other financial adviser if they are in any doubt as to the value of the Rights Issue and in particular in relation to taxation implications.

The Underwriting Agreement also contains a number of indemnities, representations and warranties from the Company to the Underwriter that are considered standard for an agreement of that type.

Sub-Underwriting Agreements

Taylor Collison Limited and each of Messrs Simon O'Loughlin and Taylor (each the Sub-Underwriter and together the Sub-Underwriters) are parties to a Sub-Underwriting Letter Agreement (each a Sub-Underwriting Agreement) under which each Sub-Underwriter has agreed to underwrite 15,000,000 shares (Sub-Underwritten Shares) (for a sub-underwritten amount of A\$30,000) the subject of the Offer.

The Sub-Underwriters are not entitled to assign, transfer, lay-off, sub-syndicate or in any other manner deal with their rights or obligations under the Sub-Underwriting Agreement, without the prior written agreement of Taylor Collison Limited.

- (a) **Shortfall**
Taylor Collison Limited will calculate the shortfall amount by first dividing the total issue price of the Sub-Underwritten Shares (A\$60,000) by the total issue price of the Underwritten Shares (A\$919,188), and then multiplying that figure by the Shortfall (Sub-Underwritten Shortfall Shares). Each Sub-Underwriter is required to lodge with Taylor Collison Limited, by the date stipulated in the Agreement, a valid application for the Sub-Underwritten Shortfall Shares, with the applicable subscription monies.
- (b) **Fees**
The Sub-Underwriters will not receive an underwriting fee, a management fee or any other remuneration in respect of their sub-underwriting commitments.
- (c) **Representations, warranties and undertakings**
The Sub-Underwriters each give certain representations, warranties and undertakings in a form that is usual for agreements of this kind.
- (d) **Indemnity**
Each Sub-Underwriter agrees to keep Taylor Collison Limited, the Company and each of their related bodies corporate and their respective officers, employers and advisers (each an Indemnified Party) indemnified and to hold them harmless from and against all claims, demands, damages, losses, costs, expenses and liabilities suffered or incurred directly or indirectly by any Indemnified Party in any way relating to or arising out of breach by that Sub-Underwriter of its acknowledgments, representations and warranties under the Sub-Underwriting Agreement.
- (e) **Termination Rights**
A Sub-Underwriter has no right to terminate the Sub-Underwriting Agreement or the Underwriting Agreement. Taylor Collison Limited is entitled at its sole discretion to exercise any of its rights under the Underwriting Agreement, including its rights to vary or terminate the Underwriting Agreement, without providing any notice to the Sub-Underwriters and without any liability to the Sub-Underwriters arising out of the exercise of that discretion. If the Offer does not proceed or the Underwriting Agreement is terminated, the Sub-Underwriting Agreements will terminate.
- (f) **Limitation of Liability**
To the extent permitted by law, and subject to the rights and remedies which the Sub-Underwriters may have under the Corporations Act, the *Australian Securities and Investments Commission Act 2001 (Cth)* and similar laws which cannot be excluded, Taylor Collison Limited, the Company and their respective officers, employees, servants, agents and advisers (Related Persons) disclaim all responsibility, and will have no liability to the Sub-Underwriters or any other person for any loss or damage directly or indirectly arising out of or in connection with:
 - i. the Sub-Underwriting Agreement;

- ii. the issue and allotment of the shares the subject of the Sub-Underwriting Agreement; or
- iii. any information provided to the Sub-Underwriters by Taylor Collison Limited, the Company or their respective Related Persons, or for action taken by the Sub-Underwriters on the basis of such information, whether as a result of negligence, breach of contract or otherwise.

5.2 Effect of the Offer on control of the Company

The potential effect the Offer will have on the control of the Company is as follows:

- (a) if all Shareholders are Eligible Shareholders and take up their Entitlements under the Offer then the Entitlement Offer will have no effect on the control of the Company;
- (b) if not all Shareholders are Eligible Shareholders or do not take up their full Entitlements, the Shortfall will be allocated by the Underwriter in consultation with the Company, to the Underwriter or any sub-underwriter (if appointed) to the Offer (in accordance with Listing Rule 7.2 (exception 2)) or any other parties selected by them. The effect the placement of the Shortfall may have on control will depend entirely on the allocations made by the Underwriter or any sub-underwriter (if appointed);
- (c) if some Shareholders do not take up their Entitlements (whether because they are Ineligible Shareholders or otherwise), their equity in the Company will be diluted. The equity of Shareholders who only take up part of their Entitlement will also be diluted, but to a lesser extent;
- (d) the Options the Company currently has on issue are not expected to be exercised prior to the Record Date as the exercise price for these Options exceeds the issue price and the share price on 9 October 2014, of A\$0.005 per Share at close of trade, therefore the Options are expected to have no effect on the Offer or the control of the Company;
- (e) given the Offer is fully underwritten and that the Underwriter will enter into sub-underwriting arrangements with various parties, based on the structure of the Offer and the current level of holdings of substantial shareholders, the Offer is not expected to have a material effect or consequence on the control of the Company.
