

Armour Energy Limited

14 January 2015

R&D Rebate – Review Successful

The Directors of Armour Energy Limited (ASX: AJQ; Armour) wish to advise that the Company's application to Ausindustry for an Advance Finding under the Industry Research and Development Act 1986 ("the Act") has now been approved by Ausindustry. This entitles Armour to a substantial cash rebate that is expected to be received in the current quarter after the Australian Taxation Office processes the Company's 2014 financial year tax return.

As announced on 26 September 2014, Armour had been advised that its application was unsuccessful. Armour requested that decision be reviewed and, on the basis of the review, Armour has now received binding notification from Ausindustry that the previous determination has been revised, and the application has been approved with minor adjustments.

A handwritten signature in blue ink, appearing to read "K. Schlobohm".

About Armour Energy

Armour Energy is focused on the discovery and development of world class gas and associated liquids resources in an extensive and recently recognised hydrocarbon province in northern Australia. This region has only recently had its shale potential identified by Armour Energy. The domestic and global demand for gas, combined with the new shale extractive technologies and experienced personnel, provides Armour with an extraordinary opportunity to define and ultimately develop a new liquids rich gas province.

Armour Energy's permit areas are characterised by low population densities, cooperative stakeholders and aspects of the natural environment suited to the exploration and development of a future gas and liquids province. Armour places considerable importance on close liaison with traditional owners and all stakeholders.

Armour Energy is focusing on the exploration of the McArthur, South Nicholson and Georgina Basins in the Northern Territory and Queensland, and in the onshore Gippsland Basin in Victoria in joint venture with Lakes Oil, for gas and associated petroleum liquids.
