## **BQT SOLUTIONS SUPPLIER OF COBALT LOCKS TO OVERSEAS BANK OFFICE TOWER IN THE U.A.E.**

MaxSec Group Limited (ASX: MSP), today announced that its BQT Solutions Locking division has received an order for the supply of over 500 Cobalt locks for a prime office project in the Middle East.

We have been advised by our distributor, Secure Access Technologies that the office accommodation in Abu Dhabi is for a Saudi Arabian Bank and is the first of two buildings to be constructed on the site.

MSP's CEO, Geoff Cleaves, said "We are receiving steadily increasing inventory orders for the new Cobalt locks from our distribution partners and this order represents the first major project order for our revolutionary electric lock. We anticipate that project requirements for the Cobalt range will increase in the future as more users discover the benefits of the technology"

### **About our Cobalt Range of Locks**

The Cobalt range of motorized locks address the two biggest issues with electric locking; failure to lock due to mis-aligned door and failure to unlock due to side load on the door. The rotating cam action of the locking pins on these revolutionary products resolves both of these issues.

The Cobalt locks are available in two models, the YD30 Cobalt for 180° swing through doors and the YD30M Cobalt Mini for 90° swing through doors.

#### **Key Features**

- Able to align a door that is  $\pm 8\text{mm}$  from centre.
- Accommodate a door gap of up to 8mm.
- Voltage Range of 12-24VDC ( $\pm 15\%$ )
- On-site conversion from Fail Safe to Fail Secure.
- Release on demand whilst up to 100Kg is being applied to the door.
- Rated holding force in excess of 1,000kg
- Bolt position and door monitors.
- Fire Tested for 4 hours.
