EBOS GROUP WINS KEY NSW HEALTH DISTRIBUTION CONTRACT

EBOS Group Limited is pleased to announce that its Onelink division in Australia has been awarded a contract by the New South Wales Government for the warehousing and distribution of medical consumables to all public hospitals in the State.

EBOS Group Chief Executive Patrick Davies said that Onelink would establish a new purpose-built distribution facility in Western Sydney that would provide dedicated services to NSW Health as part of this contract.

“While the size of this contract is not financially material for the EBOS Group, it is highly symbolic for the company’s operations in that it recognises our capability and experience in delivering an expanded range of premium healthcare logistics to our Australian and New Zealand-based customers,” Mr Davies said.

Mr Davies said the Western Sydney facility would be built within the next six months and be operational by late 2015.
