AGL Releases 2014 Sustainability Performance Report

12 December 2014

AGL Energy Limited (AGL) today released its 2014 Sustainability Performance Report. It sets out the social, environmental and economic challenges and opportunities facing AGL and the energy industry, and how AGL is responding to these issues. AGL has produced annual sustainability reports since 2004.

AGL CEO & Managing Director, Michael Fraser, said that AGL had made some significant improvements to the way in which sustainability performance was reported this year. "We've focused on making the report accessible and user-friendly, by making it web-based and incorporating features such as videos and info graphics to make it easier for stakeholders to read," he said.

All sustainability performance data can also be viewed from a centralised data centre in interactive charts, as well as being able to be easily downloaded.

"We want to show our local communities and customers that we are transparent and honest about our performance, to help build their trust," said Mr Fraser.

The 2014 Sustainability Report provides details of AGL's sustainability performance during the year ending 30 June 2014 and is available online at www.agl.com.au/sustainability.

AGL encourages all stakeholders to engage with AGL about sustainable business performance through the AGL corporate blog (www.aglblog.com.au) and other social media channels listed in the report.

About AGL

AGL is one of Australia's leading integrated energy companies and largest ASX listed owner, operator and developer of renewable energy generation in the country. Drawing on over 175 years of experience, AGL operates retail and merchant energy businesses, power generation assets and an upstream gas portfolio. AGL has one of Australia's largest retail energy and dual fuel customer bases. AGL has a diverse power generation portfolio including base, peaking and intermediate generation plants, spread across traditional thermal generation as well as renewable sources including hydro, wind, landfill gas and biomass. AGL is taking action toward creating a sustainable energy future for our investors, communities and customers.
