Directors' report

The Directors of Orion Metals Limited ('Orion' or 'the Company') submit herewith the interim financial report of the Company for the half-year ended 31 August 2014.

Directors

The names and details of the Directors of the Company in office during the half-year and until the date of this report are:

Conglin Yue (Chairman/Chief Executive Officer)
Bin Cai (Executive Director/Chief Financial Officer)
Yanchun Wang (Non-Executive Director)
Dr Tao Li (Non-Executive Director)

Principal activities

The principal activity of the Company during the period was exploration for rare earth metals and gold.

Review of operations

The Company recorded a loss after tax of \$995,638 for the half-year ended 31 August 2014 (31 August 2013: \$354,224). There were impairment losses of \$661,622 during the period (2013: nil).

Key exploration activities for the period included:

Tanami West Project (previously Killi Killi Hills)

There has been no exploration field work conducted while Orion negotiates land access with the local traditional ownership group, the Tjurabalan People. All Orion's tenement responsibilities are compliant.

New tenure has been applied for, and is awaiting grant early 2015.

Mt Surprise Project

Across the tenement package, a 230 sample surface geochemical sampling and mapping program was implemented comprising of 159 stream sediments, 46 rock chips, and 25 soil samples. The stream sediment sample portion of the program was helicopter supported.

The program successfully identified several new mineralised zones that warrant follow up exploration, with anomalous rare earth elements, tin, and tungsten results.

Mt Ramsay Project

New tenement EPM 25677, located in the Baralaba District, approximately 190 km west of Gladstone, Queensland was granted. This is the first tenement in this region 100% owned by Orion, and forms the basis for the new project, Mt Ramsay Project.

Mt Ramsay is a topographic high comprising of alkaline rocks called nepheline syenites; they are considered highly prospective for rare earth elements.

Top Camp

The renewal notice to the DNRM Queensland was completed for Mining Lease ML 2764, with Orion's proposed scope of work for the next period being to evaluate the alluvial gold resource opportunity, as well as exploring for the source of the gold – copper anomalism found throughout the leases.

First stage of assessing the alluvial gold opportunity has been to conduct a gravity survey which will map out the palaeochannel geometry. Results of the processing are yet to be fully interrogated.

Broughton Creek

The Company withdrew from this farm-in project to focus on its other exploration activities. Expenditure totalling \$658,157 has been written off during the half-year.

There were no other significant changes to the Company's corporate activities during the period.

The historical cost basis has been used.

These half-year financial statements do not include all the notes of the type normally included in annual financial statements and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and financing and investing activities of the consolidated entity as the full financial statements. Accordingly, these half-year financial statements are to be read in conjunction with the annual financial statements for the year ended 28 February 2014 and any public announcements made by Orion Metals Limited during the half-year reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The same accounting policies and methods of computation have generally been followed in these half-year financial statements as compared with the most recent annual financial statements.

2 Operating segments

Identification of reportable operating segments

The consolidated entity has identified its operating segments based on the internal reports that are reviewed and used by the board of directors (chief operating decision makers) in assessing performance and determining the allocation of resources. The consolidated entity is managed primarily on a geographic basis, that is, the location of the respective areas of interest (tenements) in Australia.

Operating segments are determined on the basis of financial information reported to the board which is at the consolidated entity level. The consolidated entity does not have any products/services it derives revenue from.

Accordingly, management currently identifies the consolidated entity as having only one reportable segment, being exploration for gold and rare earth metals (REE). There have been no changes in the operating segments during the period. Accordingly, all significant operating decisions are based upon analysis of the consolidated entity as one segment. The financial results from this segment are equivalent to the financial statements of the consolidated entity as a whole.

Notes to interim finanical report for the half-year ended 31 August 2014

3 Going concern

The financial statements have been prepared on a going concern basis which contemplates the continuity of normal business activities and the realisation of assets and discharge of liabilities in the ordinary course of business. The Group has incurred a net loss after tax for the half-year ended 31 August 2014 of \$995,638, including a write off of exploration and evaluation assets of \$661,622, and a net cash outflow from operations of \$127,891. At 31 August, the Group's current assets exceeded its current liabilities by \$297,635.

Since balance date the Company has announced that it has entered into agreements with two of its major shareholders, for the placement of a total of 50,000,000 shares at a price of \$0.02 per share, raising \$1,000,000. Shareholder approval was obtained at an Extraordinary General Meeting held on 6 November 2014.

In addition to the Share Placements, the Company is providing eligible shareholders with the opportunity to participate in a share purchase plan ("SPP") to apply for up to \$15,000 worth of shares in the Company, free from brokerage or transaction costs. (See Note 7 - Events subsequent to the end of the reporting period).

The ability of the consolidated entity to maintain continuity of normal business activities and to pay its debts as and when they fall due is dependent on its ability to successfully raise additional capital and/or successful exploration and subsequent exploitation of areas of interest through sale or development.

6 Contingent liabilities

The possibility of native title claim applications at some future time, under the provisions of the Native Title Act (1993), may affect access to and tenure of exploration tenements. Any substantial claim may have an effect on the value of the tenement affected by the claim. No provision has been made in the accounts for the possibility of a native title claim application.

The consolidated entity is liable to pay royalties of 1% of gross sales proceeds from the Killi Killi Hills project, capped at \$100,000. As this project is still in the early stages of exploration it is premature to determine whether a royalty will be payable within the next seven years.

Otherwise the Directors are not aware of any contingent liabilities or contingent assets that are likely to have a material effect on the results of the consolidated entity as disclosed in these financial statements.

7 Events subsequent to the end of the reporting period

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of Orion Metals Limited, would be in the same terms if given to the directors as at the time of this auditor's review report.
